(a) Pre-provision profit, TBVPS and ROTCE are each non-GAAP financial measures. Tangible common equity ("TCE") is also a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-16 for a further discussion of these measures.

(b) Ratios are based upon annualized amounts.

(c) As of January 1, 2025, the benefit from the Current Expected Credit Losses ("CECL") capital transition provision had been fully phased out. For the periods ended December 31, 2024, September 30, 2024, June 30, 2024 and March 31, 2024, the ratios reflected the CECL capital transition provisions. Refer to Note 21 of this Form 10-K and Note 27 of JPMorganChase's 2024 Form 10-K for additional information.

(d) Reflects the Firm's ratios under the Basel III Standardized approach. Refer to Capital Risk Management on pages 33-39 for additional information.

(e) Total net revenue included a \$7.9 billion net gain related to Visa shares, and total noninterest expense included a \$1.0 billion contribution of Visa shares to the JPMorgan Chase Foundation. Refer to Executive Overview on pages 54-58, and Notes 2 and 6 of JPMorganChase's 2024 Form 10-K for additional information on the exchange offer for Visa Class B-1 common stock.

INTRODUCTION

The following is Management’s discussion and analysis of the financial condition and results of operations (“MD&A”) of JPMorgan Chase & Co. (“JPMorganChase” or the “Firm”) for the first quarter of 2025.

This Quarterly Report on Form 10-Q for the first quarter of 2025 (“Form 10-Q”) should be read together with JPMorganChase’s Annual Report on Form 10-K for the year ended December 31, 2024 (“2024 Form 10-K”). Refer to the Glossary of terms and acronyms and line of business metrics on pages 172–180 for definitions of terms and acronyms used throughout this Form 10-Q.

This Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on the current beliefs and expectations of JPMorganChase’s management, speak only as of the date of this Form 10-Q and are subject to significant risks and uncertainties. Refer to Forward-looking Statements on page 77 of this Form 10-Q and Part I, Item 1A, Risk Factors on pages 10–37 of the 2024 Form 10-K for a discussion of certain of those risks and uncertainties and the factors that could cause JPMorganChase’s actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results will be in line with any outlook information set forth herein, and the Firm does not undertake to update any forward-looking statements.

JPMorgan Chase & Co. (NYSE: JPM), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America (“U.S.”), with operations worldwide. JPMorganChase had \$4.4 trillion in assets and \$351.4 billion in stockholders’ equity as of March 31, 2025. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers, predominantly in the U.S., and many of the world’s most prominent corporate, institutional and government clients globally.

JPMorganChase’s principal bank subsidiary is JPMorgan Chase Bank, National Association (“JPMorgan Chase Bank, N.A.”), a national banking association with U.S. branches in 48 states and Washington, D.C. JPMorganChase’s principal non-bank subsidiary is J.P. Morgan Securities LLC (“J.P. Morgan Securities”), a U.S. broker-dealer. The bank and non-bank subsidiaries of JPMorganChase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm’s principal operating subsidiaries outside the U.S. are J.P. Morgan Securities

plc and J.P. Morgan SE (“JPMSE”), which are subsidiaries of JPMorgan Chase Bank, N.A. and are based in the United Kingdom (“U.K.”) and Germany, respectively.

For management reporting purposes, the Firm has three reportable business segments – Consumer & Community Banking (“CCB”), Commercial & Investment Bank (“CIB”) and Asset & Wealth Management (“AWM”) – with the remaining activities in Corporate. The Firm’s consumer business segment is CCB, and the Firm’s wholesale business segments are CIB and AWM. Refer to Business Segment & Corporate Results on pages 17-31 and Note 25 of this Form 10-Q, and Note 32 of JPMorganChase’s 2024 Form 10-K, for a description of the Firm’s reportable business segments and the products and services they provide to their respective client bases, as well as a description of Corporate activities.

The Firm’s website is www.jpmorganchase.com. JPMorganChase makes available on its website, free of charge, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after it electronically files or furnishes such material to the U.S. Securities and Exchange Commission (the “SEC”) at www.sec.gov. JPMorganChase makes new and important information about the Firm available on its website at <https://www.jpmorganchase.com>, including on the Investor Relations section of its website at <https://www.jpmorganchase.com/ir>. Information on the Firm’s website, including documents on the website that are referenced in this Form 10-Q, is not incorporated by reference into this Form 10-Q or the Firm’s other filings with the SEC.

EXECUTIVE OVERVIEW

This executive overview of the MD&A highlights selected information and does not contain all of the information that is important to readers of this Form 10-Q. For a complete description of the trends and uncertainties, as well as the risks and critical accounting estimates affecting the Firm, this Form 10-Q and the 2024 Form 10-K should be read together and in their entirety.

Total net revenue - managed basis	\$46,014	\$42,548	8

- (a) As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. For the period ended March 31, 2024, the ratios reflected the CECL capital transition provisions. Refer to Note 21 of this Form 10-Q and Note 27 of JPMorganChase's 2024 Form 10-K for additional information.
- (b) Reflects the Firm's ratios under the Basel III Standardized approach. Refer to Capital Risk Management on pages 33-39 for additional information.
- (c) NII and NIR refer to net interest income and noninterest revenue, respectively.
- (d) Markets consists of CIB's Fixed Income Markets and Equity Markets businesses. The Firm assesses the performance of its Markets business on a total net revenue basis, as revenues in NII generally have offsets across other revenue lines, primarily Principal transactions revenue.

First Republic-related gain: On January 17, 2025, the Firm reached an agreement with the FDIC with respect to certain outstanding items related to the First Republic acquisition. As a result of the agreement, the Firm made a payment of \$609 million to the FDIC on January 31, 2025 and reduced its additional payable to the FDIC, which resulted in a gain of \$588 million recorded in other income in the first quarter of 2025. Refer to Note 5 of this Form 10-Q and Note 34 on pages 319-321 of the Firm's 2024 Form 10-K for additional information.

Comparisons noted in the sections below are for the first quarter of 2025 versus the first quarter of 2024, unless otherwise specified.

Firmwide overview

For the first quarter of 2025, JPMorganChase reported net income of \$14.6 billion, up 9%, earnings per share of \$5.07, ROE of 18% and ROTCE of 21%. The Firm's results included a \$588 million First Republic-related gain in Corporate.

- **Total net revenue** was \$45.3 billion, up 8%, reflecting:
 - **Net interest income** ("NII") of \$23.3 billion, up 1%, driven by higher Markets net interest income, higher revolving balances in Card Services, the impact of securities activity including from prior quarters, and higher wholesale deposit balances. These factors were predominantly offset by the impact of lower rates and deposit margin compression, as well as lower average deposit balances in CCB. NII excluding Markets was \$22.6 billion, down 2%.
 - **Noninterest revenue** ("NIR") was \$22.0 billion, up 17%, predominantly driven by higher Markets noninterest revenue, a \$588 million First Republic-related gain, higher asset management fees in AWM and CCB, lower net investment securities losses in Treasury and CIO, and higher investment banking fees.
- **Noninterest expense** was \$23.6 billion, up 4%, driven by higher compensation expense, including higher revenue-related compensation and growth in the number of employees. The increase in expense was also driven by higher brokerage expense and distribution fees, and continued investments in technology and marketing, as well as the absence of a legal benefit from the prior year. These factors were largely offset by the impact of an FDIC special assessment accrual release of \$323 million compared with an accrual increase of \$725 million in the prior year.
- The **provision for credit losses** was \$3.3 billion. Net charge-offs were \$2.3 billion, up \$376 million, predominantly driven by Card Services, reflecting

the seasoning of vintages originated in recent years. The net addition to the allowance for credit losses was \$973 million and included \$549 million in **wholesale** and \$441 million in **consumer**, and was largely driven by changes in the weighted-average macroeconomic outlook.

In the prior year, the provision was \$1.9 billion, net charge-offs were \$2.0 billion and the net reduction in the allowance for credit losses was \$72 million.

- The total **allowance for credit losses** was \$27.8 billion at March 31, 2025. The Firm had an allowance for loan losses to retained loans coverage ratio of 1.94%, compared with 1.77% in the prior year.

Refer to Consolidated Results of Operations and Consolidated Balance Sheets Analysis on pages 9-11 and pages 12-13, respectively, for a further discussion of the Firm's results, including the provision for credit losses.

Pre-provision profit, ROTCE, TCE, TBVPS, NII and NIR excluding Markets, and total net revenue on a managed basis are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-16 for a further discussion of each of these measures.

- The Firm's **nonperforming assets** totaled \$9.1 billion at March 31, 2025, up 10%, driven by higher wholesale nonaccrual loans, largely in Real Estate, concentrated in Multifamily and Lodging, reflecting downgrades, partially offset by lower consumer nonaccrual loans, which included loan sales. Refer to Wholesale Credit Portfolio and Consumer Credit Portfolio on pages 52-60 and pages 49-51, respectively, for additional information.
- Firmwide **average loans** of \$1.3 trillion were up 2%, predominantly driven by higher loans in CIB and AWM.
- Firmwide **average deposits** of \$2.4 trillion were up 2%, reflecting:
 - net inflows in Payments and Securities Services, and
 - growth in balances in new and existing client accounts in AWM,partially offset by
 - a decline in CCB primarily driven by a decrease in balances in existing accounts due to migration into higher-yielding investments and increased customer spending.

Refer to Liquidity Risk Management on pages 40-46 for additional information.

Selected capital and other metrics

- **CET1 capital** was \$280 billion, and the Standardized and Advanced CET1 ratios were 15.4% and 15.6%, respectively.
- **SLR** was 6.0%.
- **TBVPS** grew 13%, ending the first quarter of 2025 at \$100.36.
- As of March 31, 2025, the Firm had eligible end-of-period **High Quality Liquid Assets** ("HQLA") of approximately \$881 billion and **unencumbered marketable securities** with a fair value of approximately \$635 billion, resulting in approximately \$1.5 trillion of liquidity sources. Refer to Liquidity Risk Management on pages 40-46 for additional information.

Business segment highlights

Selected business metrics for each of the Firm's lines of business ("LOB") are presented below for the first quarter of 2025.

CCB ROE 31%	<ul style="list-style-type: none"> Average deposits down 2%; client investment assets up 7% Average loans up 1%; Card Services net charge-off rate of 3.58% Debit and credit card sales volume^(a) up 7% Active mobile customers^(b) up 8%
CIB ROE 18%	<ul style="list-style-type: none"> Investment Banking fees up 12%; #1 ranking for Global Investment Banking fees with 9.0% wallet share in 1Q25 Markets revenue up 21%, with Fixed Income Markets up 8% and Equity Markets up 48% Average Banking & Payments loans^(c) down 3%; average client deposits^(d) up 11%
AWM ROE 39%	<ul style="list-style-type: none"> Assets under management ("AUM") of \$4.1 trillion, up 15% Average loans up 5% YoY; average deposits up 7%

(a) Excludes Commercial Card.

(b) Users of all mobile platforms who have logged in within the past 90 days.

(c) On January 1, 2025, \$5.6 billion of loans were realigned from Global Corporate Banking to Fixed Income Markets.

(d) Represents client deposits and other third-party liabilities pertaining to the Payments and Securities Services businesses.

Refer to the Business Segment & Corporate Results on pages 17-31 for a detailed discussion of results by business segment.

Credit provided and capital raised

JPMorganChase continues to support consumers, businesses and communities around the globe. The Firm provided new and renewed credit and raised capital for wholesale and consumer clients during the first three months of 2025, consisting of approximately:

\$840 billion	Total credit provided and capital raised (including loans and commitments)
\$60 billion	Credit for consumers
\$10 billion	Credit for U.S. small businesses
\$760 billion	Credit and capital for corporations and non-U.S. government entities ^(a)
\$10 billion	Credit and capital for nonprofit and U.S. government entities ^(b)

(a) Includes Individuals and Individual Entities primarily consisting of Global Private Bank clients within AWM.

(b) Includes states, municipalities, hospitals and universities.

Outlook

These current expectations are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on the current beliefs and expectations of JPMorganChase's management, speak only as of the date of this Form 10-Q, and are subject to significant risks and uncertainties. Refer to Forward-Looking Statements on page 77 of this Form 10-Q and Part I, Item 1A, Risk Factors on pages 10–37 of the 2024 Form 10-K for a further discussion of certain of those risks and uncertainties and the other factors that could cause JPMorganChase's actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results in 2025 will be in line with the outlook information set forth below, and the Firm does not undertake to update any forward-looking statements.

JPMorganChase's current outlook for full-year 2025 should be viewed against the backdrop of the global and U.S. economies, financial markets activity, the geopolitical environment, the competitive environment, client and customer activity levels, and regulatory and legislative developments in the U.S. and other countries where the Firm does business. Each of these factors will affect the performance of the Firm. The Firm will continue to make appropriate adjustments to its businesses and operations in response to ongoing developments in the business, economic, regulatory and legal environments in which it operates.

Full-year 2025

- Management expects net interest income to be approximately \$94.5 billion and net interest income excluding Markets to be approximately \$90.0 billion, market dependent.
- Management expects adjusted expense to be approximately \$95.0 billion, market dependent.
- Management expects the net charge-off rate in Card Services to be approximately 3.60%.

Net interest income excluding Markets and adjusted expense are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-16.

Business Developments

Regulatory developments

In April 2025, a Texas federal district court granted a joint request by the Consumer Financial Protection Bureau ("CFPB") and trade organizations to vacate the CFPB Late Fee Rule. Also in April 2025, Congress passed a resolution of disapproval overturning the CFPB Overdraft Rule that is expected to be signed into law by the President.

Refer to the Supervision and regulation section on pages 2–7 of JPMorganChase's 2024 Form 10-K for additional information on the CFPB Late Fee Rule and the CFPB Overdraft Rule.

CONSOLIDATED RESULTS OF OPERATIONS

This section provides a comparative discussion of JPMorganChase's Consolidated Results of Operations on a reported basis for the three months ended March 31, 2025 and 2024, unless otherwise specified. Factors that relate primarily to a single business segment or Corporate are discussed in more detail in the results of that segment or Corporate. Refer to pages 72–75 of this Form 10-Q and pages 161–164 of JPMorganChase's 2024 Form 10-K for a discussion of the Critical Accounting Estimates Used by the Firm that affect the Consolidated Results of Operations.

Revenue

(in millions)	Three months ended March 31,		
	2025	2024	Change
Investment banking fees	\$ 2,178	\$ 1,954	11 %
Principal transactions	7,614	6,790	12
Lending- and deposit-related fees	2,132	1,902	12
Asset management fees	4,700	4,146	13
Commissions and other fees	2,033	1,805	13
Investment securities losses	(37)	(366)	90
Mortgage fees and related income	278	275	1
Card income	1,216	1,218	—
Other income ^(a)	1,923	1,128	70
Noninterest revenue	22,037	18,852	17
Net interest income	23,273	23,082	1
Total net revenue	\$ 45,310	\$ 41,934	8 %

(a) Included operating lease income of \$829 million and \$672 million for the three months ended March 31, 2025 and 2024. Refer to Note 5 for additional information.

Quarterly results

Investment banking fees increased, reflecting in CIB:

- higher debt underwriting fees predominantly driven by elevated refinancing activity, particularly in leveraged finance, and
- higher advisory fees predominantly driven by the closing of deals announced in 2024,

partially offset by

- lower equity underwriting fees as challenging market conditions resulted in lower fees.

Refer to CIB segment results on pages 22-26 and Note 5 for additional information.

Principal transactions revenue increased, reflecting in CIB:

- higher Equity Markets revenue, particularly in Equity Derivatives, and
- higher Fixed Income Markets revenue, reflecting higher revenue in Rates, predominantly offset by lower revenue in Currencies & Emerging Markets, and Securitized Products.

Principal transactions revenue in CIB generally has offsets across other revenue lines, including net interest income. The Firm assesses the performance of its Markets business on a total net revenue basis.

Refer to CIB segment results on pages 22-26 and Note 5 for additional information.

Lending- and deposit-related fees increased due to:

- a reduction in client credits applied to deposit-related fees as well as increased volumes resulting in higher cash management fees in Payments, partially offset by
- a decline in the amortization of the fair value discount on certain acquired lending-related commitments associated with First Republic, primarily in AWM, as certain of the commitments have expired.

Refer to CIB and AWM segment results on pages 22-26 and pages 27-29, respectively, and Note 5 for additional information.

Asset management fees increased as a result of net inflows in AWM and higher average market levels in AWM and CCB. Refer to CCB and AWM segment results on pages 19-21 and pages 27-29, respectively, and Note 5 for additional information.

Commissions and other fees increased, largely due to higher brokerage commissions and fees on higher volume, in both CIB and AWM. Refer to CIB and AWM segment results on pages 22-26 and pages 27-29, respectively, and Note 5 for additional information.

Investment securities losses decreased, reflecting lower net losses compared to the prior year, which included sales of securities, primarily U.S. GSE and government agency MBS and U.S. Treasuries, associated with repositioning the investment securities portfolio in Treasury and CIO. Refer to Corporate results on pages 30-31 and Note 9 for additional information.

Mortgage fees and related income: refer to Note 14 for additional information.

Card income was flat, reflecting, primarily in CCB, lower net interchange income and an increase in amortization related to new account origination costs, offset by higher annual fees. Refer to CCB segment results on pages 19-21 and Note 5 for additional information.

Other income increased, reflecting:

- a \$588 million First Republic-related gain in Corporate, and
- higher auto operating lease income due to an increase in origination volume in CCB.

Refer to CCB and Corporate results on pages 19-21 and pages 30-31, respectively, for additional information; and Note 5 for additional information on the First Republic-related gain.

Net interest income increased driven by higher Markets net interest income, higher revolving balances in Card Services, the impact of securities activity including from prior quarters, and higher wholesale deposit balances. These factors were predominantly offset by the impact of lower rates and deposit margin compression, as well as lower average deposit balances in CCB.

The Firm's average interest-earning assets were \$3.7 trillion, up \$223 billion, and the yield was 5.19%, down 36 basis points ("bps"). The net yield on these assets, on an FTE basis, was 2.58%, a decrease of 13 bps. The net yield excluding Markets was 3.80%, down 3 bps.

Refer to the Consolidated average balance sheets, interest and rates schedule on page 171 for additional information. Net yield excluding Markets is a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-16 for an additional discussion of net yield excluding Markets.

Provision for credit losses

(in millions)	Three months ended March 31,		
	2025	2024	Change
Consumer, excluding credit card	\$ 204	\$ 77	165 %
Credit card	2,382	1,837	30
Total consumer	2,586	1,914	35
Wholesale	736	(56)	NM
Investment securities	(17)	26	NM
Total provision for credit losses	\$ 3,305	\$ 1,884	75 %

Quarterly results

The **provision for credit losses** was \$3.3 billion. Net charge-offs were \$2.3 billion and the net addition to the allowance for credit losses was \$973 million.

Net charge-offs included \$2.1 billion in **consumer**, predominantly driven by Card Services, reflecting the seasoning of vintages originated in recent years, and \$187 million in **wholesale**.

The net addition to the allowance for credit losses was largely driven by changes in the weighted-average macroeconomic outlook, and consisted of:

- \$549 million in **wholesale**, which also reflected changes in credit quality on client-specific exposures and the impact of new lending-related commitments, and
- \$441 million in **consumer**, predominantly driven by Card Services.

In the prior year, the provision was \$1.9 billion, net charge-offs were \$2.0 billion and the net reduction in the allowance for credit losses was \$72 million.

Refer to CCB, CIB and AWM segment and Corporate results on pages 19-21, pages 22-26, pages 27-29, and pages 30-31, respectively; Allowance for Credit Losses on pages 61-63; Critical Accounting Estimates Used by the Firm on pages 72-75; and Notes 11 and 12 for additional information on the credit portfolio and the allowance for credit losses.

Noninterest expense

(in millions)	Three months ended March 31,		
	2025	2024	Change
Compensation expense	\$ 14,093	\$ 13,118	7 %
Noncompensation expense:			
Occupancy	1,302	1,211	8
Technology, communications and equipment ^(a)	2,578	2,421	6
Professional and outside services	2,839	2,548	11
Marketing	1,304	1,160	12
Other expense	1,481	2,299	(36)
Total noncompensation expense	9,504	9,639	(1)
Total noninterest expense	\$ 23,597	\$ 22,757	4 %
Certain components of other expense^(b)			
FDIC-related expense	\$ (11)	\$ 973	
Operating losses	386	299	

(a) Includes depreciation expense associated with auto operating lease assets. Refer to Note 16 for additional information.

(b) Refer to Note 5 for additional information.

Quarterly results

Compensation expense increased driven by:

- higher revenue-related compensation, particularly in CIB and AWM, and
- growth in the number of employees across the LOBs and Corporate, primarily in front office and technology.

Noncompensation expense decreased as a result of:

- lower FDIC-related expense, which included the impact of an FDIC special assessment accrual release of \$323 million in Corporate, compared with an accrual increase of \$725 million in the prior year, and
- the absence of restructuring and integration costs associated with First Republic recorded in the prior year,

offset by

- higher legal expense, particularly in CIB, largely due to the absence of a legal benefit from the prior year,
- higher brokerage expense in CIB and higher distribution fees in AWM,
- higher investments in marketing, predominantly in CCB, as well as in technology across the Firm; and to a lesser extent,
- higher occupancy expense, higher operating losses, largely in CCB, and higher depreciation expense on higher auto lease assets.

Refer to Note 5 for additional information on other expense.

Income tax expense

(in millions)	Three months ended March 31,		
	2025	2024	Change
Income before income tax expense	\$18,408	\$ 17,293	6 %
Income tax expense	3,765	3,874	(3)
Effective tax rate	20.5 %	22.4 %	

Quarterly results

The **effective tax rate** decreased predominantly driven by higher benefits related to the vesting of employee share-based awards in the current period as a result of the Firm's higher share price, and changes in the mix of income and expenses subject to U.S. federal, state and local taxes.

CONSOLIDATED BALANCE SHEETS AND CASH FLOWS ANALYSIS

Consolidated balance sheets analysis

The following is a discussion of the significant changes between March 31, 2025 and December 31, 2024. Refer to pages 161–164 for a discussion of the Critical Accounting Estimates Used by the Firm that affect the Consolidated Balance Sheets.

Selected Consolidated balance sheets data

(in millions)	March 31, 2025	December 31, 2024	Change
Assets			
Cash and due from banks	\$ 22,066	\$ 23,372	(6)%
Deposits with banks	403,837	445,945	(9)
Federal funds sold and securities purchased under resale agreements	429,506	295,001	46
Securities borrowed	238,702	219,546	9
Trading assets	875,203	637,784	37
Available-for-sale securities	399,363	406,852	(2)
Held-to-maturity securities	265,084	274,468	(3)
Investment securities, net of allowance for credit losses	664,447	681,320	(2)
Loans	1,355,695	1,347,988	1
Allowance for loan losses	(25,208)	(24,345)	4
Loans, net of allowance for loan losses	1,330,487	1,323,643	1
Accrued interest and accounts receivable	117,845	101,223	16
Premises and equipment	32,811	32,223	2
Goodwill, MSRs and other intangible assets	64,525	64,560	—
Other assets	178,427	178,197	—
Total assets	\$ 4,357,856	\$ 4,002,814	9 %

Cash and due from banks and deposits with banks decreased driven by Markets activities in CIB and cash deployment in Treasury and CIO, largely offset by the impact of higher deposits.

Federal funds sold and securities purchased under resale agreements increased driven by Markets, reflecting higher client-driven market-making activities and the impact of lower levels of netting, as well as when compared with seasonally lower levels at year-end.

Securities borrowed increased driven by Markets, reflecting higher client-driven activities.

Refer to Note 10 for additional information on securities purchased under resale agreements and securities borrowed.

Trading assets increased due to higher levels of debt and equity instruments in Markets related to client-driven market-making activities, as well as when compared with seasonally lower levels at year-end. Refer to Notes 2 and 4 for additional information.

Investment securities decreased due to lower available-for-sale ("AFS") and held-to-maturity ("HTM") securities driven by maturities and paydowns. Refer to Corporate results on pages 30–31, Investment Portfolio Risk Management on page 64, and Notes 2 and 9 for additional information.

Loans increased, reflecting:

- higher wholesale loans, predominantly in Markets, associated with higher client demand, largely offset by
- a reduction in Card Services due to the impact of seasonality, and
- a decline in Home Lending as loan sales and paydowns outpaced originations.

The **allowance for loan losses** increased, reflecting a net addition to the allowance for loan losses of \$863 million, largely driven by changes in the weighted-average macroeconomic outlook, and consisted of:

- \$451 million in **consumer**, predominantly driven by Card Services, and
- \$412 million in **wholesale**, which also reflected changes in credit quality on client-specific exposures.

There was also a \$125 million net addition to the allowance for lending-related commitments recognized in other liabilities on the Consolidated balance sheets.

Refer to Consolidated Results of Operations and Credit and Investment Risk Management on pages 9–11 and pages 47–64, respectively, Critical Accounting Estimates Used by the Firm on pages 72–75, and

Notes 2, 3, 11 and 12 for additional information on loans and the total allowance for credit losses.

Accrued interest and accounts receivable increased primarily due to higher client receivables related to client-driven activities in CIB.

Goodwill, MSRs and other intangible assets: refer to Note 14 for additional information.

Selected Consolidated balance sheets data (continued)

(in millions)	March 31, 2025	December 31, 2024	Change
Liabilities			
Deposits	\$ 2,495,877	\$ 2,406,032	4 %
Federal funds purchased and securities loaned or sold under repurchase agreements	533,046	296,835	80
Short-term borrowings	64,980	52,893	23
Trading liabilities	187,103	192,883	(3)
Accounts payable and other liabilities	293,538	280,672	5
Beneficial interests issued by consolidated variable interest entities ("VIEs")	24,668	27,323	(10)
Long-term debt	407,224	401,418	1
Total liabilities	4,006,436	3,658,056	10
Stockholders' equity	351,420	344,758	2
Total liabilities and stockholders' equity	\$ 4,357,856	\$ 4,002,814	9 %

Deposits increased, reflecting the impact of:

- an increase in CIB predominantly due to net inflows related to client-driven activities in Securities Services and Payments,
- an increase in CCB primarily driven by new accounts, and
- an increase in AWM as a result of growth in balances in new and existing client accounts, reflecting the impact of higher-yielding product offerings, predominantly offset by continued migration into other investments.

Federal funds purchased and securities loaned or sold under repurchase agreements increased driven by Markets, reflecting higher client-driven market-making activities, higher secured financing of trading assets and the impact of lower levels of netting, as well as when compared with seasonally lower levels at year-end.

Short-term borrowings increased driven by higher financing requirements in Markets.

Refer to Liquidity Risk Management on pages 40-46 for additional information on deposits, federal funds purchased and securities loaned or sold under repurchase agreements, and short-term borrowings; and Notes 2 and 15 for deposits; and Note 10 for federal funds purchased and securities loaned or sold under repurchase agreements.

Trading liabilities: refer to Notes 2 and 4 for additional information.

Accounts payable and other liabilities increased due to higher client payables related to client-driven activities in CIB.

Beneficial interests issued by consolidated VIEs decreased largely driven by lower levels of outstanding commercial paper as a result of a decrease in loan balances in the Firm-administered multi-seller conduits in CIB. Refer to Liquidity Risk Management on pages 40-46 and Notes 13 and 22 for additional information, specifically Firm-sponsored VIEs and loan securitization trusts.

Long-term debt: refer to Liquidity Risk Management on pages 40-46 for additional information.

Stockholders' equity increased reflecting net income and lower unrealized losses in AOCI, predominantly driven by the impact of lower interest rates on cash flow hedges and on the AFS portfolio in Treasury and CIO, largely offset by the impact of capital actions, including net repurchases of common shares and common and preferred stock dividend payments. Refer to Consolidated statements of changes in stockholders' equity on page 81, Capital Actions on page 37, and Note 19 for additional information.

Consolidated cash flows analysis

The following is a discussion of cash flow activities during the three months ended March 31, 2025 and 2024.

(in millions)	Three months ended March 31,	
	2025	2024
Net cash provided by/(used in)		
Operating activities	\$ (251,839)	\$ (154,158)
Investing activities	(118,076)	(43,379)
Financing activities	318,059	141,168
Effect of exchange rate changes on cash	8,442	(5,666)
Net decrease in cash and due from banks and deposits with banks	\$ (43,414)	\$ (62,035)

Operating activities

- In 2025, cash used resulted from higher trading assets, higher securities borrowed, higher accrued interest and accounts receivable and lower trading liabilities.
- In 2024, cash used resulted from higher trading assets and higher accrued interest and accounts receivable, partially offset by higher trading liabilities, accounts payable and other liabilities, and lower other assets.

Investing activities

- In 2025, cash used resulted from higher securities purchased under resale agreements, partially offset by net proceeds from investment securities.
- In 2024, cash used resulted from higher securities purchased under resale agreements, partially offset by proceeds from sales and securitizations of loans held-for-investment.

Financing activities

- In 2025, cash provided reflected higher securities loaned or sold under repurchase agreements, higher deposits, and net proceeds from long- and short-term borrowings.
- In 2024, cash provided reflected higher securities loaned or sold under repurchase agreements, higher deposits, net proceeds from long- and short-term borrowings and proceeds from the issuance of preferred stock.
- For both periods, cash was used for repurchases of common stock and cash dividends on common and preferred stock.

* * *

Refer to Consolidated Balance Sheets Analysis on pages 12-13, Capital Risk Management on pages 33-39, and Liquidity Risk Management on pages 40-46, and the Consolidated Statements of Cash Flows on page 82 of this Form 10-Q, and pages 108-115 of JPMorganChase's 2024 Form 10-K for a further discussion of the activities affecting the Firm's cash flows.

EXPLANATION AND RECONCILIATION OF THE FIRM'S USE OF NON-GAAP FINANCIAL MEASURES

The Firm prepares its Consolidated Financial Statements in accordance with U.S. GAAP and this presentation is referred to as “reported” basis; these financial statements appear on pages 78–82.

In addition to analyzing the Firm’s results on a reported basis, the Firm also reviews and uses certain non-GAAP financial measures at the Firmwide and segment level. These non-GAAP measures include:

- Firmwide “managed” basis results, including the overhead ratio, which include certain reclassifications to present total net revenue from investments that receive tax credits and tax-exempt securities on a basis comparable to taxable investments and securities (“FTE” basis). The corresponding income tax impact related to tax-exempt items is recorded within income tax

expense. These adjustments have no impact on net income as reported by the Firm as a whole or by the LOBs;

- Pre-provision profit, which represents total net revenue less total noninterest expense;
- Net interest income, net yield, and noninterest revenue excluding Markets;
- TCE, ROTCE, and TBVPS; and
- Adjusted expense, which represents noninterest expense excluding Firmwide legal expense.

Refer to Explanation and Reconciliation of the Firm’s Use of Non-GAAP Financial Measures on pages 67–69 of JPMorganChase’s 2024 Form 10-K for a further discussion of management’s use of non-GAAP financial measures.

The following summary table provides a reconciliation from the Firm’s reported U.S. GAAP results to managed basis.

(in millions, except ratios)	Three months ended March 31,					
	2025			2024		
	Reported	Fully taxable-equivalent adjustments ^(a)	Managed basis	Reported	Fully taxable-equivalent adjustments ^(a)	Managed basis

Noninterest revenue excluding Markets	\$ 13,761	\$ 11,515	20
Memo: Total Markets net revenue^(b)	\$ 9,663	\$ 8,013	21

(a) Interest includes the effect of related hedges. Taxable-equivalent amounts are used where applicable. Refer to Note 5 of the Firm's 2024 Form 10-K for additional information on hedge accounting.

(b) Refer to page 25 for further information on Markets.

(c) Includes the market-related revenues of the former Commercial Banking business segment. Prior-period amounts have been revised to conform with the current presentation. Refer to Business Segment & Corporate Results on page 70 of the Firm's 2024 Form 10-K for additional information.

The following summary table provides a reconciliation from the Firm's common stockholders' equity to TCE.

(in millions, except per share and ratio data)	Period-end		Average	
	Mar 31, 2025	Dec 31, 2024	Three months ended March 31,	
			2025	2024
Common stockholders' equity	\$ 331,375	\$ 324,708	\$ 324,345	\$ 300,277
Less: Goodwill	52,621	52,565	52,581	52,614
Less: Other intangible assets	2,777	2,874	2,830	3,157
Add: Certain deferred tax liabilities ^(a)	2,928	2,943	2,938	2,988
Tangible common equity	\$ 278,905	\$ 272,212	\$ 271,872	\$ 247,494
Return on tangible common equity	NA	NA	21 %	21 %
Tangible book value per share	\$ 100.36	\$ 97.30	NA	NA

(a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating TCE.

BUSINESS SEGMENT & CORPORATE RESULTS

The Firm is managed on an LOB basis. There are three reportable business segments – Consumer & Community Banking, Commercial & Investment Bank, and Asset & Wealth Management – with the remaining activities in Corporate.

The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is evaluated by the Firm's Operating Committee, whose members act collectively as the Firm's chief operating decision maker. Segment results are presented on a managed basis. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-16 for a definition of managed basis.

Description of business segment reporting methodology

Results of the reportable business segments are intended to present each segment as if it were a stand-alone business. The management reporting process that derives business segment results includes the allocation of certain income and expense items. The Firm periodically assesses the assumptions, methodologies and reporting classifications used for segment reporting, and therefore further refinements may be implemented in future periods. The Firm also assesses the level of capital required for each LOB on at least an annual basis. The Firm's LOBs also provide various business metrics which are utilized by the Firm and its investors and analysts in assessing performance.

Revenue sharing

When business segments or businesses within each segment join efforts to sell products and services to the Firm's clients and customers, the participating businesses may agree to share revenue from those transactions. Revenue is generally recognized in the segment responsible for the related product or service, with allocations to the other segments or businesses involved in the transaction. The segment and business results reflect these revenue-sharing agreements.

Funds transfer pricing

Funds transfer pricing ("FTP") is the process by which the Firm allocates interest income and expense to the LOBs and Other Corporate and transfers the primary interest rate risk and liquidity risk to Treasury and CIO.

The funds transfer pricing process considers the interest rate and liquidity risk characteristics of assets and liabilities and off-balance sheet products. Periodically, the methodology and assumptions utilized in the FTP process are adjusted to reflect economic conditions and other factors, which may impact the allocation of net interest income to the segments. Effective in the fourth quarter of 2024, the Firm updated its FTP with respect to consumer deposits, which resulted in an increase in the funding benefit reflected within CCB's net interest income that is fully offset in Corporate, with no effect on the Firm's net interest income.

As a result of lower average interest rates in the current period, the cost of funding for assets and the funding benefit earned for liabilities generally decreased compared with the prior year.

Foreign exchange risk

Foreign exchange risk is transferred from the LOBs and Other Corporate to Treasury and CIO for certain revenues and expenses. Treasury and CIO manages these risks centrally and reports the impact of foreign exchange rate movements related to the transferred risk in its results. Refer to Market Risk Management on pages 65-70 for additional information.

Capital allocation

The amount of capital assigned to each LOB and Corporate is referred to as equity. At least annually, the assumptions, judgments and methodologies used to allocate capital are reassessed and, as a result, the capital allocated to the LOBs and Corporate may change. Refer to Line of business and Corporate equity on page 36, and page 104 of JPMorganChase's 2024 Form 10-K for additional information on capital allocation.

Refer to Business Segment & Corporate Results – Description of business segment reporting methodology on pages 70–90 and Note 32 of JPMorganChase's 2024 Form 10-K for a further discussion of those methodologies.

Segment & Corporate Results – Managed basis

The following tables summarize the Firm’s results by business segments and Corporate for the periods indicated.

Three months ended March 31, (in millions, except ratios)	Consumer & Community Banking			Commercial & Investment Bank			Asset & Wealth Management		
	2025	2024	Change	2025	2024	Change	2025	2024	Change

Mortgage fees and related income	\$ 263	\$ 274	(4)%
Financial ratios			
Return on equity	31 %	35 %	
Overhead ratio	54	53	

(a) Primarily includes operating lease income and commissions and other fees. Operating lease income was \$824 million and \$665 million for the three months ended March 31, 2025 and 2024, respectively.

(b) Included depreciation expense on leased assets of \$499 million and \$427 million for the three months ended March 31, 2025 and 2024, respectively.

(c) Included MSR risk management results of \$9 million and \$(1) million for the three months ended March 31, 2025 and 2024, respectively.

Quarterly results

Net income was \$4.4 billion, down 8%.

Net revenue was \$18.3 billion, up 4%.

Net interest income was \$14.1 billion, up 3%, driven by:

- higher Card Services NII, predominantly driven by higher revolving balances,

partially offset by

- lower NII in Banking & Wealth Management ("BWM"), driven by lower average deposit balances.

Noninterest revenue was \$4.2 billion, up 6%, driven by:

- higher auto operating lease income as a result of higher lease origination volume, and
- higher asset management fees reflecting higher average market levels,

partially offset by

- in BWM, the absence of other service fees associated with First Republic recorded in the prior year, as well as
- lower card income, driven by lower net interchange and an increase in amortization related to new account origination costs, largely offset by higher annual fees. The net interchange decreased as the impact of increased debit and credit card sales volume was more than offset by higher rewards costs and partner payments.

Refer to Note 5 for additional information on card income, asset management fees and commissions and other fees; and Critical Accounting Estimates on pages 72–75 for additional information on the credit card rewards liability.

Noninterest expense was \$9.9 billion, up 6%, reflecting:

- higher noncompensation expense, predominantly driven by marketing, higher auto lease depreciation on higher auto lease assets, and higher operating losses, as well as
- higher compensation expense, predominantly driven by an increase in the number of employees, primarily bankers and advisors and employees in technology, as well as higher revenue-related compensation for advisors.

The provision for credit losses was \$2.6 billion. Net charge-offs were \$2.2 billion, up \$275 million, predominantly in Card Services, reflecting the seasoning of vintages originated in recent years. The net addition to the allowance for credit losses of \$475 million was predominantly driven by changes in the weighted-average macroeconomic outlook.

In the prior year, the provision was \$1.9 billion, net charge-offs were \$1.9 billion and the net addition to the allowance for credit losses was \$34 million.

Refer to Credit and Investment Risk Management on pages 47-64 and Allowance for Credit Losses on pages 61-63 for a further discussion of the credit portfolios and the allowance for credit losses.

- (a) Excludes mortgage loans past due and insured by U.S. government agencies, which are primarily 90 or more days past due. These loans have been excluded based upon the government guarantee. At March 31, 2025 and 2024, mortgage loans 90 or more days past due and insured by U.S. government agencies were \$81 million and \$107 million, respectively. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance.
- (b) At March 31, 2025 and 2024, excluded mortgage loans insured by U.S. government agencies of \$114 million and \$147 million, respectively, that are 30 or more days past due. These amounts have been excluded based upon the government guarantee.

(a) Refer to Line of Business Metrics on page 179 for a description of each of the client coverage segments.

Quarterly results

Net income was \$6.9 billion, up 5%.

Net revenue was \$19.7 billion, up 12%.

Banking & Payments revenue was \$8.8 billion, up 4%.

- Investment Banking revenue was \$2.3 billion, up 2%. Investment Banking fees were up 12%, driven by higher debt underwriting and advisory fees, partially offset by lower equity underwriting fees. The Firm ranked #1 for Global Investment Banking fees, according to Dealogic.
 - Advisory fees were \$694 million, up 16%, predominantly driven by the closing of deals announced in 2024.
 - Debt underwriting fees were \$1.2 billion, up 16%, predominantly driven by elevated refinancing activity, particularly in leveraged finance.
 - Equity underwriting fees were \$324 million, down 9%, as challenging market conditions resulted in lower fees.
- Payments revenue was \$4.6 billion, up 2%. Excluding the net impact of equity investments, revenue was up 3%, driven by higher average deposits and fee growth, predominantly offset by deposit margin compression.
- Lending revenue was \$1.9 billion, up 11%, driven by lower fair value losses on credit protection purchased against certain retained loans and lending-related commitments, partially offset by lower loan balances.

Markets & Securities Services revenue was \$10.9 billion, up 19%. Markets revenue was \$9.7 billion, up 21%.

- Equity Markets revenue was \$3.8 billion, up 48%, driven by higher revenue across products, with a particularly strong performance in Equity Derivatives amid elevated levels of volatility.
- Fixed Income Markets revenue was \$5.8 billion, up 8%, predominantly driven by higher revenue in Rates and Commodities.
- Securities Services revenue was \$1.3 billion, up 7%, driven by fee growth on higher client activity and market levels as well as higher average deposits, partially offset by deposit margin compression.
- Credit Adjustments & Other was a loss of \$20 million, compared with a loss of \$15 million in the prior year.

Noninterest expense was \$9.8 billion, up 13%, predominantly driven by higher compensation, including higher revenue-related compensation and an increase in the number of employees, as well as higher brokerage expense and higher legal expense, largely due to the absence of a legal benefit from the prior year.

The provision for credit losses was \$705 million, predominantly driven by changes in credit quality on client-specific exposures, changes in the weighted-average macroeconomic outlook, and the impact of new lending-related commitments. The net addition to the allowance for credit losses was \$528 million and net charge-offs were \$177 million.

In the prior year, the provision was \$1 million, net charge-offs were \$69 million and the net reduction in the allowance for credit losses was \$68 million.

Refer to Credit and Investment Risk Management on pages 47-64, Allowance for Credit Losses on pages 61-63, and Critical Accounting Estimates on pages 72-75 for a further discussion of the credit portfolios and the allowance for credit losses.

Global investment banking fees^(e)									
	#	1	9.0 %	#	1	9.0 %	#	1	9.2 %

(a) Source: Dealogic as of April 1, 2025. Reflects the ranking of revenue wallet and market share.

(b) Global M&A excludes any withdrawn transactions. U.S. M&A revenue wallet represents wallet from client parents based in the U.S.

(c) Global equity and equity-related ranking includes rights offerings and Chinese A-Shares.

(d) Long-term debt rankings include investment-grade, high-yield, supranationals, sovereigns, agencies, covered bonds, asset-backed securities (“ABS”) and mortgage-backed securities (“MBS”); and exclude money market, short-term debt and U.S. municipal securities.

(e) Global investment banking fees exclude money market, short-term debt and shelf securities.

Markets revenue

The following table summarizes selected income statement data for the Markets businesses. Markets includes both Fixed Income Markets and Equity Markets. Markets revenue consists of principal transactions, fees, commissions and other income, as well as net interest income. The Firm assesses its Markets business performance on a total revenue basis, as offsets generally occur across revenue line items. For example, securities that generate net interest income may be risk-managed by derivatives

that are reflected at fair value in principal transactions revenue. Refer to Notes 5 and 6 for a description of the composition of these income statement line items. Refer to Markets revenue on page 81 of JPMorganChase’s 2024 Form 10-K for further information.

For the periods presented below, the primary source of principal transactions revenue was the amount recognized upon executing new transactions.

(in millions)	Three months ended March 31,			Three months ended March 31,		
	2025			2024

(a) Includes the amortization of the fair value discount on certain acquired lending-related commitments associated with First Republic. The discount, which is deferred in other liabilities and recognized on a straight-line basis over the commitment period, continues to decline as commitments expire.

Quarterly results

Net income was \$1.6 billion, up 23%.

Net revenue was \$5.7 billion, up 12%. Net interest income was \$1.7 billion, up 9%. Noninterest revenue was \$4.0 billion, up 14%.

Revenue from Asset Management was \$2.7 billion, up 15%, predominantly driven by higher asset management fees reflecting strong net inflows and higher average market levels.

Revenue from Global Private Bank was \$3.1 billion, up 10%, driven by:

- higher noninterest revenue as a result of:
 - higher management fees due to strong net inflows and higher brokerage fees, partially offset by
 - a decline in the amortization of the fair value discount on certain acquired lending-related commitments associated with First Republic that have expired, and
- higher net interest income, largely driven by higher average deposits.

Noninterest expense was \$3.7 billion, up 7%, largely driven by:

- higher compensation, primarily revenue-related compensation and continued growth in private banking advisor teams, as well as
- higher distribution fees.

The provision for credit losses was a net benefit of \$10 million, compared with a net benefit of \$57 million in the prior year.

Refer to Note 5 for additional information on lending related fees.

Refer to Credit and Investment Risk Management on pages 47-64 and Allowance for Credit Losses on pages 61-63 for further discussions of the credit portfolios and the allowance for credit losses.

(a) Included tax-equivalent adjustments, predominantly driven by tax-exempt income from municipal bonds, of \$36 million and \$49 million for the three months ended March 31, 2025 and 2024, respectively.

(b) Predominantly relates to the Firm's international consumer initiatives.

(c) Included an FDIC special assessment accrual release of \$323 million for the three months ended March 31, 2025, and an accrual increase of \$725 million for the three months ended March 31, 2024.

(d) In the first quarter of 2025, 768 employees were transferred from the LOBs to Corporate as a result of the centralization of certain functions.

Quarterly results

Net income was \$1.7 billion, compared with \$676 million in the prior year.

Net revenue was \$2.3 billion, compared with \$2.2 billion in the prior year.

Net interest income was \$1.7 billion, down 33%, driven by the impact of lower rates and changes in the FTP for consumer deposits, partially offset by the impact of securities activity including from prior quarters.

Refer to Business Segment & Corporate Results on page 17 for additional information on FTP.

Noninterest revenue was \$653 million, compared with a loss of \$275 million in the prior year, driven by:

- a \$588 million First Republic-related gain, and
- lower net investment securities losses compared to the prior year, which included sales of securities, primarily U.S. GSE and government agency MBS and U.S. Treasuries, associated with repositioning the investment securities portfolio in Treasury and CIO.

Refer to Note 5 for additional information on the First Republic-related gain, and Note 9 and Note 12 for additional information on the investment securities portfolio and the allowance for credit losses.

Noninterest expense was \$185 million, down 86%, predominantly driven by:

- the impact of an FDIC special assessment accrual release of \$323 million, compared with an accrual increase of \$725 million in the prior year, and
- the absence of restructuring and integration costs associated with First Republic recorded in the prior year.

The provision for credit losses was a net benefit of \$19 million. In the prior year, the provision was \$27 million.

The current period income tax expense was predominantly driven by changes in the level and mix of income and expenses subject to U.S. federal, state and local taxes.

Other Corporate includes the Firm's international consumer initiatives, which primarily consists of Chase U.K., Nutmeg, and an ownership stake in C6 Bank.

Treasury and CIO overview

At March 31, 2025, the average credit rating of the Treasury and CIO investment securities comprising the portfolio in the table below was AA+ (based upon external ratings where available and, where not available, based primarily upon internal risk ratings). Refer to Note 9 for further information on the Firm's investment securities portfolio and internal risk ratings.

Refer to Liquidity Risk Management on pages 40-46 for further information on liquidity and funding risk. Refer to Market Risk Management on pages 65-70 for information on interest rate and foreign exchange risks.

(a) As of March 31, 2025 and 2024, the allowance for credit losses on investment securities was \$85 million and \$120 million, respectively.

FIRMWIDE RISK MANAGEMENT

Risk is an inherent part of JPMorganChase’s business activities. When the Firm extends a consumer or wholesale loan, advises customers and clients on their investment decisions, makes markets in securities, or offers other products or services, the Firm takes on some degree of risk. The Firm’s overall objective is to manage its business, and the associated risks, in a manner that balances serving the interests of its clients, customers and investors, and protecting the safety and soundness of the Firm.

The Firm believes that effective risk management requires, among other things:

- Acceptance of responsibility, including identification and escalation of risks by all individuals within the Firm;
- Ownership of risk identification, assessment, data and management within each of the LOBs and Corporate; and
- A Firmwide risk governance and oversight structure.

The Firm follows a disciplined and balanced compensation framework with strong internal governance and independent oversight by the Board of Directors (the “Board”). The impact of risk and control issues is carefully considered in the Firm’s performance evaluation and incentive compensation processes.

Risk governance framework

The Firm’s risk governance framework involves understanding drivers of risks, types of risks, and impacts of risks.

Refer to pages 91–95 of JPMorganChase’s 2024 Form 10-K for a further discussion of Firmwide risk management governance and oversight.

Risk governance and oversight functions

The following sections of this Form 10-Q and the 2024 Form 10-K discuss the risk governance and oversight functions in place to oversee the risks inherent in the Firm’s business activities.

CAPITAL RISK MANAGEMENT

Capital risk is the risk that the Firm has an insufficient level or composition of capital to support the Firm's business activities and associated risks during normal economic environments and under stressed conditions.

Refer to pages 97–107 of JPMorganChase's 2024 Form 10-K, Note 21 of this Form 10-Q and the Firm's Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for a further discussion of the Firm's capital risk management.

Basel III Overview

The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. Bank Holding Companies ("BHCs") and banks, including the Firm and JPMorgan Chase Bank, N.A. The minimum amount of regulatory capital that must be held by BHCs and banks is determined by calculating risk-weighted assets ("RWA"), which are on-balance sheet assets and off-balance sheet exposures, weighted according to risk. Under the rules currently in effect, two comprehensive approaches are prescribed for calculating RWA: a standardized approach ("Basel III Standardized"), and an advanced approach ("Basel III Advanced").

For each of these risk-based capital ratios, the capital adequacy of the Firm is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements.

As of March 31, 2025, the Firm's Basel III Standardized risk-based ratios continue to be more binding than the Basel III Advanced risk-based ratios.

Additionally, Basel III requires that Advanced Approaches banking organizations, including the Firm, calculate their SLRs.

Refer to page 36 of this Form 10-Q and page 104 of JPMorganChase's 2024 Form 10-K for additional information on SLR.

Key Regulatory Developments

In April 2025, the Federal Reserve proposed changes to the calculation of the Stress Capital Buffer ("SCB") for large bank holding companies, including the Firm. The proposal aims to reduce SCB volatility by using the average of supervisory stress results from the previous two annual stress tests to calculate the SCB. The proposal would also modify the annual effective date of the SCB from October 1 to January 1 and make targeted changes to reporting requirements to streamline data collection. The proposal would be effective January 1, 2026.

Refer to page 99 of JPMorganChase's 2024 Form 10-K for information on other Key Regulatory Developments.

Selected capital and RWA data

The following tables present the Firm's risk-based capital metrics under both the Basel III Standardized and Advanced approaches and leverage-based capital metrics. Refer to Capital Risk Management on pages 97–107 of JPMorganChase's 2024 Form 10-K for a further discussion of these capital metrics. Refer to Note 21 for JPMorgan Chase Bank, N.A.'s risk-based and leverage-based capital metrics.

CET1 capital ratio	15.4 %	15.7 %	12.3 %	15.6 %	15.8 %	11.5 %
Tier 1 capital ratio	16.5	16.8	13.8	16.6	16.9	13.0
Total capital ratio	18.2	18.5	15.8	17.6	17.9	15.0

(a) As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. For the period ended December 31, 2024, CET1 capital reflected a \$720 million benefit. Refer to Note 21 for additional information.

(b) Represents minimum requirements and regulatory buffers applicable to the Firm. Refer to Note 21 for additional information.

(c) Includes the impacts of certain assets associated with First Republic to which the Standardized approach has been applied as permitted by the transition provisions in the U.S. capital rules. Refer to page 102 and Note 34 of JPMorganChase's 2024 Form 10-K for additional information on First Republic.

Three months ended (in millions, except ratios)	March 31, 2025	December 31, 2024	Capital ratio requirements ^(c)
Leverage-based capital metrics:^(a)			
Adjusted average assets ^(b)	\$ 4,180,147	\$ 4,070,499	
Tier 1 leverage ratio	7.2 %	7.2 %	4.0 %
Total leverage exposure	\$ 4,953,480	\$ 4,837,568	
SLR	6.0 %	6.1 %	5.0 %

(a) As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The capital metrics for the period ended December 31, 2024 reflected the CECL capital transition provisions. Refer to Note 21 for additional information.

(b) Adjusted average assets, for purposes of calculating the leverage ratios, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, and other intangible assets.

(c) Represents minimum requirements and regulatory buffers applicable to the Firm. Refer to Note 21 for additional information.

Capital components

The following table presents reconciliations of total stockholders' equity to Basel III CET1 capital, Tier 1 capital and Total capital as of March 31, 2025 and December 31, 2024.

(in millions)	March 31, 2025	December 31, 2024
Total stockholders' equity	\$ 351,420	\$ 344,758
Less: Preferred stock	20,045	20,050
Common stockholders' equity	331,375	324,708
Add:		
Certain deferred tax liabilities ^(a)	2,928	2,943
Other CET1 capital adjustments ^(b)	2,180	4,499
Less:		
Goodwill ^(c)	53,915	53,763
Other intangible assets	2,777	2,874
Standardized/Advanced CET1 capital	\$ 279,791	\$ 275,513
Add: Preferred stock	20,045	20,050
Less: Other Tier 1 adjustments	704	682
Standardized/Advanced Tier 1 capital	\$ 299,132	\$ 294,881
Long-term debt and other instruments qualifying as Tier 2 capital	\$ 10,473	\$ 10,312
Qualifying allowance for credit losses ^(d)	21,537	20,992
Other	(609)	(596)
Standardized Tier 2 capital	\$ 31,401	\$ 30,708
Standardized Total capital	\$ 330,533	\$ 325,589
Adjustment in qualifying allowance for credit losses for Advanced Tier 2 capital ^{(e)(f)}	(14,004)	(13,691)
Advanced Tier 2 capital	\$ 17,397	\$ 17,017
Advanced Total capital	\$ 316,529	\$ 311,898

- (a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating CET1 capital.
- (b) As of March 31, 2025 and December 31, 2024, included a net benefit associated with cash flow hedges and debit valuation adjustments ("DVA") related to structured notes recorded in AOCI of \$3.3 billion and \$5.2 billion. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The period ended December 31, 2024 included benefit from the CECL capital transition provisions of \$720 million.
- (c) Goodwill deducted from capital includes goodwill associated with equity method investments in nonconsolidated financial institutions based on regulatory requirements. Refer to page 64 for additional information on principal investment risk.
- (d) Represents the allowance for credit losses eligible for inclusion in Tier 2 capital up to 1.25% of credit risk RWA. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The period ended December 31, 2024 included the impact of the CECL capital transition provision with any excess deducted from RWA. Refer to Note 21 for additional information on the CECL capital transition.
- (e) Represents an adjustment to qualifying allowance for credit losses for the excess of eligible credit reserves over expected credit losses up to 0.6% of credit risk RWA. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The period ended December 31, 2024 included the impact of the CECL capital transition provision with any excess deducted from RWA.
- (f) As of March 31, 2025 and December 31, 2024, included an incremental \$527 million and \$541 million allowance for credit losses, respectively, on certain assets associated with First Republic to which the Standardized approach has been applied, as permitted by the transition provisions in the U.S. capital rules.

Capital rollforward

The following table presents the changes in Basel III CET1 capital, Tier 1 capital and Tier 2 capital for the three months ended March 31, 2025.

Three months ended March 31, (in millions)	2025
Standardized/Advanced CET1 capital at December 31, 2024	\$ 275,513
Net income applicable to common equity	14,388
Dividends declared on common stock	(3,938)
Net purchase of treasury stock	(6,440)
Changes in additional paid-in capital	(688)
Changes related to AOCI applicable to capital:	
Unrealized gains/(losses) on investment securities	953
Translation adjustments, net of hedges ^(a)	489
Fair value hedges	28
Defined benefit pension and other postretirement employee benefit ("OPEB") plans	(16)
Changes related to other CET1 capital adjustments ^(b)	(498)
Change in Standardized/Advanced CET1 capital	4,278
Standardized/Advanced CET1 capital at March 31, 2025	\$ 279,791
Standardized/Advanced Tier 1 capital at December 31, 2024	\$ 294,881
Change in CET1 capital ^(b)	4,278
Net redemptions of noncumulative perpetual preferred stock	(5)
Other	(22)
Change in Standardized/Advanced Tier 1 capital	4,251
Standardized/Advanced Tier 1 capital at March 31, 2025	\$ 299,132
Standardized Tier 2 capital at December 31, 2024	\$ 30,708
Change in long-term debt and other instruments qualifying as Tier 2	161
Change in qualifying allowance for credit losses ^(b)	545
Other	(13)
Change in Standardized Tier 2 capital	693
Standardized Tier 2 capital at March 31, 2025	\$ 31,401
Standardized Total capital at March 31, 2025	\$330,533
Advanced Tier 2 capital at December 31, 2024	\$ 17,017
Change in long-term debt and other instruments qualifying as Tier 2	161
Change in qualifying allowance for credit losses ^{(b)(c)}	232
Other	(13)
Change in Advanced Tier 2 capital	380
Advanced Tier 2 capital at March 31, 2025	\$ 17,397
Advanced Total capital at March 31, 2025	\$ 316,529

- (a) Includes foreign currency translation adjustments and the impact of related derivatives.
- (b) Reflects the final phase out of the CECL benefit. Refer to Note 21 for additional information on the CECL capital transition.
- (c) As of March 31, 2025 and December 31, 2024, included an incremental \$527 million and \$541 million allowance for credit losses, respectively, on certain assets associated with First Republic to which the Standardized approach has been applied, as permitted by the transition provisions in the U.S. capital rules.

RWA rollforward

The following table presents changes in the components of RWA under Basel III Standardized and Advanced approaches for the three months ended March 31, 2025. The amounts in the rollforward categories are estimates, based on the predominant driver of the change.

Three months ended March 31, 2025 (in millions)	Standardized			Advanced			
	Credit risk RWA ^(c)	Market risk RWA	Total RWA	Credit risk RWA ^{(c)(d)}	Market risk RWA	Operational risk RWA	Total RWA
December 31, 2024	\$ 1,672,763	\$ 84,697	\$ 1,757,460	\$ 1,218,005	\$ 85,132	\$ 437,292	\$ 1,740,429
Model & data changes ^(a)	(17)	—	(17)	(17)	—	—	(17)
Movement in portfolio levels ^(b)	42,854	14,748	57,602	38,996	14,832	4,815	58,643
Changes in RWA	42,837	14,748	57,585	38,979	14,832	4,815	58,626
March 31, 2025	\$ 1,715,600	\$ 99,445	\$ 1,815,045	\$ 1,256,984	\$ 99,964	\$ 442,107	\$ 1,799,055

- (a) Model & data changes refer to material movements in levels of RWA as a result of revised methodologies and/or treatment per regulatory guidance (exclusive of rule changes).
- (b) Movement in portfolio levels (inclusive of rule changes) refers to: for Credit risk RWA, changes in book size, changes in composition and credit quality, market movements, and deductions for excess eligible allowances for credit losses not eligible for inclusion in Tier 2 capital; for Market risk RWA, changes in position and market movements; and for Operational risk RWA, updates to cumulative losses and macroeconomic model inputs.
- (c) As of March 31, 2025 and December 31, 2024, the Basel III Standardized Credit risk RWA included wholesale and retail off balance-sheet RWA of \$213.0 billion and \$208.0 billion, respectively; and the Basel III Advanced Credit risk RWA included wholesale and retail off balance-sheet RWA of \$200.7 billion and \$192.1 billion, respectively.
- (d) As of March 31, 2025 and December 31, 2024, Credit risk RWA reflected approximately \$42.1 billion and \$43.3 billion, respectively, of RWA calculated under the Standardized approach for certain assets associated with First Republic as permitted by the transition provisions in the U.S. capital rules.

Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for further information on Credit risk RWA, Market risk RWA and Operational risk RWA.

Supplementary leverage ratio

Refer to Supplementary Leverage Ratio on page 104 of JPMorganChase's 2024 Form 10-K for additional information.

The following table presents the components of the Firm's SLR.

Three months ended (in millions, except ratio)	March 31, 2025	December 31, 2024
Tier 1 capital	\$ 299,132	\$ 294,881
Total average assets	4,235,314	4,125,167
Less: Regulatory capital adjustments ^(a)	55,167	54,668
Total adjusted average assets ^(b)	4,180,147	4,070,499
Add: Off-balance sheet exposures ^(c)	773,333	767,069
Total leverage exposure	\$ 4,953,480	\$ 4,837,568
SLR	6.0 %	6.1 %

- (a) For purposes of calculating the SLR, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, other intangible assets. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The period ended December 31, 2024 included adjustments for the CECL capital transition provisions. Refer to Note 21 for additional information on the CECL capital transition.
- (b) Adjusted average assets used for the calculation of Tier 1 leverage ratio.
- (c) Off-balance sheet exposures are calculated as the average of the three month-end spot balances on applicable regulatory exposures during the reporting quarter. Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports for additional information.

Line of business and Corporate equity

Each LOB and Corporate is allocated capital by taking into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. Refer to Line of business and Corporate equity on page 104 of JPMorganChase's 2024 Form 10-K for additional information on capital allocation.

The following table presents the capital allocated to each LOB and Corporate.

(in billions)	March 31, 2025	December 31, 2024
Consumer & Community Banking	\$ 56.0	\$ 54.5
Commercial & Investment Bank	149.5	132.0
Asset & Wealth Management	16.0	15.5
Corporate	109.9	122.7
Total common stockholders' equity	\$ 331.4	\$ 324.7

Capital actions

Common stock dividends

The Firm's common stock dividends are planned as part of the Capital Management governance framework in line with the Firm's capital management objectives.

On March 18, 2025, the Firm announced that its Board of Directors had declared a quarterly common stock dividend of \$1.40 per share, payable on April 30, 2025, an increase from the prior dividend of \$1.25 per share. The Firm's dividends are subject to approval by the Board of Directors on a quarterly basis.

Common stock

On June 28, 2024, the Firm announced that its Board of Directors had authorized a new \$30 billion common share repurchase program, effective July 1, 2024. Through June 30, 2024, the Firm was authorized to purchase up to \$30 billion of common shares under its previously-approved common share repurchase program that was announced on April 13, 2022.

The following table sets forth the Firm's repurchases of common stock for the three months ended March 31, 2025 and 2024.

(in millions)	Three months ended March 31,	
	2025	2024
Total number of shares of common stock repurchased	30.0	15.9
Aggregate purchase price of common stock repurchases ^(a)	\$ 7,563	\$ 2,849

(a) Excludes excise tax and commissions.

The Board of Directors' authorization to repurchase common shares is utilized at management's discretion. The \$30 billion common share repurchase program approved by the Board of Directors does not establish specific price targets or timetables. Management determines the amount and timing of common share repurchases based on various factors, including market conditions; legal and regulatory considerations affecting the amount and timing of repurchase activity; the Firm's capital position (taking into account goodwill and intangibles); organic capital generation; current and proposed future capital requirements; and other investment opportunities. The amount of common shares that the Firm repurchases in any period may be substantially more or less than the amounts estimated or actually repurchased in prior periods, reflecting the dynamic nature of the decision-making process. The Firm's common share repurchases may be suspended by management at any time.

Refer to Capital actions on page 105 of JPMorganChase's 2024 Form 10-K for additional information.

Refer to Part II, Item 2: Unregistered Sales of Equity Securities and Use of Proceeds and Part II, Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities on pages 181–182 of this Form 10-Q and page 39 of JPMorganChase's 2024 Form 10-K, respectively, for additional information regarding repurchases of the Firm's equity securities.

Preferred stock

Preferred stock dividends were \$255 million and \$397 million for the three months ended March 31, 2025 and 2024, respectively.

During the three months ended March 31, 2025, the Firm issued and redeemed certain series of non-cumulative preferred stock. Refer to Note 17 of this Form 10-Q and Note 21 of JPMorganChase's 2024 Form 10-K for additional information on the Firm's preferred stock, including the issuance and redemption of preferred stock.

Subordinated Debt

Refer to Long-term funding on page 45 of this Form 10-Q and Note 20 of JPMorganChase's 2024 Form 10-K for additional information on the Firm's subordinated debt.

Capital planning and stress testing

Comprehensive Capital Analysis and Review

On April 7, 2025, the Firm submitted its 2025 Capital Plan to the Federal Reserve under the Federal Reserve's Comprehensive Capital Analysis and Review ("CCAR") process. The Firm anticipates that the Federal Reserve will disclose summary information regarding the Firm's stress test results by June 30, 2025. Following the Federal Reserve's disclosure, the Firm expects to disclose its indicative SCB requirement, which will become effective October 1, 2025 under the current rules. The Firm's SCB is currently 3.3%.

Refer to page 33 for Key Regulatory Developments related to the SCB requirement.

Refer to Capital planning and stress testing on pages 97–98 of JPMorganChase's 2024 Form 10-K for additional information on CCAR.

Other capital requirements

Total Loss-Absorbing Capacity

The Federal Reserve's total loss-absorbing capacity ("TLAC") rule requires the U.S. Global Systemically Important Bank ("GSIB") top-tier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt ("eligible LTD").

The following table presents the eligible external TLAC and eligible LTD amounts, as well as a representation of these amounts as a percentage of the Firm's total RWA and total leverage exposure. As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The period ended December 31, 2024 included the impact of the CECL capital transition provisions.

(in billions, except ratio)	March 31, 2025		December 31, 2024	
	External TLAC	LTD	External TLAC	LTD
Total eligible amount	\$ 558.3	\$ 243.7	\$ 546.6	\$ 236.8
% of RWA	30.8 %	13.4 %	31.1 %	13.5 %
Regulatory requirements	23.0	10.5	23.0	10.5
Surplus/(shortfall)	\$ 140.8	\$ 53.1	\$ 142.3	\$ 52.3
% of total leverage exposure	11.3 %	4.9 %	11.3 %	4.9 %
Regulatory requirements	9.5	4.5	9.5	4.5
Surplus/(shortfall)	\$ 87.7	\$ 20.8	\$ 87.0	\$ 19.2

Refer to Liquidity Risk Management on pages 40-46 for further information on long-term debt issued by the Parent Company.

Refer to Part I, Item 1A: Risk Factors on pages 10–37 of JPMorganChase's 2024 Form 10-K for information on the financial consequences to holders of the Firm's debt and equity securities in a resolution scenario.

Refer to other capital requirements on page 106 of JPMorganChase's 2024 Form 10-K for additional information on TLAC.

U.S. broker-dealer regulatory capital

J.P. Morgan Securities

JPMorganChase's principal U.S. broker-dealer subsidiary is J.P. Morgan Securities. J.P. Morgan Securities is subject to the regulatory capital requirements of Rule 15c3-1 under the Securities Exchange Act of 1934 (the "Net Capital Rule"). J.P. Morgan Securities is also registered as a futures commission merchant and is subject to regulatory capital requirements, including those imposed by the SEC, the Commodity Futures Trading Commission ("CFTC"), the Financial Industry Regulatory Authority ("FINRA") and the National Futures Association ("NFA").

The following table presents J.P. Morgan Securities' net capital.

March 31, 2025		
(in millions)	Actual	Minimum
Net Capital	\$ 25,642	\$ 6,591

Non-U.S. subsidiary regulatory capital

J.P. Morgan Securities plc

J.P. Morgan Securities plc is a wholly-owned subsidiary of JPMorgan Chase Bank, N.A. and has authority to engage in banking, investment banking and broker-dealer activities. J.P. Morgan Securities plc is jointly regulated in the U.K. by the Prudential Regulation Authority ("PRA") and the Financial Conduct Authority ("FCA"). J.P. Morgan Securities plc is subject to the Capital Requirements Regulation ("CRR"), as adopted and amended in the U.K., and the capital rules in the PRA Rulebook. These requirements collectively represent the U.K.'s implementation of the Basel III standards. The PRA announced that it intends to delay the U.K.'s implementation of the final Basel III standards until January 1, 2027, with a three-year transitional period for certain aspects.

The Bank of England requires that U.K. banks, including U.K. regulated subsidiaries of overseas groups, maintain minimum requirements for own funds and eligible liabilities ("MREL"). As of March 31, 2025, J.P. Morgan Securities plc was compliant with its MREL requirements.

The following table presents J.P. Morgan Securities plc's risk-based and leverage-based capital metrics.

March 31, 2025			Regulatory Minimum ratios ^(a)
(in millions, except ratios)	Estimated		
Total capital	\$ 55,229		
CET1 capital ratio	16.0 %		4.5 %
Tier 1 capital ratio	20.5		6.0
Total capital ratio	24.7		8.0
Tier 1 leverage ratio	6.1		3.3 ^(b)

(a) Represents minimum Pillar 1 requirements specified by the PRA. J.P. Morgan Securities plc's capital ratios as of March 31, 2025 exceeded the minimum requirements, including the additional capital requirements specified by the PRA.

(b) At least 75% of the Tier 1 leverage ratio minimum must be met with CET1 capital.

J.P. Morgan SE

JPMSE is a wholly-owned subsidiary of JPMorgan Chase Bank, N.A. and has authority to engage in banking, investment banking and markets activities. JPMSE is regulated by the European Central Bank ("ECB"), the German Financial Supervisory Authority and the German Central Bank, as well as the local regulators in each of the countries in which it operates, and it is subject to EU capital requirements under Basel III. JPMSE is subject to the EU implementation of the final Basel III standards. Those standards became effective beginning on January 1, 2025, with the exception of market risk aspects for which the effective date is January 1, 2026.

JPMSE is required by the EU Single Resolution Board to maintain MREL. As of March 31, 2025, JPMSE was compliant with its MREL requirements.

The following table presents JPMSE's risk-based and leverage-based capital metrics.

March 31, 2025			Regulatory Minimum ratios ^(a)
(in millions, except ratios)	Estimated		
Total capital	\$ 48,680		
CET1 capital ratio	18.3 %		4.5 %
Tier 1 capital ratio	18.3		6.0
Total capital ratio	34.5		8.0
Tier 1 leverage ratio	5.5		3.0

(a) Represents minimum Pillar 1 requirements specified by the EU CRR. J.P. Morgan SE's capital and leverage ratios as of March 31, 2025 exceeded the minimum requirements, including the additional capital requirements specified by EU regulators.

Refer to U.S. broker-dealer and Non-U.S. subsidiary regulatory capital on page 107 of JPMorganChase's 2024 Form 10-K for further information.

LIQUIDITY RISK MANAGEMENT

Liquidity risk is the risk that the Firm will be unable to meet its cash and collateral needs as they arise or that it does not have the appropriate amount, composition and tenor of funding and liquidity to support its assets and liabilities. For a further discussion of the Firm's liquidity risk management, refer to pages 108–115 of JPMorganChase's 2024 Form 10-K and to the Firm's U.S. LCR Disclosure reports, which are available on the Firm's website.

LCR and HQLA

The LCR rule requires that the Firm and JPMorgan Chase Bank, N.A. maintain an amount of eligible HQLA that is sufficient to meet their respective estimated total net cash outflows over a prospective 30 calendar-day period of significant stress.

Under the LCR rule, the amount of eligible HQLA held by JPMorgan Chase Bank, N.A. that is in excess of its stand-alone 100% minimum LCR requirement, and that is not transferable to non-bank affiliates, must be excluded from the Firm's reported eligible HQLA. The LCR for both the Firm and JPMorgan Chase Bank, N.A. is required to be a minimum of 100%.

The following table summarizes the Firm and JPMorgan Chase Bank, N.A.'s average LCR for the three months ended March 31, 2025, December 31, 2024 and March 31, 2024 based on the Firm's interpretation of the LCR framework.

Average amount (in millions)	Three months ended		
	March 31, 2025	December 31, 2024	March 31, 2024
JPMorgan Chase & Co.:			
HQLA			
Eligible cash ^(a)	\$ 389,423	\$ 396,123	\$ 483,292
Eligible securities ^{(b)(c)}	475,194	464,877	313,818
Total HQLA^(d)	\$ 864,617	\$ 861,000	\$ 797,110
Net cash outflows	\$ 767,151	\$ 763,648	\$ 711,611
LCR	113 %	113 %	112 %
Net excess eligible HQLA^(d)	\$ 97,466	\$ 97,352	\$ 85,499
JPMorgan Chase Bank N.A.:			
LCR	124 %	124 %	129 %
Net excess eligible HQLA	\$ 194,652	\$ 193,682	\$ 221,104

- (a) Represents cash on deposit at central banks, primarily the Federal Reserve Banks.
- (b) Eligible HQLA securities may be reported in securities borrowed or purchased under resale agreements, trading assets, or investment securities on the Firm's Consolidated balance sheets. For purposes of calculating the LCR, HQLA securities are included at fair value, which may differ from the accounting treatment under U.S. GAAP.
- (c) Predominantly U.S. Treasuries, U.S. GSE and government agency MBS, and sovereign bonds net of regulatory haircuts under the LCR rule.
- (d) Excludes average excess eligible HQLA at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates.

The Firm's average LCR increased during the three months ended March 31, 2025, compared with the three months ended March 31, 2024, primarily driven by dividend payments from JPMorgan Chase Bank, N.A. to the Parent Company, predominantly offset by common stock repurchases and common stock dividends paid.

JPMorgan Chase Bank, N.A.'s average LCR for the three months ended March 31, 2025 decreased compared with the three months ended March 31, 2024, due to dividend payments to the Parent Company and loan growth, largely offset by activities in CIB Markets, an increase in deposits and a reduction in non-HQLA securities.

Each of the Firm and JPMorgan Chase Bank, N.A.'s average LCR may fluctuate from period to period due to changes in their respective eligible HQLA and estimated net cash outflows as a result of ongoing business activity and from the impacts of Federal Reserve actions as well as other factors.

Refer to page 109 of JPMorganChase's 2024 Form 10-K and the Firm's U.S. LCR Disclosure reports for additional information on HQLA and net cash outflows.

Internal stress testing

The Firm conducts internal liquidity stress testing to monitor liquidity positions at the Firm and its material legal entities under a variety of adverse scenarios, including scenarios analyzed as part of the Firm's resolution and recovery planning. Internal stress tests are produced on a daily basis, and other stress tests are performed in response to specific market events or concerns. Results of stress tests are considered in the formulation of the Firm's funding plan and assessment of its liquidity position.

The Firm manages liquidity at the Parent Company, the Intermediate Holding Company ("IHC"), and operating subsidiaries at levels sufficient to comply with liquidity risk tolerances and minimum liquidity requirements, and to manage through periods of stress when access to normal funding sources may be disrupted.

Liquidity sources

In addition to the assets reported in the Firm's eligible HQLA discussed above, the Firm had unencumbered marketable securities, such as equity and debt securities, that the Firm believes would be available to raise liquidity. This includes excess eligible HQLA securities at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates. The fair value of these securities was approximately \$635 billion and \$594 billion as of March 31, 2025 and December 31, 2024, respectively, although the amount of liquidity that could be raised at any particular time would be dependent on prevailing market conditions. The increase compared to December 31, 2024, was driven by an increase in unencumbered CIB trading assets, largely offset by a decrease in excess eligible HQLA securities at JPMorgan Chase Bank, N.A.

The Firm had approximately \$1.5 trillion and \$1.4 trillion of available cash and securities as of March 31, 2025 and December 31, 2024, respectively. For each respective period, the amount was comprised of eligible end-of-period HQLA, excluding the impact of regulatory haircuts, of approximately \$881 billion and \$834 billion, and unencumbered marketable securities with a fair value of approximately \$635 billion and \$594 billion.

The Firm also had available borrowing capacity at the Federal Home Loan Banks ("FHLBs") and the discount window at the Federal Reserve Banks as a result of collateral pledged by the Firm to such banks of approximately \$408 billion and \$413 billion as of March 31, 2025 and December 31, 2024, respectively. This borrowing capacity excludes the benefit of cash and securities reported in the Firm's eligible HQLA or other unencumbered securities that are currently pledged at the Federal Reserve Banks discount window and other central banks. Although available, the Firm does not view this borrowing capacity at the Federal Reserve Banks discount window and the other central banks as a primary source of liquidity.

NSFR

The net stable funding ratio ("NSFR") is a liquidity requirement for large banking organizations that is intended to measure the adequacy of "available" stable funding that is sufficient to meet their "required" amounts of stable funding over a one-year horizon.

For the three months ended March 31, 2025, both the Firm and JPMorgan Chase Bank, N.A. were compliant with the 100% minimum NSFR requirement, based on the Firm's interpretation of the final NSFR rule. Refer to the Firm's U.S. NSFR Disclosure report for the quarterly periods ended December 31, 2024 and September 30, 2024 on the Firm's website for additional information.

Funding

Sources of funds

Management believes that the Firm's unsecured and secured funding capacity is sufficient to meet its on- and off-balance sheet obligations, which includes both short- and long-term cash requirements.

The Firm funds its global balance sheet through diverse sources of funding including deposits, secured and unsecured funding in the capital markets and stockholders' equity. Deposits are the primary funding source for JPMorgan Chase Bank, N.A. Additionally, JPMorgan Chase Bank, N.A. may access funding through short- or long-term secured borrowings, the issuance of unsecured long-term debt, or from

borrowings from the IHC. The Firm's non-bank subsidiaries are primarily funded from long-term unsecured borrowings and short-term secured borrowings which are primarily securities loaned or sold under repurchase agreements. Excess funding is invested by Treasury and CIO in the Firm's investment securities portfolio or deployed in cash or other short-term liquid investments based on their interest rate and liquidity risk characteristics.

Refer to Note 22 for additional information on off-balance sheet obligations.

Deposits

The table below summarizes, by LOB and Corporate, the period-end deposit balances as of March 31, 2025 and December 31, 2024, and the average deposit balances for the three months ended March 31, 2025 and 2024, respectively.

(in millions)	March 31, 2025	December 31, 2024	Average	
			Three months ended March 31,	
			2025	2024
Consumer & Community Banking	\$ 1,080,138	\$ 1,056,652	\$ 1,053,677	\$ 1,079,243
Commercial & Investment Bank	1,140,456	1,073,512	1,106,158	1,045,788
Asset & Wealth Management	250,219	248,287	244,107	227,723
Corporate	25,064	27,581	26,363	22,032
Total Firm	\$ 2,495,877	\$ 2,406,032	\$ 2,430,305	\$ 2,374,786

The Firm believes that deposits provide a stable source of funding and reduce the Firm's reliance on the wholesale funding markets. A significant portion of the Firm's deposits are consumer deposits and wholesale operating deposits, which are both considered to be stable sources of liquidity. Wholesale operating deposits are generally considered to be stable sources of liquidity because they are generated from customers that maintain operating service relationships with the Firm.

The Firm believes that average deposit balances are generally more representative of deposit trends than period-end deposit balances. However, during periods of market disruption, average deposit trends may be impacted.

Average deposits increased for the three months ended March 31, 2025 compared to the three months ended March 31, 2024, reflecting the net impact of:

- an increase in CIB due to net inflows related to client-driven activities in Payments and Securities Services, partially offset by net maturities of structured notes in Markets,
- an increase in AWM as a result of growth in balances in new and existing client accounts, reflecting the impact of higher-yielding product offerings, and

- a decline in CCB primarily driven by a decrease in balances in existing accounts due to migration into higher-yielding investments and increased customer spending, predominantly offset by new accounts.

Period-end deposits increased from December 31, 2024, reflecting the impact of:

- an increase in CIB predominantly due to net inflows related to client-driven activities in Securities Services and Payments,
- an increase in CCB primarily driven by new accounts, and
- an increase in AWM as a result of growth in balances in new and existing client accounts, reflecting the impact of higher-yielding product offerings, predominantly offset by continued migration into other investments.

Refer to the Firm's Consolidated Balance Sheets Analysis and the Business Segment & Corporate Results on pages 12-13 and pages 17-31, respectively, for further information on deposit and liability balance trends. Refer to Note 3 for further information on structured notes.

Certain deposits are covered by insurance protection that provides additional funding stability and results in a benefit to the LCR. Deposit insurance protection may

be available to depositors in the countries in which the deposits are placed. For example, the FDIC provides deposit insurance protection for deposits placed in a U.S. depository institution. Refer to pages 111–112 of JPMorganChase's 2024 Form 10-K for additional information on the Firm's total uninsured deposits.

The table below presents an estimate of uninsured U.S. and non-U.S. time deposits, and their remaining maturities. The Firm's estimates of its uninsured U.S. time deposits are based on data that the Firm calculates periodically under applicable FDIC regulations. For purposes of this presentation, all non-U.S. time deposits are deemed to be uninsured.

(in millions)	March 31, 2025		December 31, 2024

(a) Primarily consists of short-term securities loaned or sold under agreements to repurchase.

(b) Included in beneficial interests issued by consolidated variable interest entities on the Firm's Consolidated balance sheets.

(c) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company.

(d) Reflects the Purchase Money Note associated with the First Republic acquisition. Refer to Note 34 of JPMorganChase's 2024 Form 10-K for additional information.

(e) Includes long-term structured notes that are secured.

(f) Refer to Capital Risk Management on pages 33-39 and Consolidated statements of changes in stockholders' equity on page 81 of this Form 10-Q, and Note 21 and Note 22 of JPMorganChase's 2024 Form 10-K for additional information on preferred stock and common stockholders' equity.

Short-term funding

The Firm's primary source of short-term secured funding is securities sold under agreements to repurchase. These instruments are secured predominantly by high-quality securities collateral, including government-issued debt and U.S. GSE and government agency MBS. Securities sold under agreements to repurchase increased at March 31, 2025, compared with December 31, 2024, driven by Markets, reflecting higher client-driven market-making activities, higher secured financing of trading assets and the impact of lower levels of netting, as well as when compared with seasonally lower levels at year-end.

The increase in secured other borrowed funds at March 31, 2025 from December 31, 2024 and for the average three months ended March 31, 2025, compared to the prior year period, was due to higher financing requirements in Markets.

The balances associated with securities loaned or sold under agreements to repurchase fluctuate over time due to investment and financing activities of clients, the Firm's demand for financing, the ongoing management of the mix of the Firm's liabilities, including its secured and unsecured financing (for both the investment securities and market-making portfolios), and other market and portfolio factors.

The Firm's primary sources of short-term unsecured funding consist of issuances of wholesale commercial paper and other borrowed funds.

The decrease in commercial paper at March 31, 2025 from December 31, 2024 was primarily driven by strategic short-term liquidity management.

The increase in unsecured other borrowed funds for the average three months ended March 31, 2025, compared to the prior year period, was primarily driven by net issuances of structured notes in Markets.

Long-term funding

Long-term funding provides an additional source of stable funding and liquidity for the Firm. The Firm's long-term funding plan is driven primarily by expected client activity, liquidity considerations and regulatory requirements, including TLAC. Long-term funding objectives include maintaining diversification, maximizing market access and optimizing funding costs. The Firm evaluates various funding markets, tenors and currencies in creating its optimal long-term funding plan.

Unsecured funding and issuance

The significant majority of the Firm's total outstanding long-term debt has been issued by the Parent Company to provide flexibility in support of the funding needs of both bank and non-bank subsidiaries. The Parent Company advances substantially all net funding proceeds to its subsidiary, the IHC. The IHC does not issue debt to external counterparties. The increase in structured notes for the average three months ended March 31, 2025, compared to the prior year period, was primarily driven by net issuances of structured notes in Markets due to client demand.

The following table summarizes long-term unsecured issuance and maturities or redemptions for the three months ended March 31, 2025 and 2024. Refer to Liquidity Risk Management on pages 108–115 and Note 20 of JPMorganChase's 2024 Form 10-K for additional information on the IHC and long-term debt.

Long-term unsecured funding

	Three months ended March 31,			
	2025	2024	2025	2024
(Notional in millions)	Parent Company		Subsidiaries

Maturities/ redemptions				
Senior notes	\$ 8,525	\$ 7,168	\$ 65	\$ 65
Subordinated debt	—	13	—	—
Structured notes	371	217	13,440	11,506
Total long-term unsecured funding – maturities/ redemptions	\$ 8,896	\$ 7,398	\$ 13,505	\$ 11,571

(a) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company.

Secured funding and issuance

The Firm can also raise secured long-term funding through securitization of consumer credit card loans and FHLB advances. The following table summarizes the securitization issuance, the FHLB advances and their respective maturities or redemptions, as applicable for the three months ended March 31, 2025 and 2024, respectively.

Long-term secured funding

	Three months ended March 31,			
	2025	2024	2025	2024
(in millions)	Issuance		Maturities/ Redemptions	
Credit card securitization	\$ —	\$2,348	\$ —	\$ —
FHLB advances	—	—	5,941	2,047
Other long-term secured funding ^(a)	134	554	111	237
Total long-term secured funding	\$ 134	\$2,902	\$6,052	\$2,284

(a) Includes long-term structured notes that are secured.

The Firm's wholesale businesses also securitize loans for client-driven transactions; those client-driven loan securitizations are not considered to be a source of funding for the Firm and are not included in the table above. Refer to Note 14 of JPMorganChase's 2024 Form 10-K for a further description of client-driven loan securitizations.

Credit ratings

The cost and availability of financing are influenced by credit ratings. Reductions in these ratings could have an adverse effect on the Firm's access to liquidity sources, increase the cost of funds, trigger additional collateral or funding requirements and decrease the number of investors and counterparties willing to lend to the Firm. The nature and magnitude of the impact of ratings downgrades depends on numerous contractual and behavioral factors, which the Firm

believes are incorporated in its liquidity risk and stress testing metrics. The Firm believes that it maintains sufficient liquidity to withstand a potential decrease in funding capacity due to ratings downgrades.

Additionally, the Firm's funding requirements for VIEs and other third-party commitments may be adversely affected by a decline in credit ratings. Refer to Notes 4 and 13 for additional information.

The credit ratings of the Parent Company and certain of its principal subsidiaries as of March 31, 2025 were as follows:

March 31, 2025	JPMorgan Chase & Co.			JPMorgan Chase Bank, N.A.			J.P. Morgan Securities LLC J.P. Morgan Securities plc J.P. Morgan SE ^(a)		
	Long-term issuer	Short-term issuer	Outlook	Long-term issuer	Short-term issuer	Outlook	Long-term issuer	Short-term issuer	Outlook
Moody's Investors Service	A1	P-1	Positive	Aa2	P-1	Developing ^(a)	Aa3	P-1	Positive
Standard & Poor's	A	A-1	Stable	AA-	A-1+	Stable	AA-	A-1+	Stable
Fitch Ratings	AA-	F1+	Stable	AA	F1+	Stable	AA	F1+	Stable

(a) The Moody's outlook of developing for JPMorgan Chase Bank, N.A. reflects its view with respect to possible support from the U.S. government, and its outlook of negative with an "(m)" modifier for J.P. Morgan SE reflects a negative outlook for long-term bank deposits and a positive outlook for the long-term issuer rating.

Refer to page 115 of JPMorganChase's 2024 Form 10-K for a discussion of the factors that could affect the credit ratings of the Parent Company and the above subsidiaries.

CREDIT AND INVESTMENT RISK MANAGEMENT

Credit and investment risk is the risk associated with the default or change in credit profile of a client, counterparty or customer; or loss of principal or a reduction in expected returns on investments, including consumer credit risk, wholesale credit risk, and investment portfolio risk. Refer to Consumer Credit Portfolio, Wholesale Credit Portfolio and Allowance for Credit Losses on pages 49-63 for a further discussion of Credit Risk.

Refer to page 64 for a further discussion of Investment Portfolio Risk. Refer to Credit and Investment Risk Management on pages 117-140 of JPMorganChase's 2024 Form 10-K for a further discussion of the Firm's Credit and Investment Risk Management framework.

CREDIT PORTFOLIO

Credit risk is the risk associated with the default or change in credit profile of a client, counterparty or customer.

In the following tables, total loans include loans retained (i.e., held-for-investment); loans held-for-sale; and certain loans accounted for at fair value. The following tables do not include loans which the Firm accounts for at fair value and classifies as trading assets; refer to Notes 2 and 3 for further information regarding these loans. Refer to Notes 11, 22 and 4 for additional information on the Firm's loans, lending-related commitments and derivative receivables.

Refer to Note 9 for information regarding the credit risk inherent in the Firm's investment securities portfolio; and refer to Note 10 for information regarding credit risk inherent in the securities financing portfolio. Refer to Consumer Credit Portfolio on pages 49-51 and Note 11 for further discussions of the consumer credit environment, consumer loans and nonperforming exposure. Refer to Wholesale Credit Portfolio on pages 52-60 and Note 11 for further discussions of the wholesale credit environment, wholesale loans and nonperforming exposure.

Liquid securities and other cash collateral held against derivatives	(27,290)	(28,160)	NA	NA

- (a) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets.
- (b) Represents the net notional amount of protection purchased and sold through credit derivatives and credit-related notes used to manage credit exposures.
- (c) Excludes mortgage loans past due and insured by U.S. government agencies, which are primarily 90 or more days past due. These loans have been excluded based upon the government guarantee. At March 31, 2025 and December 31, 2024, mortgage loans 90 or more days past due and insured by U.S. government agencies were \$117 million and \$121 million, respectively. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance.

The following table provides information about the Firm's net charge-offs and recoveries.

(in millions, except ratios)	Three months ended March 31,	
	2025	2024
Net charge-offs	\$ 2,332	\$ 1,956
Average retained loans	1,285,401	1,263,258
Net charge-off rates	0.74 %	0.62 %

CONSUMER CREDIT PORTFOLIO

The Firm's retained consumer portfolio consists primarily of loans and lending-related commitments for residential real estate, credit card, and scored auto and business banking. The consumer credit portfolio also includes loans at fair value, predominantly in residential real estate. The Firm's focus is on serving primarily the prime segment of the consumer credit market. For further information on consumer loans, as well as the Firm's nonaccrual and charge-off accounting policies, refer to Note 11 of this Form 10-Q and Consumer Credit Portfolio on pages 120–125 and Note 12 of JPMorganChase's 2024 Form 10-K. Refer to Note 22 of this Form 10-Q and Note 28 of JPMorganChase's 2024 Form 10-K for further information on lending-related commitments.

The following tables present consumer credit-related information with respect to the scored credit portfolios held in CCB, AWM, CIB and Corporate.

Total consumer - retained	\$ 2,145	\$ 1,870	\$ 598,816	\$ 598,670	1.45 %	1.26 %

(a) Includes scored mortgage and home equity loans held in CCB and AWM.

(b) At March 31, 2025 and December 31, 2024, excluded operating lease assets of \$14.6 billion and \$12.8 billion, respectively. These operating lease assets are included in other assets on the Firm's Consolidated balance sheets. Refer to Note 16 for further information.

(c) Includes scored auto and business banking loans, and overdrafts.

(d) Includes scored mortgage loans held in CCB and CIB, and other consumer unsecured loans in CIB.

(e) Credit card, home equity and certain business banking lending-related commitments represent the total available lines of credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit would be used at the same time. Refer to Note 22 for further information.

(f) Includes billed interest and fees.

(g) Also includes commercial card lending-related commitments primarily in CIB.

(h) Represents the notional amount of protection obtained through the issuance of credit-related notes that reference certain pools of residential real estate and auto loans in the retained consumer portfolio.

(i) Excludes mortgage loans past due and insured by U.S. government agencies, which are primarily 90 or more days past due. These loans have been excluded based upon the government guarantee. At March 31, 2025 and December 31, 2024, mortgage loans 90 or more days past due and insured by U.S. government agencies were \$117 million and \$121 million, respectively. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status, as permitted by regulatory guidance.

(j) Average consumer loans held-for-sale and loans at fair value were \$18.4 billion and \$15.1 billion for the three months ended March 31, 2025 and 2024, respectively. These amounts were excluded when calculating net charge-off/(recovery) rates.

Consumer, excluding credit card

Portfolio analysis

Loans decreased from December 31, 2024 driven by lower residential real estate loans, including retained and at fair value, largely offset by higher loans at fair value in auto and other.

Residential real estate: The residential real estate portfolio, including loans held-for-sale and loans at fair value, predominantly consists of prime mortgage loans and home equity lines of credit.

Retained loans decreased compared to December 31, 2024, driven by paydowns, net of originations. Net recoveries were higher for the three months ended March 31, 2025 compared to the same period in the prior year, driven by loan sales.

Loans held-for-sale and nonaccrual loans held-for-sale decreased from December 31, 2024, predominantly driven by loan sales.

Loans at fair value decreased compared to December 31, 2024, driven by lower Home Lending loans, as warehouse loan sales outpaced originations, largely offset by an increase in CIB as purchases outpaced sales. Nonaccrual loans at fair value decreased compared to December 31, 2024, predominantly driven by loan sales in CIB.

At March 31, 2025 and December 31, 2024, the carrying value of retained interest-only residential mortgage loans was \$88.7 billion and \$88.9 billion, respectively. These loans have an interest-only payment period generally followed by an adjustable-rate or fixed-rate fully amortizing payment period to maturity and are typically originated as higher-balance loans to higher-income borrowers. The credit performance of this portfolio is comparable to the performance of the broader prime mortgage portfolio.

The carrying value of retained home equity lines of credit outstanding was \$13.9 billion at March 31, 2025, including \$3.7 billion of HELOCs that have recast from interest-only to fully amortizing payments or have been modified, and \$3.5 billion of interest-only balloon HELOCs, which primarily mature after 2030. The Firm manages the risk of HELOCs during their revolving period by reducing or canceling the undrawn line in accordance with the contract or to the extent otherwise permitted by law, including when there has been a demonstrable decline in the creditworthiness of the borrower or significant decrease in the value of the underlying property.

The following table provides a summary of the Firm's residential mortgage portfolio insured and/or guaranteed by U.S. government agencies, predominantly loans held-for-sale and loans at fair value. The Firm monitors its exposure to certain potential unrecoverable claim payments related to government-insured loans and considers this exposure in estimating the allowance for loan losses.

(in millions)	March 31, 2025	December 31, 2024
Current	\$ 517	\$ 462
30-89 days past due	62	72
90 or more days past due	117	121
Total government guaranteed loans	\$ 696	\$ 655

Geographic composition and current estimated loan-to-value ratio of residential real estate loans

Refer to Note 11 for information on the geographic composition and current estimated LTVs of the Firm's residential real estate loans.

Auto and other: The auto and other loan portfolio, including loans at fair value, generally consists of prime-quality scored auto and business banking loans, other consumer unsecured loans, and overdrafts. The portfolio increased when compared to December 31, 2024, predominantly driven by an increase in loans at fair value due to purchases of other consumer unsecured loans in CIB.

Nonperforming assets

The following table presents information as of March 31, 2025 and December 31, 2024, about consumer, excluding credit card, nonperforming assets.

Nonperforming assets^(a)

(in millions)	March 31, 2025	December 31, 2024
Nonaccrual loans		
Residential real estate	\$ 3,510	\$ 3,665
Auto and other	249	261
Total nonaccrual loans	3,759	3,926
Assets acquired in loan satisfactions		
Real estate owned	76	78
Other	40	34
Total assets acquired in loan satisfactions	116	112
Total nonperforming assets	\$ 3,875	\$ 4,038

(a) Excludes mortgage loans past due and insured by U.S. government agencies, which are primarily 90 or more days past due. These loans have been excluded based upon the government guarantee. At March 31, 2025 and December 31, 2024, mortgage loans 90 or more days past due and insured by U.S. government agencies were \$117 million and \$121 million, respectively.

Nonaccrual loans

The following table presents changes in consumer, excluding credit card, nonaccrual loans for the three months ended March 31, 2025 and 2024.

Nonaccrual loan activity

Three months ended March 31, (in millions)	2025	2024
Beginning balance	\$ 3,926	\$ 4,203
Additions	857	763
Reductions:		
Principal payments and other	209	223
Sales	303	183
Charge-offs	168	156
Returned to performing status	276	244
Foreclosures and other liquidations	68	49
Total reductions	1,024	855
Net changes	(167)	(92)
Ending balance	\$ 3,759	\$ 4,111

Refer to Note 11 for further information about the consumer credit portfolio, including information about delinquencies, other credit quality indicators and loans that were in the process of active or suspended foreclosure.

Credit card

Total credit card loans decreased from December 31, 2024 reflecting the impact of seasonality. The March 31, 2025 30+ and 90+ day delinquency rates of 2.21% and 1.16%, respectively, increased compared to the December 31, 2024 30+ and 90+ day delinquency rates of 2.17% and 1.14%, respectively, in line with the Firm's expectations. Net charge-offs increased for the three months ended March 31, 2025 compared to the same period in the prior year reflecting the seasoning of vintages originated in recent years.

Consistent with the Firm's policy, all credit card loans typically remain on accrual status until charged off. However, the Firm's allowance for loan losses includes the estimated uncollectible portion of accrued and billed interest and fee income. Refer to Note 11 for further information about this portfolio, including information about delinquencies.

Geographic and FICO composition of credit card loans

Refer to Note 11 for information on the geographic and FICO composition of the Firm's credit card loans.

WHOLESALE CREDIT PORTFOLIO

In its wholesale businesses, the Firm is exposed to credit risk primarily through its underwriting, lending, market-making, and hedging activities with and for clients and counterparties, as well as through various operating services (such as cash management and clearing activities), securities financing activities and cash placed with banks. A portion of the loans originated or acquired by the Firm's wholesale businesses is generally retained on the balance sheet. The Firm distributes a significant percentage of the loans that it originates into the market as part of its syndicated loan business and to manage portfolio concentrations and credit risk. The wholesale portfolio is actively managed, in part by conducting ongoing, in-depth reviews of client credit quality and transaction structure inclusive of collateral where applicable, and of industry, product and client concentrations. Refer to the industry discussion on pages 54-57 for further information.

The Firm's wholesale credit portfolio includes exposure held in CIB, AWM and Corporate, and risk-rated exposure held in CCB, for which the wholesale methodology is applied when determining the allowance for loan losses.

As of March 31, 2025, loans increased \$18.9 billion, predominantly driven by higher loans in CIB Markets. Lending-related commitments increased \$17.4 billion driven by higher commitments in CIB.

As of March 31, 2025, nonperforming exposure was relatively flat, with increases in Technology, Media & Telecommunications and Consumer & Retail, reflecting downgrades and a new held-for-sale loan, predominantly offset by Real Estate, concentrated in Office, resulting from upgrades and paydowns.

For the three months ended March 31, 2025, wholesale net charge-offs were \$187 million across multiple industries, including Real Estate and Healthcare.

Wholesale credit portfolio

(in millions)	Credit exposure		Nonperforming	
	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024
Loans retained	\$ 704,714	\$ 690,396	\$ 3,895	\$ 3,942
Loans held-for-sale	9,437	6,103	248	5
Loans at fair value	27,022	25,819	716	964
Loans	741,173	722,318	4,859	4,911
Derivative receivables	60,539	60,967	169	145
Receivables from customers ^(a)	49,403	51,929	—	—

Total wholesale credit portfolio	\$1,399,968	\$1,366,681	\$ 6,023	\$ 5,999
Credit derivatives and credit-related notes used in credit portfolio management activities ^(b)	\$ (40,095)	\$ (40,888)	\$ —	\$ —
Liquid securities and other cash collateral held against derivatives	(27,290)	(28,160)	NA	NA

(a) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets.

(b) Represents the net notional amount of protection purchased and sold through credit derivatives and credit-related notes used to manage both performing and nonperforming wholesale credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. Refer to Credit derivatives on page 60 and Note 4 for additional information.

Wholesale credit exposure – maturity and ratings profile

The following tables present the maturity and internal risk ratings profiles of the wholesale credit portfolio as of March 31, 2025 and December 31, 2024. The Firm generally considers internal ratings with qualitative characteristics equivalent to BBB-/Baa3 or higher as investment grade, and takes into consideration collateral and structural support when determining the internal risk rating for each credit facility. Refer to Note 12 of JPMorganChase's 2024 Form 10-K for further information on internal risk ratings.

March 31, 2025 (in millions, except ratios)	Maturity profile ^(d)				Ratings profile

Total exposure – net of liquid securities and other cash collateral held against derivatives				\$ 1,338,521			\$ 1,338,521	
Credit derivatives and credit-related notes used in credit portfolio management activities ^{(b)(c)}	\$ (5,442)	\$ (33,751)	\$ (1,695)	\$ (40,888)	\$ (31,691)	\$ (9,197)	\$ (40,888)	78 %

(a) Loans held-for-sale are primarily related to syndicated loans and loans transferred from the retained portfolio.

(b) These derivatives do not qualify for hedge accounting under U.S. GAAP.

(c) The notional amounts are presented on a net basis by underlying reference entity and the ratings profile shown is based on the ratings of the reference entity on which protection has been purchased. Predominantly all of the credit derivatives entered into by the Firm where it has purchased protection used in credit portfolio management activities are executed with investment-grade counterparties. In addition, the Firm obtains credit protection against certain loans in the retained loan portfolio through the issuance of credit-related notes.

(d) The maturity profile of retained loans, lending-related commitments and derivative receivables is generally based on remaining contractual maturity. Derivative contracts that are in a receivable position at March 31, 2025, may become payable prior to maturity based on their cash flow profile or changes in market conditions.

Wholesale credit exposure – industry exposures

The Firm focuses on the management and diversification of its industry exposures, and pays particular attention to industries with actual or potential credit concerns.

Exposures that are deemed to be criticized align with the U.S. banking regulators' definition of criticized exposures, which consist of the special mention, substandard and doubtful categories. Total criticized exposure, excluding loans held-for-sale and loans at fair value, was \$45.5 billion and \$44.7 billion as of March 31, 2025 and December 31, 2024, representing approximately 3.5% of total wholesale credit exposure as of both period ends; of the \$45.5 billion, \$40.7 billion was performing.

The table below summarizes by industry the Firm's exposures as of March 31, 2025 and December 31, 2024. The industry of risk category is generally based on the client or counterparty's primary business activity. Refer to Note 4 of JPMorganChase's 2024 Form 10-K for additional information on industry concentrations.

- (a) The industry rankings presented in the table as of December 31, 2024, are based on the industry rankings of the corresponding exposures as of March 31, 2025, not actual rankings of such exposures as of December 31, 2024.
- (b) Individuals and Individual Entities predominantly consists of Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB, and includes exposure to personal investment companies and personal and testamentary trusts.
- (c) In addition to the credit risk exposure to states and municipal governments (both U.S. and non-U.S.) at March 31, 2025 and December 31, 2024 noted above, the Firm held: \$6.1 billion of trading assets at both period ends; \$17.4 billion and \$17.9 billion, respectively, of AFS securities; and \$9.2 billion and \$9.3 billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Notes 2 and 9 for further information.
- (d) All other includes: SPEs and Private education and civic organizations, representing approximately 94% and 6%, respectively, at both March 31, 2025 and December 31, 2024. Refer to Note 13 for more information on exposures to SPEs.
- (e) Excludes cash placed with banks of \$417.2 billion and \$459.2 billion, at March 31, 2025 and December 31, 2024, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks.
- (f) Credit exposure is net of risk participations and excludes the benefit of credit derivatives and credit-related notes used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables.
- (g) Credit exposure includes held-for-sale and fair value option elected lending-related commitments.
- (h) Represents the net notional amounts of protection purchased and sold through credit derivatives and credit-related notes used to manage the credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. The All other category includes purchased credit protection on certain credit indices.

Presented below is additional detail on certain of the Firm's industry exposures.

Real Estate

Real Estate exposure was \$208.8 billion as of March 31, 2025. Criticized exposure decreased by \$292 million from \$12.4 billion at December 31, 2024 to \$12.1 billion at March 31, 2025.

(in millions, except ratios)	March 31, 2025

Total Real Estate Exposure	\$ 206,740	\$ 310	\$ 207,050	69 %	82 %

(a) Total Multifamily exposure is approximately 99% performing. Multifamily exposure is largely in California.

(b) Other Income Producing Properties consists of clients with diversified property types or other property types outside of categories listed in the table above.

(c) Real Estate exposure is approximately 84% secured; unsecured exposure is largely investment-grade primarily to Real Estate Investment Trusts ("REITs") and Real Estate Operating Companies ("REOCs") whose underlying assets are generally diversified.

(d) Represents drawn exposure as a percentage of credit exposure.

Consumer & Retail

Consumer & Retail exposure was \$128.4 billion as of March 31, 2025. Criticized exposure increased by \$279 million from \$6.9 billion at December 31, 2024 to \$7.2 billion at March 31, 2025, driven by downgrades, largely offset by net portfolio activity.

(in millions, except ratios)	March 31, 2025				
	Loans and Lending-related Commitments	Derivative Receivables	Credit exposure	% Investment-grade	% Drawn ^(d)

(a) Retail consists of Home Improvement & Specialty Retailers, Discount & Drug Stores, Restaurants, Specialty Apparel, Supermarkets, and Department Stores.

(b) Leisure consists of Arts & Culture, Gaming, Travel Services, and Sports & Recreation. As of March 31, 2025, approximately 89% of the noninvestment-grade Leisure portfolio is secured.

(c) Consumer & Retail exposure is approximately 58% secured; unsecured exposure is approximately 79% investment-grade.

(d) Represents drawn exposure as a percent of credit exposure.

Loans

In its wholesale businesses, the Firm provides loans to a variety of clients, ranging from large corporate and institutional clients to high-net-worth individuals. Refer to Note 11 for a further discussion on loans, including information about delinquencies, loan modifications and other credit quality indicators.

The following table presents the change in the nonaccrual loan portfolio for the three months ended March 31, 2025 and 2024. Since March 31, 2024, nonaccrual loan exposure increased by \$1.3 billion, predominantly driven by Real Estate, concentrated in Multifamily and Lodging, Technology, Media & Telecommunications, Consumer & Retail and Healthcare, in each case resulting from downgrades primarily offset by net portfolio activity.

Wholesale nonaccrual loan activity

Lending-related commitments

The Firm uses lending-related financial instruments, such as commitments (including revolving credit facilities) and guarantees, to address the financing needs of its clients. The contractual amounts of these financial instruments represent the maximum possible credit risk should the clients draw down on these commitments or when the Firm fulfills its obligations under these guarantees, and the clients subsequently fail to perform according to the terms of these contracts. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn upon or a default occurring. As a result, the Firm does not believe that the total contractual amount of these wholesale lending-related commitments is representative of the Firm's expected future credit exposure or funding requirements. Refer to Note 22 for further information on wholesale lending-related commitments.

Receivables from customers

Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients' brokerage accounts (including cash on deposit, and primarily liquid and readily marketable debt or equity securities). To manage its credit risk, the Firm establishes margin requirements and monitors the required margin levels on an ongoing basis, and requires clients to deposit additional cash or other collateral, or to reduce positions, when appropriate. Credit risk arising from lending activities subject to collateral maintenance requirements is generally mitigated by factors such as the short-term nature of the activity, the fair value of collateral held and the Firm's right to call for, and the borrower's obligation to provide, additional margin when the fair value of the collateral declines. Because of these mitigating factors, these receivables generally do not require an allowance for credit losses. However, if in management's judgment, an allowance for credit losses is required, the Firm estimates expected credit losses based on the value of the collateral and probability of borrower default. These receivables are reported within accrued interest and accounts receivable on the Firm's Consolidated balance sheets.

Refer to Note 13 of JPMorganChase's 2024 Form 10-K for further information on the Firm's accounting policies for the allowance for credit losses.

Derivative contracts

Derivatives enable clients and counterparties to manage risk, including credit risk and risks arising from fluctuations in interest rates, foreign exchange and equities and commodities prices. The Firm makes markets in derivatives in order to meet these needs and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. The Firm also uses derivative instruments to manage its own credit risk and other market risk exposure. The nature of the counterparty and the settlement mechanism of the derivative affect the

credit risk to which the Firm is exposed. For over-the-counter ("OTC") derivatives, the Firm is exposed to the credit risk of the derivative counterparty. For exchange-traded derivatives ("ETD"), such as futures and options, and cleared over-the-counter ("OTC-cleared") derivatives, the Firm can also be exposed to the credit risk of the relevant CCP. Where possible, the Firm seeks to mitigate its credit risk exposures arising from derivative contracts through the use of legally enforceable master netting arrangements and collateral agreements. The percentage of the Firm's OTC derivative transactions subject to collateral agreements — excluding foreign exchange spot trades, which are not typically covered by collateral agreements due to their short maturity and centrally cleared trades that are settled daily — was approximately 85% and 86% at March 31, 2025 and December 31, 2024, respectively. Refer to Note 4 for additional information on the Firm's use of collateral agreements and for a further discussion of derivative contracts, counterparties and settlement types.

The fair value of derivative receivables reported on the Consolidated balance sheets was \$60.5 billion and \$61.0 billion at March 31, 2025 and December 31, 2024, respectively. The decrease was primarily as a result of market movements. Derivative receivables represent the fair value of the derivative contracts after giving effect to legally enforceable master netting agreements and the related cash collateral held by the Firm.

In addition, the Firm holds liquid securities and other cash collateral that may be used as security when the fair value of the client's exposure is in the Firm's favor. For these purposes, the definition of liquid securities is consistent with the definition of high quality liquid assets as defined in the LCR rule.

In management's view, the appropriate measure of current credit risk should also take into consideration other collateral, which generally represents securities that do not qualify as high quality liquid assets under the LCR rule. The benefits of these additional collateral amounts for each counterparty are subject to a legally enforceable master netting agreement and limited to the net amount of the derivative receivables for each counterparty.

The Firm also holds additional collateral (primarily cash, G7 government securities, other liquid government agency and guaranteed securities, and corporate debt and equity securities) delivered by clients at the initiation of transactions, as well as collateral related to contracts that have a non-daily call frequency and collateral that the Firm has agreed to return but has not yet settled as of the reporting date. Although this collateral does not reduce the receivables balances and is not included in the tables below, it is available as security against potential exposure that could arise should the fair value of the client's derivative contracts move in the Firm's favor. Refer to Note 4 for additional information on the Firm's use of collateral agreements for derivative transactions.

The following tables summarize the net derivative receivables and the internal ratings profile for the periods presented.

Derivative receivables

(in millions)		March 31, 2025		December 31, 2024
Total, net of cash collateral	\$	60,539	\$	60,967

Noninvestment-grade	7,206	22	8,003	25
Total	\$ 32,180	100 %	\$ 31,786	100 %

Credit portfolio management activities

The Firm uses credit derivatives for two primary purposes: first, in its capacity as a market-maker, and second, as an end-user, to manage the Firm's own credit risk associated with traditional lending activities (loans and lending-related commitments) and derivatives counterparty exposure in the Firm's wholesale businesses. In addition, the Firm obtains credit protection against certain loans in the retained wholesale portfolio through the issuance of credit-related notes. Information on credit portfolio management activities is provided in the table below.

Credit derivatives and credit-related notes used in credit portfolio management activities

(in millions)	Notional amount of protection purchased and sold ^(a)	
	March 31, 2025	December 31, 2024
Credit derivatives and credit-related notes used to manage:		
Loans and lending-related commitments	\$ 25,434	\$ 25,216
Derivative receivables	14,661	15,672
Credit derivatives and credit-related notes used in credit portfolio management activities	\$ 40,095	\$ 40,888

(a) Amounts are presented net, considering the Firm's net protection purchased or sold with respect to each underlying reference entity or index.

Refer to Credit derivatives in Note 4 of this Form 10-Q and Note 5 of JPMorganChase's 2024 Form 10-K for further information on credit derivatives and derivatives used in credit portfolio management activities.

ALLOWANCE FOR CREDIT LOSSES

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The Firm's allowance for credit losses generally consists of:

- the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated) and is presented separately on the Consolidated balance sheets,
- the allowance for lending-related commitments, which is reflected in accounts payable and other liabilities on the Consolidated balance sheets, and
- the allowance for credit losses on investment securities, which is reflected in investment securities on the Consolidated balance sheets.

Discussion of changes in the allowance

The allowance for credit losses as of March 31, 2025 was \$27.8 billion, reflecting a net addition of \$1.0 billion from December 31, 2024. The net addition to the allowance for credit losses was largely driven by changes in the weighted-average macroeconomic outlook, including the qualitative adjustment to reflect additional weight placed on the adverse scenarios due to elevated risks and uncertainties related to the geopolitical and macroeconomic environment.

The net addition to the allowance for credit losses included:

- \$562 million in **wholesale**, which also reflected changes in credit quality on client-specific exposures and the impact of new lending-related commitments, and
- \$441 million in **consumer**, predominantly driven by Card Services.

The Firm's allowance for credit losses is estimated using a weighted average of five internally developed macroeconomic scenarios. The adverse scenarios incorporate more punitive macroeconomic factors than the central case assumptions provided in the following table, resulting in:

- a weighted average U.S. unemployment rate peaking at 5.8% in the first quarter of 2026, and
- a weighted average U.S. real GDP level that is 2.6% lower than the central case at the end of the second quarter of 2026.

The following table presents the Firm's central case assumptions for the periods presented:

	Central case assumptions at March 31, 2025		
	2Q25	4Q25	2Q26
U.S. unemployment rate ^(a)	4.3 %	4.3 %	4.3 %
YoY growth in U.S. real GDP ^(b)	2.5 %	2.2 %	2.0 %

	Central case assumptions at December 31, 2024		
	2Q25	4Q25	2Q26
U.S. unemployment rate ^(a)	4.5 %	4.3 %	4.3 %
YoY growth in U.S. real GDP ^(b)	2.0 %	1.9 %	1.8 %

(a) Reflects quarterly average of forecasted U.S. unemployment rate.

(b) The year over year growth in U.S. real GDP in the forecast horizon of the central scenario is calculated as the percentage change in U.S. real GDP levels from the prior year.

Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

Refer to Note 13 and Note 10 of JPMorganChase's 2024 Form 10-K for a description of the policies, methodologies and judgments used to determine the Firm's allowance for credit losses on loans, lending-related commitments, and investment securities.

Refer to Consumer Credit Portfolio on pages 49-51, Wholesale Credit Portfolio on pages 52-60 and Note 11 for additional information on the consumer and wholesale credit portfolios.

Refer to Critical Accounting Estimates Used by the Firm on pages 72-75 for further information on the allowance for credit losses and related management judgments.

INVESTMENT PORTFOLIO RISK MANAGEMENT

Investment portfolio risk is the risk associated with the loss of principal or a reduction in expected returns on investments arising from the investment securities portfolio or from principal investments. The investment securities portfolio is predominantly held by Treasury and CIO in connection with the Firm's balance sheet and asset-liability management objectives. Principal investments are predominantly privately-held financial instruments and are managed in the LOBs and Corporate. Investments are typically intended to be held over extended periods and, accordingly, the Firm has no expectation for short-term realized gains with respect to these investments.

Investment securities risk

Investment securities risk includes the exposure associated with a default in the payment of principal and interest. This risk is mitigated given that the investment securities portfolio held by Treasury and CIO predominantly consists of high-quality securities. At March 31, 2025, the Treasury and CIO investment securities portfolio, net of the allowance for credit losses, was \$661.4 billion, and the average credit rating of the securities comprising the portfolio was AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings). Refer to Corporate results on pages 30-31 and Note 9 for further information on the investment securities portfolio and internal risk ratings. Refer to Liquidity Risk Management on pages 40-46 for further information on related liquidity risk. Refer to Market Risk Management on pages 65-70 for further information on the market risk inherent in the portfolio.

Principal investment risk

Principal investments are typically privately-held financial instruments representing ownership interests or other forms of junior capital. In general, principal investments include tax-oriented investments and investments made to enhance or accelerate the Firm's business strategies and exclude those that are consolidated on the Firm's balance sheets. These investments are made by dedicated investing businesses or as part of a broader business strategy. The Firm's principal investments are managed by the LOBs and Corporate and are reflected within their respective financial results. The Firm's investments will continue to evolve based on market circumstances and in line with its strategic initiatives.

The table below presents the aggregate carrying values of the principal investment portfolios as of March 31, 2025 and December 31, 2024.

(in billions)	March 31, 2025	December 31, 2024
Tax-oriented investments, primarily in alternative energy and affordable housing	\$ 33.0	\$ 33.3
Private equity, various debt and equity instruments, and real assets	9.4	9.1
Total carrying value	\$ 42.4	\$ 42.4

Refer to page 140 of JPMorganChase's 2024 Form 10-K for a discussion of the Firm's Investment Portfolio Risk Management governance and oversight.

MARKET RISK MANAGEMENT

Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term. Refer to Market Risk Management on pages 141–149 of JPMorganChase’s 2024 Form 10-K for a discussion of the Firm’s Market Risk Management organization, market risk measurement, risk monitoring and control, and predominant business activities that give rise to market risk.

Models used to measure market risk are inherently imprecise and are limited in their ability to measure certain risks or to predict losses. This imprecision may be heightened when sudden or severe shifts in market conditions occur. For additional discussion on model uncertainty refer to Estimations and Model Risk Management on page 160 of JPMorganChase’s 2024 Form 10-K.

Market Risk Management periodically reviews the Firm’s existing market risk measures to identify opportunities for enhancement, and to the extent appropriate, will calibrate those measures accordingly over time.

Value-at-risk

JPMorganChase utilizes value-at-risk (“VaR”), a statistical risk measure, to estimate the potential loss from adverse market moves in the current market environment. The Firm has a single VaR framework used as a basis for calculating Risk Management VaR and Regulatory VaR.

The Firm’s Risk Management VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 95% confidence level. For risk management purposes, the Firm believes this methodology provides a daily measure of risk that is closely aligned to risk management decisions made by the LOBs and Corporate and, along with other market risk measures, provides the appropriate information needed to respond to risk events. The Firm calculates separately a daily aggregated VaR in accordance with regulatory rules (“Regulatory VaR”), which is used to derive the Firm’s regulatory VaR-based capital requirements under Basel III.

The Firm’s VaR model calculations are periodically evaluated and enhanced in response to changes in the composition of the Firm’s portfolios, changes in market conditions, improvements in the Firm’s modeling techniques and measurements, and other factors. Such changes may affect historical comparisons of VaR results. Refer to Estimations and Model Risk Management on page 160 of JPMorganChase’s 2024 Form 10-K for information regarding model reviews and approvals.

Refer to page 143 of JPMorganChase’s 2024 Form 10-K for further information regarding VaR, including its inherent limitations, and the key differences between Risk Management VaR and Regulatory VaR. Refer to JPMorganChase’s Basel III Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm’s website, for additional information on Regulatory VaR and the other components of market risk regulatory capital for the Firm (e.g., VaR-based measure, stressed VaR-based measure and the respective backtesting). Refer to Other risk measures on pages 146–149 of JPMorganChase’s 2024 Form 10-K for further information regarding nonstatistical market risk measures used by the Firm.

The table below shows the results of the Firm's Risk Management VaR measure using a 95% confidence level. VaR can vary significantly as positions change, market volatility fluctuates, and diversification benefits change.

Total VaR

(in millions)	Three months ended								
	March 31, 2025			December 31, 2024			March 31, 2024		
	Avg.	Min	Max	Avg.	Min	Max	Avg.	Min	Max

Diversification benefit to CIB and other VaR ^(a)	(9)	NM	NM	(8)	NM	NM	(7)	NM	NM
Total VaR	\$ 50	\$ 36	\$136	\$ 40	\$ 30	\$ 55	\$ 48	\$ 43	\$ 58

- (a) Diversification benefit represents the difference between the portfolio VaR and the sum of its individual components. This reflects the non-additive nature of VaR due to imperfect correlation across LOBs, Corporate, and risk types. For maximum and minimum VaR, diversification benefit is not meaningful as the maximum and minimum VaR for each portfolio may have occurred on different trading days than the components.
- (b) Includes the derivative CVA, hedges of the CVA and credit protection purchased against certain retained loans and lending-related commitments, which are reported in principal transactions revenue. This VaR does not include the retained loan portfolio, which is not reported at fair value.
- (c) Includes credit protection purchased against certain retained loans and lending-related commitments. This VaR does not include the retained loan portfolio, which is not reported at fair value.
- (d) Includes a legacy private equity position which is publicly traded.
- (e) In the first quarter of 2025, the elevated average and maximum VaR was due to a client-driven equity position that has since matured.

Quarter over quarter results

Average total VaR for the three months ended March 31, 2025 increased by \$10 million, when compared with December 31, 2024, due to a client-driven equity position that has since matured and increases in commodities, both amid a volatile market. This was partially offset by market volatility rolling out of the one-year historical look-back period impacting the Foreign exchange risk type.

Year over year results

Average total VaR for the three months ended March 31, 2025 increased by \$2 million compared with the same period in the prior year due to a client-driven equity position that has since matured and increases in commodities, both amid a volatile market. This was partially offset by market volatility rolling out of the one-year historical look-back period impacting the Foreign exchange risk type.

The following graph presents daily Risk Management VaR for the five trailing quarters. The movements in the second quarter of 2024 were primarily driven by changes in Visa Class C common share exposure in the Firm's Corporate VaR and the movements in the first quarter of 2025 were due to a client-driven equity position that has since matured.

Daily Risk Management VaR

VaR backtesting

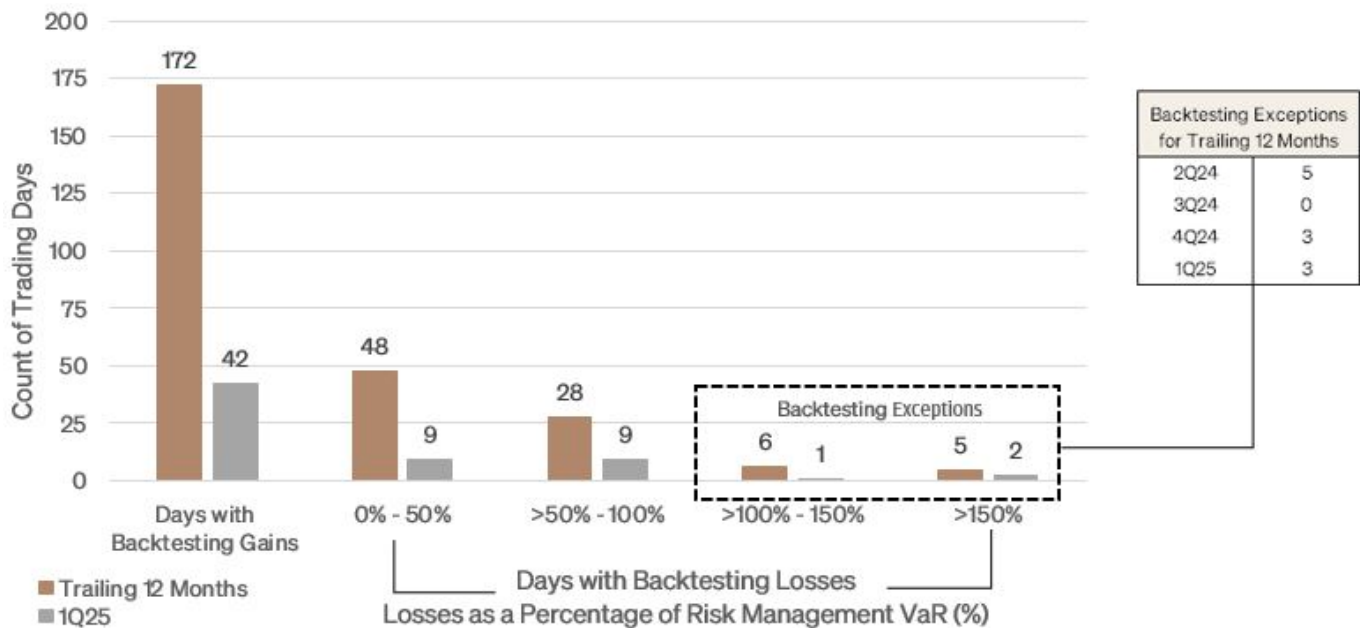

The Firm performs daily VaR model backtesting, which compares the daily Risk Management VaR results with the daily gains and losses that are utilized for VaR backtesting purposes. The gains and losses depicted in the chart below do not reflect the Firm’s reported revenue as they exclude certain components of total net revenue, such as those associated with the execution of new transactions (i.e., intraday client-driven trading and intraday risk management activities), fees, commissions, other valuation adjustments and net interest income. These excluded components of total net revenue may more than offset the backtesting gain or loss on a particular day. The definition of backtesting gains and losses above is consistent with the requirements for backtesting under Basel III capital rules.

A backtesting exception occurs when the daily backtesting loss exceeds the daily Risk Management VaR for the prior day. Under the Firm’s Risk Management VaR methodology, assuming current changes in market values are consistent with the historical changes used in the simulation, the Firm would expect to incur VaR backtesting exceptions five times every 100 trading days on average. The number of VaR backtesting exceptions observed can differ from the statistically expected number of backtesting exceptions if the current level of market volatility is materially different from the level of market volatility during the 12 months of historical data used in the VaR calculation.

For the 12 months ended March 31, 2025, the Firm posted backtesting gains on 172 of the 259 days, and observed 11 VaR backtesting exceptions. For the three months ended March 31, 2025, the Firm posted backtesting gains on 42 of the 63 days, and observed three VaR backtesting exceptions.

The following chart presents the distribution of Firmwide daily backtesting gains and losses for the trailing 12 months and three months ended March 31, 2025. The daily backtesting losses are displayed as a percentage of the corresponding daily Risk Management VaR. The count of days with backtesting losses are shown in aggregate, in fifty percentage point intervals. Backtesting exceptions are displayed within the intervals that are greater than one hundred percent. The results in the chart below differ from the results of backtesting disclosed in the Market Risk section of the Firm’s Basel III Pillar 3 Regulatory Capital Disclosures reports, which are based on Regulatory VaR applied to the Firm’s covered positions.

Distribution of Daily Backtesting Gains and Losses

Structural interest rate risk management

The effect of interest rate exposure on the Firm's reported net income is important as interest rate risk represents one of the Firm's significant market risks. Interest rate risk arises not only from trading activities which are included in VaR, but also from the Firm's traditional banking activities, which include extension of loans and credit facilities, taking deposits, issuing debt, as well as the investment securities portfolio, and associated derivative instruments.

Refer to the table on page 142 of JPMorganChase's 2024 Form 10-K for a summary by LOB and Corporate identifying positions included in earnings-at-risk.

Earnings-at-risk

One way that the Firm evaluates its structural interest rate risk is through earnings-at-risk. Earnings-at-risk estimates the Firm's interest rate exposure for a given interest rate scenario. It is presented as a sensitivity to a baseline, which includes net interest income and certain interest rate sensitive fees. The baseline uses market interest rates and, in the case of deposits, pricing assumptions. The Firm conducts simulations of changes to this baseline for interest rate-sensitive assets and liabilities denominated in U.S. dollars and other currencies ("non-U.S. dollar" currencies). These simulations primarily include retained and held-for-sale loans, deposits, deposits with banks and financing activities, investment securities, long-term debt, related interest rate hedges, and funds transfer pricing of other positions in risk management VaR and other sensitivity-based measures as described on page 142 of JPMorganChase's 2024 Form 10-K. These simulations also include hedges of non-U.S. dollar foreign exchange exposures arising from capital investments. Refer to non-U.S. dollar foreign exchange risk on page 149 of JPMorganChase's 2024 Form 10-K for more information.

Earnings-at-risk scenarios estimate the potential change to a baseline, over the following 12 months utilizing multiple assumptions. These scenarios include a parallel shift involving changes to both short-term and long-term rates by an equal amount; a steeper yield curve involving holding short-term rates constant and increasing long-term rates; and a flatter yield curve involving increasing short-term rates and holding long-term rates constant or holding short-term rates constant and decreasing long-term rates. These scenarios consider many different factors, including:

- The impact on exposures as a result of instantaneous changes in interest rates from baseline rates.

- Forecasted balance sheet, as well as modeled prepayment and reinvestment behavior, but excluding assumptions about actions that could be taken by the Firm or its clients and customers in response to instantaneous rate changes. Mortgage prepayment assumptions are based on the interest rates used in the scenarios compared with underlying contractual rates, the time since origination, and other factors which are updated periodically based on historical experience. Deposit forecasts are a key assumption in the Firm's earnings-at-risk. The baseline reflects certain assumptions relating to the Federal Reserve's balance sheet policy (e.g., quantitative tightening and usage at the Reverse Repurchase Facility) that require management judgment. The amount of deposits that the Firm holds at any given time may be influenced by Federal Reserve actions, as well as broader monetary conditions and competition for deposits.
- The pricing sensitivity of deposits, known as deposit betas, represent the amount by which deposit rates paid could change upon a given change in market interest rates. Actual deposit rates paid may differ from the modeled assumptions, primarily due to customer behavior and competition for deposits.

The Firm performs sensitivity analyses of the assumptions used in earnings-at-risk scenarios, including with respect to deposit betas and forecasts of deposit balances, both of which are especially significant in the case of consumer deposits. The results of these sensitivity analyses are reported to the CTC Risk Committee and the Board Risk Committee.

The Firm's earnings-at-risk scenarios are periodically evaluated and enhanced in response to changes in the composition of the Firm's balance sheet, changes in market conditions, improvements in the Firm's simulation and other factors.

The Firm's earnings-at-risk sensitivities are measures of the Firm's interest rate exposure. The Firm's actual net interest income for the rate changes presented may differ as the earnings-at-risk scenarios are modelled as instantaneous changes and exclude any actions that could be taken by the Firm or its clients or customers in response to rate changes. Other significant assumptions in the earnings-at-risk scenarios, including mortgage prepayments and deposit rates paid, may also differ from actual results. The Firm's forecast for net interest income is included in the Firm's outlook on page 8.

The Firm's sensitivities are presented in the table below.

(In billions)	March 31, 2025^(a)	December 31, 2024 ^(a)
Parallel shift:		
+100 bps shift in rates	\$ 2.2	\$ 2.3
-100 bps shift in rates	(2.2)	(2.5)
+200 bps shift in rates	4.3	4.6
-200 bps shift in rates	(4.8)	(4.9)
Steeper yield curve:		
+100 bps shift in long-term rates	1.1	1.0
-100 bps shift in short-term rates	(1.1)	(1.4)
Flatter yield curve:		
+100 bps shift in short-term rates	1.0	1.2
-100 bps shift in long-term rates	(1.1)	(1.1)

(a) Reflects the simultaneous shift of U.S. dollar and non-U.S. dollar rates, including hedges of non-U.S. dollar capital investments. Non-U.S. dollar sensitivities were insignificant.

The change in the Firm's sensitivities as of March 31, 2025 compared to December 31, 2024, were primarily driven by the net impact of Treasury and CIO actions, partially offset by the impact of changes in Firmwide deposits and loans, primarily in balances. Treasury and CIO actions consisted of an increase in cash flow hedges of floating rate retained loans which added duration, partially offset by securities activity.

Economic value sensitivity

In addition to earnings-at-risk, which is measured as a sensitivity to a baseline of earnings over the next 12 months, the Firm also measures economic value sensitivity ("EVS"). EVS stress tests the longer-term economic value of equity by measuring the sensitivity of the Firm's current balance sheet, primarily retained loans, deposits, debt and investment securities as well as related hedges, under various interest rate scenarios. The Firm's pricing and cash flow assumptions associated with deposits, as well as prepayment assumptions for loans and securities, are significant factors in the EVS measure. In accordance with the CTC interest rate risk management policy, the Firm has established limits on EVS as a percentage of TCE.

Certain assumptions used in the EVS measure may differ from those required in the fair value measurement note to the Consolidated Financial Statements. For example, certain assets and liabilities with no stated maturity, such as credit card receivables and deposits, have longer assumed durations in the EVS measure. Additional information on long-term debt and held to maturity investment securities is disclosed on page 95 in Note 2.

Other sensitivity-based measures

The Firm quantifies the market risk of certain debt and equity and credit and funding-related exposures by assessing the potential impact on net revenue, other comprehensive income (“OCI”) and noninterest expense due to changes in relevant market variables. Refer to the predominant business activities that give rise to market risk on page 142 of JPMorganChase’s 2024 Form 10-K for additional information on the positions captured in other sensitivity-based measures.

The table below represents the potential impact to net revenue, OCI or noninterest expense for market risk-sensitive instruments that are not included in VaR or earnings-at-risk. Where appropriate, instruments used for hedging purposes are reported net of the positions being hedged. The sensitivities disclosed in the table below may not be representative of the actual gain or loss that would have been realized at March 31, 2025 and December 31, 2024, as the movement in market parameters across maturities may vary and are not intended to imply management’s expectation of future changes in these sensitivities.

Gain/(loss) (in millions)				
Activity	Description	Sensitivity measure	March 31, 2025	December 31, 2024
Debt and equity^(a)				
Asset Management activities	Consists of seed capital and related hedges; fund co-investments ^(b) ; and certain deferred compensation and related hedges ^(c)	10% decline in market value	\$ (50)	\$ (53)
Other debt and equity	Consists of certain real estate-related fair value option elected loans, privately held equity ^(b) and other investments held at fair value ^(b)	10% decline in market value	(977)	(1,030)
Funding-related exposures				
Non-USD LTD cross-currency basis	Represents the basis risk on derivatives used to hedge the foreign exchange risk on the non-USD LTD ^(d)	1 basis point parallel tightening of cross currency basis	(12)	(10)
Non-USD LTD hedges foreign currency (“FX”) exposure	Primarily represents the foreign exchange revaluation on the fair value of the derivative hedges ^(d)	10% depreciation of currency	25	28
Derivatives – funding spread risk	Impact of changes in the spread related to derivatives FVA ^(b)	1 basis point parallel increase in spread	(2)	(2)
Fair value option elected liabilities – funding spread risk	Impact of changes in the spread related to fair value option elected liabilities DVA ^(d)	1 basis point parallel increase in spread	51	47

(a) Excludes equity securities without readily determinable fair values that are measured under the measurement alternative. Refer to Note 2 for additional information.

(b) Impact recognized through net revenue.

(c) Impact recognized through noninterest expense.

(d) Impact recognized through OCI.

COUNTRY RISK MANAGEMENT

The Firm, through its LOBs and Corporate, may be exposed to country risk resulting from financial, economic, political or other significant developments which adversely affect the value of the Firm's exposures related to a particular country or set of countries. The Country Risk Management group actively monitors the various portfolios which may be impacted by these developments and measures the extent to which the Firm's exposures are diversified given the Firm's strategy and risk tolerance relative to a country.

Refer to pages 150–151 of JPMorganChase's 2024 Form 10-K for a further discussion of the Firm's country risk management.

Risk Reporting

The following table presents the Firm's top 20 exposures by country (excluding the U.S.) as of March 31, 2025 and their comparative exposures as of December 31, 2024. The top 20 country exposures represent the Firm's largest total exposures by individual country. Country exposures may fluctuate from period to period due to a variety of factors, including client activity, market flows and liquidity management activities undertaken by the Firm.

The decrease in exposure to Japan when compared to December 31, 2024 was predominantly driven by a reduction in cash placed with the central bank of Japan as a result of client-driven market-making activities.

The Firm continues to monitor its exposure to Russia, which corresponds to cash placed with the central bank, but which excludes deposits placed on behalf of clients at the Deposit Insurance Agency of Russia. The Firm currently believes that its remaining exposure to Russia is not material. Refer to Note 24 on pages 165-166 for information concerning Russian litigation.

Top 20 country exposures (excluding the U.S.)^(a)

(in billions)	March 31, 2025					December 31, 2024 ^(f)	
	Deposits with banks ^(b)	Lending ^(c)	Trading and investing ^(d)	Other ^(e)	Total exposure	Total exposure

Belgium	4.5	1.3	0.3	—	6.1	5.4	
Spain	0.3	4.6	0.6	—	5.5	6.1	
United Arab Emirates	0.1	3.0	1.3	—	4.4	2.6	
Sweden	0.2	3.4	0.5	—	4.1	3.3	

- (a) Country exposures presented in the table reflect 88% and 89% of total Firmwide non-U.S. exposure, where exposure is attributed to an individual country based on the Firm's internal country risk management approach, at March 31, 2025 and December 31, 2024, respectively.
- (b) Predominantly represents cash placed with central banks.
- (c) Includes loans and accrued interest receivable, lending-related commitments (net of eligible collateral and the allowance for credit losses). Excludes intra-day and operating exposures, such as those from settlement and clearing activities.
- (d) Includes market-making positions and hedging, investment securities, and counterparty exposure on derivative and securities financings net of eligible collateral. Market-making positions and hedging includes exposure from single reference entity ("single-name"), index and other multiple reference entity transactions for which one or more of the underlying reference entities is in a country listed in the above table.
- (e) Includes physical commodities inventory and clearing house guarantee funds.
- (f) The country rankings presented in the table as of December 31, 2024, are based on the country rankings of the corresponding exposures at March 31, 2025, not actual rankings of such exposures at December 31, 2024.

CRITICAL ACCOUNTING ESTIMATES USED BY THE FIRM

JPMorganChase's accounting policies and use of estimates are integral to understanding its reported results. The Firm's most complex accounting estimates require management's judgment to ascertain the appropriate carrying value of assets and liabilities. The Firm has established policies and control procedures intended to ensure that estimation methods, including any judgments made as part of such methods, are well-controlled, independently reviewed and applied consistently from period to period. The methods used and judgments made reflect, among other factors, the nature of the assets or liabilities and the related business and risk management strategies, which may vary across the Firm's businesses and portfolios. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The Firm believes its estimates for determining the carrying value of its assets and liabilities are appropriate. The following is a brief description of the Firm's critical accounting estimates involving significant judgments.

Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses generally comprises:

- The allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated),
- The allowance for lending-related commitments, and
- The allowance for credit losses on investment securities.

The allowance for credit losses involves significant judgment on a number of matters including development and weighting of macroeconomic forecasts, incorporation of historical loss experience, assessment of risk characteristics, assignment of risk ratings, valuation of collateral, and the determination of remaining expected life. Refer to Note 10 and Note 13 of JPMorganChase's 2024 Form 10-K for further information on these judgments as well as the Firm's policies and methodologies used to determine the Firm's allowance for credit losses, and Allowance for credit losses on pages 61-63 and Note 12 of this Form 10-Q for further information.

One of the most significant judgments involved in estimating the Firm's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the eight-quarter forecast period within the Firm's methodology. The eight-

quarter forecast incorporates hundreds of macroeconomic variables ("MEVs") that are relevant for exposures across the Firm, with modeled credit losses being driven primarily by a subset of less than twenty variables. The specific variables that have the greatest effect on the modeled losses vary by portfolio and geography.

- Key MEVs for the consumer portfolio include regional U.S. unemployment rates and U.S. HPI.
- Key MEVs for the wholesale portfolio include U.S. unemployment, U.S. real GDP, U.S. equity prices, U.S. interest rates, U.S. corporate credit spreads, oil prices, U.S. commercial real estate prices and U.S. HPI.

Changes in the Firm's assumptions and forecasts of economic conditions could significantly affect its estimate of expected credit losses in the portfolio at the balance sheet date or lead to significant changes in the estimate from one reporting period to the next.

It is difficult to estimate how potential changes in any one factor or input might affect the overall allowance for credit losses because management considers a wide variety of factors and inputs in estimating the allowance for credit losses. Changes in the factors and inputs considered may not occur at the same rate and may not be consistent across all geographies or product types, and changes in factors and inputs may be directionally inconsistent, such that improvement in one factor or input may offset deterioration in others.

To consider the impact of a hypothetical alternate macroeconomic forecast, the Firm compared the modeled credit losses determined using its central and relative adverse macroeconomic scenarios, which are two of the five scenarios considered in estimating the allowances for loan losses and lending-related commitments. The central and relative adverse scenarios each included a full suite of MEVs, but differed in the levels, paths and peaks/troughs of those variables over the eight-quarter forecast period.

For example, compared to the Firm's central scenario shown on page 61 and in Note 12, the Firm's relative adverse scenario assumes an elevated U.S. unemployment rate, averaging approximately 2.1% higher over the eight-quarter forecast, with a peak difference of approximately 2.9% in the first quarter of 2026.

This analysis is not intended to estimate expected future changes in the allowance for credit losses, for a number of reasons, including:

- The allowance as of March 31, 2025, reflects credit losses beyond those estimated under the central scenario due to the weight placed on the adverse scenarios.

- The impacts of changes in many MEVs are both interrelated and nonlinear, so the results of this analysis cannot be simply extrapolated for more severe changes in macroeconomic variables.
- Expectations of future changes in portfolio composition and borrower behavior can significantly affect the allowance for credit losses.

To demonstrate the sensitivity of credit loss estimates to macroeconomic forecasts as of March 31, 2025, the Firm compared the modeled estimates under its relative adverse scenario to its central scenario. Without considering offsetting or correlated effects in other qualitative components of the Firm's allowance for credit losses, the comparison between these two scenarios for the exposures below reflect the following differences:

- An increase of approximately \$1.0 billion for residential real estate loans and lending-related commitments
- An increase of approximately \$3.7 billion for credit card loans
- An increase of approximately \$4.6 billion for wholesale loans and lending-related commitments

This analysis relates only to the modeled credit loss estimates and is not intended to estimate changes in the overall allowance for credit losses as it does not reflect any potential changes in other adjustments to the quantitative calculation, which would also be influenced by the judgment management applies to the modeled lifetime loss estimates to reflect the uncertainty and imprecision of these modeled lifetime loss estimates based on then-current circumstances and conditions.

Recognizing that forecasts of macroeconomic conditions are inherently uncertain, the Firm believes that its process to consider the available information and associated risks and uncertainties is appropriately governed and that its estimates of expected credit losses were reasonable and appropriate for the period ended March 31, 2025.

Fair value

JPMorganChase carries a portion of its assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis, including trading assets and liabilities, AFS securities, structured note products and certain securities financing agreements. Certain assets and liabilities are measured at fair value on a nonrecurring basis, including certain mortgage, home equity and other loans, where the carrying value is based on the fair value of the underlying collateral.

Assets measured at fair value

The following table includes the Firm's assets measured at fair value and the portion of such assets that are classified within level 3 of the fair value hierarchy. Refer to Note 2 for further information.

March 31, 2025 (in millions, except ratios)	Total assets at fair value	Total level 3 assets
Federal funds sold and securities purchased under resale agreements	\$ 408,608	\$ —
Securities borrowed	89,147	—
Trading assets:		
Trading—debt and equity instruments	814,664	2,205
Derivative receivables ^(a)	60,539	9,105
Total trading assets	875,203	11,310
AFS securities	399,363	8
Loans	44,533	2,398
MSRs	9,127	9,127
Other	17,000	1,370
Total assets measured at fair value on a recurring basis	1,842,981	24,213
Total assets measured at fair value on a nonrecurring basis	1,699	699
Total assets measured at fair value	\$1,844,680	\$ 24,912
Total Firm assets	\$4,357,856	
Level 3 assets at fair value as a percentage of total Firm assets ^(a)		1 %
Level 3 assets at fair value as a percentage of total Firm assets at fair value ^(a)		1 %

(a) For purposes of the table above, the derivative receivables total reflects the impact of netting adjustments; however, the \$9.1 billion of derivative receivables classified as level 3 does not reflect the netting adjustment as such netting is not relevant to a presentation based on the transparency of inputs to the valuation of an asset. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

Valuation

Details of the Firm's processes for determining fair value are set out in Note 2. Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2.

In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, the lack of observability of certain significant inputs requires management to assess relevant empirical data in deriving valuation inputs including, for example, transaction details, yield curves, interest rates, prepayment speeds, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves. Refer to Note 2 for a further discussion of the valuation of level 3 instruments, including unobservable inputs used.

For instruments classified in levels 2 and 3, management judgment must be applied to assess the appropriate level of valuation adjustments to reflect counterparty credit quality, the Firm's creditworthiness, market funding rates, liquidity considerations, unobservable parameters, and for portfolios that meet specified criteria, the size of the net open risk position. The judgments made are typically affected by the type of product and its specific contractual terms, and the level of liquidity for the product or within the market as a whole. In periods of heightened market volatility and uncertainty judgments are further affected by the wider variation of reasonable valuation estimates, particularly for positions that are less liquid. Refer to Note 2 for a further discussion of valuation adjustments applied by the Firm.

Imprecision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios.

The Firm uses various methodologies and assumptions in the determination of fair value. The use of methodologies or assumptions different than those used by the Firm could result in a different estimate of fair value at the reporting date. Refer to Note 2 for a detailed discussion of the Firm's valuation process and hierarchy, and its determination of fair value for individual financial instruments.

Credit card rewards liability

The credit card rewards liability was \$14.6 billion and \$14.4 billion at March 31, 2025 and December 31, 2024, respectively, and is recorded in accounts payable and other liabilities on the Consolidated balance sheets. Refer to pages 163-164 of JPMorganChase's 2024 Form 10-K for a description of the significant assumptions and sensitivities, associated with the Firm's credit card rewards liability.

Income taxes

Refer to Income taxes on page 164 of JPMorganChase's 2024 Form 10-K for a description of the significant assumptions, judgments and interpretations associated with the accounting for income taxes.

Goodwill impairment

Management applies significant judgment when testing goodwill for impairment. Refer to Goodwill impairment on page 163 of JPMorganChase's 2024 Form 10-K for a description of the significant valuation judgments associated with goodwill impairment.

Refer to Note 14 for additional information on goodwill, including the goodwill impairment assessment as of March 31, 2025.

Litigation reserves

Refer to Note 24 of this Form 10-Q, and Note 30 of JPMorganChase's 2024 Form 10-K for a description of the significant estimates and judgments associated with establishing litigation reserves.

ACCOUNTING AND REPORTING DEVELOPMENTS

FASB Standards Issued but not yet Adopted

Standard	Summary of guidance	Effects on financial statements
<p>Income Taxes: Improvements to Income Tax Disclosures</p> <p><i>Issued December 2023</i></p>	<ul style="list-style-type: none"> Requires disclosure of income taxes paid disaggregated by 1) federal, state, and foreign taxes and 2) individual jurisdiction on the basis of a quantitative threshold of equal to or greater than 5 percent of total income taxes paid (net of refunds received). Requires disclosure of the effective tax rate reconciliation by specific categories, at a minimum, with accompanying qualitative disclosures, and separate disclosure of reconciling items based on quantitative thresholds. Requires categories within the effective tax rate reconciliation to be further disaggregated if quantitative thresholds are met. 	<ul style="list-style-type: none"> Required effective date: Annual financial statements for the year ending December 31, 2025. The guidance is to be applied on a prospective basis with retrospective application permitted. The Firm plans to present the expanded income tax disclosures in its Consolidated Financial Statements for the year ending December 31, 2025.
<p>Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures: Disaggregation of Income Statement Expenses</p> <p><i>Issued November 2024</i></p>	<ul style="list-style-type: none"> Requires additional disaggregation of specific types of expenses within the Notes to the Consolidated Financial Statements on an annual and interim basis. 	<ul style="list-style-type: none"> Required effective date: Annual financial statements for the year ending December 31, 2027, and interim financial statements for the year ending December 31, 2028.^(a) The guidance is to be applied on a prospective basis with retrospective application permitted. The Firm is evaluating the potential impact on the Consolidated Financial Statements disclosures, as well as the Firm's planned date of adoption.

(a) Early adoption is permitted.

FORWARD-LOOKING STATEMENTS

From time to time, the Firm has made and will make forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipate,” “target,” “expect,” “estimate,” “intend,” “plan,” “goal,” “believe,” or other words of similar meaning. Forward-looking statements provide JPMorganChase’s current expectations or forecasts of future events, circumstances, results or aspirations. JPMorganChase’s disclosures in this Form 10-Q contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Firm also may make forward-looking statements in its other documents filed or furnished with the SEC. In addition, the Firm’s senior management may make forward-looking statements orally to investors, analysts, representatives of the media and others.

All forward-looking statements are, by their nature, subject to risks and uncertainties, many of which are beyond the Firm’s control. JPMorganChase’s actual future results may differ materially from those set forth in its forward-looking statements. While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ from those in the forward-looking statements:

- Local, regional and global business, economic and political conditions and geopolitical events, including geopolitical tensions and hostilities;
- Changes in laws, rules and regulatory requirements, including capital and liquidity requirements affecting the Firm’s businesses, and the ability of the Firm to address those requirements;
- Heightened regulatory and governmental oversight and scrutiny of JPMorganChase’s business practices, including dealings with retail customers;
- Changes in monetary and fiscal policies and laws;
- Changes in trade policies, including the imposition of tariffs and retaliatory responses;
- Changes in the level of inflation;
- Changes in income tax laws, rules and regulations;
- Changes in FDIC assessments;
- Securities and capital markets behavior, including changes in market liquidity and volatility;
- Changes in investor sentiment or consumer spending or savings behavior;
- Ability of the Firm to manage effectively its capital and liquidity;
- Changes in credit ratings assigned to the Firm or its subsidiaries;
- Damage to the Firm’s reputation;
- Ability of the Firm to appropriately address social, environmental and sustainability concerns that may arise, including from its business activities;
- Ability of the Firm to deal effectively with an economic slowdown or other economic or market disruption, including, but not limited to, in the interest rate environment;
- Technology changes instituted by the Firm, its counterparties or competitors;
- The effectiveness of the Firm’s control agenda;
- Ability of the Firm to develop or discontinue products and services, and the extent to which products or services previously sold by the Firm require the Firm to incur liabilities or absorb losses not contemplated at their initiation or origination;
- Acceptance of the Firm’s new and existing products and services by the marketplace and the ability of the Firm to innovate and to increase market share;
- Ability of the Firm to attract and retain qualified employees;
- Ability of the Firm to control expenses;
- Competitive pressures;
- Changes in the credit quality of the Firm’s clients, customers and counterparties;
- Adequacy of the Firm’s risk management framework, disclosure controls and procedures and internal control over financial reporting;
- Adverse judicial or regulatory proceedings;
- Ability of the Firm to determine accurate values of certain assets and liabilities;
- Occurrence of natural or man-made disasters or calamities, including health emergencies, the spread of infectious diseases, epidemics or pandemics, an outbreak or escalation of hostilities or other geopolitical instabilities, the effects of climate change or extraordinary events beyond the Firm’s control, and the Firm’s ability to deal effectively with disruptions caused by the foregoing;
- Ability of the Firm to maintain the security of its financial, accounting, technology, data processing and other operational systems and facilities;
- Ability of the Firm to withstand disruptions that may be caused by any failure of its operational systems or those of third parties;
- Ability of the Firm to effectively defend itself against cyber attacks and other attempts by unauthorized parties to access information of the Firm or its customers or to disrupt the Firm’s systems; and
- The other risks and uncertainties detailed in Part I, Item 1A: Risk Factors in JPMorganChase’s 2024 Form 10-K.

Any forward-looking statements made by or on behalf of the Firm speak only as of the date they are made, and JPMorganChase does not undertake to update any forward-looking statements. The reader should, however, consult any further disclosures of a forward-looking nature the Firm may make in any subsequent Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q or Current Reports on Form 8-K.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Note 1 – Basis of presentation

JPMorgan Chase & Co. (“JPMorganChase” or the “Firm”), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the U.S., with operations worldwide. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Refer to Note 25 for further discussion of the Firm's reportable business segments.

The accounting and financial reporting policies of JPMorganChase and its subsidiaries conform to U.S. GAAP. Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by regulatory authorities.

The preparation of the unaudited Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expense, and disclosures of contingent assets and liabilities. Actual results could be different from these estimates. In the opinion of management, all normal, recurring adjustments have been included such that this interim financial information is fairly stated.

These unaudited Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and related notes thereto included in JPMorganChase's 2024 Form 10-K.

Consolidation

The Consolidated Financial Statements include the accounts of JPMorganChase and other entities in which the Firm has a controlling financial interest. All material intercompany balances and transactions have been eliminated.

Assets held for clients in an agency or fiduciary capacity by the Firm are not assets of JPMorganChase and are not included on the Consolidated balance sheets.

The Firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity.

Refer to Notes 1 and 14 of JPMorganChase's 2024 Form 10-K for a further description of JPMorganChase's accounting policies regarding consolidation.

Offsetting assets and liabilities

U.S. GAAP permits entities to present derivative receivables and derivative payables with the same counterparty and the related cash collateral receivables and payables on a net basis on the Consolidated balance sheets when a legally enforceable master netting agreement exists. U.S. GAAP also permits securities sold and purchased under repurchase agreements and securities borrowed or loaned under securities loan agreements to be presented net when specified conditions are met, including the existence of a legally enforceable master netting agreement. The Firm has elected to net such balances where it has determined that the specified conditions are met. Refer to Note 1 of JPMorganChase's 2024 Form 10-K for further information on offsetting assets and liabilities.

Note 2 – Fair value measurement

Refer to Note 2 of JPMorganChase’s 2024 Form 10-K for a discussion of the Firm’s valuation methodologies for assets, liabilities and lending-related commitments measured at fair value and the fair value hierarchy.

The following table presents the assets and liabilities reported at fair value as of March 31, 2025 and December 31, 2024, by major product category and fair value hierarchy.

Assets and liabilities measured at fair value on a recurring basis

(a) At March 31, 2025 and December 31, 2024, included total U.S. GSE obligations of \$152.5 billion and \$120.1 billion, respectively, which were mortgage-related.

(b) Physical commodities inventories are generally accounted for at the lower of cost or net realizable value. "Net realizable value" is a term defined in U.S. GAAP as not exceeding fair value less costs to sell ("transaction costs"). Transaction costs for the Firm's physical commodities inventories are either not applicable or immaterial to the value of the inventory. Therefore, net realizable value approximates fair value for the Firm's physical commodities inventories. When fair value hedging has been applied (or when net realizable value is below cost), the carrying value of physical commodities approximates fair value, because under fair value hedge accounting, the cost basis is adjusted for changes in

fair value. Refer to Note 4 for a further discussion of the Firm's hedge accounting relationships. To provide consistent fair value disclosure information, all physical commodities inventories have been included in each period presented.

- (c) Balances reflect the reduction of securities owned (long positions) by the amount of identical securities sold but not yet purchased (short positions).
- (d) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not required to be classified in the fair value hierarchy. At March 31, 2025 and December 31, 2024, the fair values of these investments, which include certain hedge funds, private equity funds, real estate and other funds, were \$1.1 billion and \$1.0 billion, respectively, primarily reported in other assets.
- (e) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral received and paid when a legally enforceable master netting agreement exists. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

Level 3 valuations

Refer to Note 2 of JPMorganChase's 2024 Form 10-K for further information on the Firm's valuation process and a detailed discussion of the determination of fair value for individual financial instruments.

The following table presents the Firm's primary level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments, the significant unobservable inputs, the range of values for those inputs and the weighted or arithmetic averages of such inputs. While the determination to classify an instrument within level 3 is based on the significance of the unobservable inputs to the overall fair value measurement, level 3 financial instruments typically include observable components (that is, components that are actively quoted and can be validated to external sources) in addition to the unobservable components. The level 1 and/or level 2 inputs are not included in the table. In addition, the Firm manages the risk of the observable components of level 3 financial instruments using securities and derivative positions that are classified within levels 1 or 2 of the fair value hierarchy.

The range of values presented in the table is representative of the highest and lowest level input used to value the significant groups of instruments within a product/instrument classification. Where provided, the weighted averages of the input values presented in the table are calculated based on the fair value of the instruments that the input is being used to value.

In the Firm's view, the input range, weighted and arithmetic average values do not reflect the degree of input uncertainty or an assessment of the reasonableness of the Firm's estimates and assumptions. Rather, they reflect the characteristics of

the various instruments held by the Firm and the relative distribution of instruments within the range of characteristics. For example, two option contracts may have similar levels of market risk exposure and valuation uncertainty, but may have significantly different implied volatility levels because the option contracts have different underlyings, tenors, or strike prices. The input range and weighted and arithmetic average values will therefore vary from period-to-period and parameter-to-parameter based on the characteristics of the instruments held by the Firm at each balance sheet date.

- (a) The categories presented in the table have been aggregated based upon the product type, which may differ from their classification on the Consolidated balance sheets. Furthermore, the inputs presented for each valuation technique in the table are, in some cases, not applicable to every instrument valued using the technique as the characteristics of the instruments can differ.
- (b) Comprises U.S. GSE and government agency securities of \$390 million, nonagency securities of \$5 million and non-trading loans of \$451 million.
- (c) Comprises nonagency securities of \$15 million, trading loans of \$66 million and non-trading loans of \$1.3 billion.
- (d) Comprises trading loans of \$737 million and non-trading loans of \$605 million.
- (e) Long-term debt, short-term borrowings and deposits include structured notes issued by the Firm that are financial instruments that typically contain embedded derivatives. The estimation of the fair value of structured notes includes the derivative features embedded within the instrument. The significant unobservable inputs are broadly consistent with those presented for derivative receivables.
- (f) Includes equity securities of \$764 million including \$631 million in Other assets, for which quoted prices are not readily available and the fair value is generally based on internal valuation techniques such as EBITDA multiples and comparable analysis. All other level 3 assets and liabilities are insignificant both individually and in aggregate.
- (g) Price is a significant unobservable input for certain instruments. When quoted market prices are not readily available, reliance is generally placed on price-based internal valuation techniques. The price input is expressed assuming a par value of \$100.
- (h) Forward equity price is expressed as a percentage of the current equity price.
- (i) Amounts represent weighted averages except for derivative related inputs where arithmetic averages are used.

Changes in and ranges of unobservable inputs

Refer to Note 2 of JPMorganChase's 2024 Form 10-K for a discussion of the impact on fair value of changes in unobservable inputs and the relationships between unobservable inputs as well as a description of attributes of the underlying instruments and external market factors that affect the range of inputs used in the valuation of the Firm's positions.

Changes in level 3 recurring fair value measurements

The following tables include a rollforward of the Consolidated balance sheets amounts (including changes in fair value) for financial instruments classified by the Firm within level 3 of the fair value hierarchy for the three months ended March 31, 2025 and 2024. When a determination is made to classify a financial instrument within level 3, the determination is based on the significance of the unobservable inputs to the overall fair value measurement. However, level 3 financial instruments typically include, in addition to the unobservable or level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources); accordingly, the gains and losses in the table below include changes in fair value due in part to observable factors that are part of the valuation methodology. The Firm risk-manages the observable components of level 3 financial instruments using securities and derivative positions that are classified within level 1 or 2 of the fair value hierarchy; as these level 1 and level 2 risk management instruments are not included below, the gains or losses in the following tables do not reflect the effect of the Firm's risk management activities related to such level 3 instruments.

- (a) Level 3 assets at fair value as a percentage of total Firm assets at fair value (including assets measured at fair value on a nonrecurring basis) were 1% and 2% at March 31, 2025 and December 31, 2024, respectively. Level 3 liabilities at fair value as a percentage of total Firm liabilities at fair value (including liabilities measured at fair value on a nonrecurring basis) were 6% and 9% at March 31, 2025 and December 31, 2024, respectively.
- (b) All level 3 derivatives are presented on a net basis, irrespective of the underlying counterparty.
- (c) Primarily reported in principal transactions revenue, except for changes in fair value for CCB mortgage loans and lending-related commitments originated with the intent to sell, and mortgage loan purchase commitments, which are reported in mortgage fees and related income.
- (d) Changes in fair value for MSRs are reported in mortgage fees and related income.
- (e) Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue, and were not material for the three months ended March 31, 2025 and 2024. Unrealized (gains)/losses are reported in OCI, and were \$(73) million and \$40 million for the three months ended March 31, 2025 and 2024, respectively.
- (f) Loan originations are included in purchases.
- (g) Includes financial assets and liabilities that have matured, been partially or fully repaid, impacts of modifications, deconsolidations associated with beneficial interests in VIEs and other items.

Level 3 analysis

Consolidated balance sheets changes

The following describes significant changes to level 3 assets since December 31, 2024, for those items measured at fair value on a recurring basis. Refer to Assets and liabilities measured at fair value on a nonrecurring basis on page 93 for further information on changes impacting items measured at fair value on a nonrecurring basis.

Three months ended March 31, 2025

Level 3 assets were \$24.2 billion at March 31, 2025, reflecting an increase of \$430 million from December 31, 2024.

The increase for the three months ended March 31, 2025 was driven by higher:

- Gross derivative receivables of \$653 million due to gains and purchases largely offset by settlements.

partially offset by

- lower trading loans of \$285 million due to net transfers.

Refer to the sections below for additional information.

Transfers between levels for instruments carried at fair value on a recurring basis

For the three months ended March 31, 2025 and 2024, there were no significant transfers from level 2 into level 3 or from level 3 into level 2.

All transfers are based on changes in the observability and/or significance of the valuation inputs and are assumed to occur at the beginning of the quarterly reporting period in which they occur.

Gains and losses

The following describes significant components of total realized/unrealized gains/(losses) for instruments measured at fair value on a recurring basis for the periods indicated. These amounts exclude any effects of the Firm's risk management activities where the financial instruments are classified as level 1 and 2 of the fair value hierarchy. Refer to Changes in level 3 recurring fair value measurements rollforward tables on pages 89-92 for further information on these instruments.

Three months ended March 31, 2025

- \$2.5 billion of net gains on assets, driven by gains in net derivative receivables due to market movements partially offset by losses on MSRs reflecting faster prepayment speeds on lower rates.
- \$127 million of net gains on liabilities, driven by gains in long-term debt due to market movements partially offset by losses in deposits and short-term borrowings due to market movements.

Three months ended March 31, 2024

- \$799 million of net losses on assets, predominantly driven by losses in net equity derivative receivables due to market movements.
- \$516 million of net losses on liabilities, predominantly driven by losses in long-term debt due to market movements.

Refer to Note 14 for information on MSRs.

Credit and funding adjustments — derivatives

The following table provides the impact of credit and funding adjustments on principal transactions revenue in the respective periods, excluding the effect of any associated hedging activities. The FVA presented below includes the impact of the Firm's own credit quality on the inception value of liabilities as well as the impact of changes in the Firm's own credit quality over time.

(in millions)	Three months ended March 31,	
	2025	2024
Credit and funding adjustments:		
Derivatives CVA	\$ (45)	\$ 76
Derivatives FVA	(25)	57

Refer to Note 2 of JPMorganChase's 2024 Form 10-K for further information about both credit and funding adjustments, as well as information about valuation adjustments on fair value option elected liabilities.

Assets and liabilities measured at fair value on a nonrecurring basis

The following tables present the assets and liabilities held as of March 31, 2025 and 2024, for which nonrecurring fair value adjustments were recorded during the three months ended March 31, 2025 and 2024, by major product category and fair value hierarchy.

March 31, 2025 (in millions)	Fair value hierarchy			Total fair value
	Level 1	Level 2	Level 3	
Loans	\$ —	\$ 994	\$ 441	\$ 1,435
Other assets ^(a)	—	6	258	264
Total assets measured at fair value on a nonrecurring basis	\$ —	\$ 1,000	\$ 699	\$ 1,699
Accounts payable and other liabilities	—	—	1	1
Total liabilities measured at fair value on a nonrecurring basis	\$ —	\$ —	\$ 1	\$ 1

March 31, 2024 (in millions)	Fair value hierarchy			Total fair value
	Level 1	Level 2	Level 3	
Loans	\$ —	\$ 871	\$ 468	\$ 1,339
Other assets	—	9	213	222
Total assets measured at fair value on a nonrecurring basis	\$ —	\$ 880	\$ 681	\$ 1,561
Accounts payable and other liabilities	—	—	—	—
Total liabilities measured at fair value on a nonrecurring basis	\$ —	\$ —	\$ —	\$ —

(a) Included equity securities without readily determinable fair values that were adjusted based on observable price changes in orderly transactions from an identical or similar investment of the same issuer (measurement alternative). Of the \$258 million in level 3 assets measured at fair value on a nonrecurring basis as of March 31, 2025, \$226 million related to equity securities adjusted based on the measurement alternative. These equity securities are classified as level 3 due to the infrequency of the observable prices and/or the restrictions on the shares.

Nonrecurring fair value changes

The following table presents the total change in value of assets and liabilities for which fair value adjustments have been recognized for the three months ended March 31, 2025 and 2024, related to assets and liabilities held at those dates.

(in millions)	Three months ended March 31,	
	2025	2024
Loans	\$ (74)	\$ (60)
Other assets ^(a)	27	(41)
Accounts payable and other liabilities	(1)	—
Total nonrecurring fair value gains/ (losses)	\$ (48)	\$ (101)

(a) Included \$34 million and \$(39) million for the three months ended March 31, 2025 and 2024, respectively, of net gains/ (losses) as a result of the measurement alternative.

Equity securities without readily determinable fair values

The Firm measures certain equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer (i.e., measurement alternative), with such changes recognized in other income.

In its determination of the new carrying values upon observable price changes, the Firm may adjust the prices if deemed necessary to arrive at the Firm's estimated fair values. Such adjustments may include adjustments to reflect the different rights and obligations of similar securities, and other adjustments that are consistent with the Firm's valuation techniques for private equity direct investments.

The following table presents the carrying value of equity securities without readily determinable fair values held as of March 31, 2025 and 2024, that are measured under the measurement alternative and the related adjustments recorded during the periods presented for those securities with observable price changes. These securities are included in the nonrecurring fair value tables when applicable price changes are observable.

As of or for the period ended, (in millions)	Three months ended March 31,	
	2025	2024
Other assets		
Carrying value ^(a)	\$ 3,988	\$ 4,467
Upward carrying value changes ^(b)	52	20
Downward carrying value changes/impairment ^(c)	(18)	(59)

(a) The carrying value as of December 31, 2024 was \$3.7 billion. The period-end carrying values reflect cumulative purchases and sales in addition to upward and downward carrying value changes.

(b) The cumulative upward carrying value changes between January 1, 2018 and March 31, 2025 were \$1.2 billion.

(c) The cumulative downward carrying value changes/impairment between January 1, 2018 and March 31, 2025 were \$(1.5) billion.

Included in other assets above is the Firm's interest in approximately 18.6 million Visa Class B-2 common shares ("Visa B-2 shares") and 37.2 million Visa Class B-1 common shares ("Visa B-1 shares") reflected in the Firm's principal investment portfolio as of March 31, 2025 and 2024, respectively.

The Visa B-2 shares are subject to certain transfer restrictions and are convertible into Visa Class A common shares ("Visa A shares") at a specified conversion rate upon final resolution of certain litigation matters involving Visa. The conversion rate of Visa B-2 shares to Visa A shares was 1.5342 at March 31, 2025 and may be adjusted by Visa depending on developments related to the litigation matters. The outcome of those litigation matters, and the effect that the resolution of those matters may have on the conversion rate, is unknown. Accordingly, as of March 31, 2025, there is significant uncertainty regarding when the transfer restrictions on Visa B-2 shares may be terminated and what the final conversion rate for the Visa B-2 shares will be. As a result of these considerations, as well as differences in voting rights, Visa B-2 shares are not considered to be similar to Visa A shares, and are held at their nominal carryover basis.

Separately, in connection with sales of Visa B shares prior to 2024, the Firm has entered into derivative instruments with the purchasers of the shares under which the Firm retains the risk associated with changes in the conversion rate. As of March 31, 2025, the Firm held derivative instruments associated with 11.6 million Visa B-2 shares related to Visa B share sales prior to 2024, which are all subject to similar terms and conditions. Refer to page 200 of JPMorganChase's 2024 Form 10-K for further information.

Additional disclosures about the fair value of financial instruments that are not carried on the Consolidated balance sheets at fair value

The following table presents, by fair value hierarchy classification, the carrying values and estimated fair values at March 31, 2025 and December 31, 2024, of financial assets and liabilities, excluding financial instruments that are carried at fair value on a recurring basis, and their classification within the fair value hierarchy.

(in billions)	March 31, 2025					December 31, 2024

Long-term debt	300.4	—	250.2	51.6	301.8	300.6	—	251.2	50.7	301.9

(a) Fair value is typically estimated using a discounted cash flow model that incorporates the characteristics of the underlying loans (including principal, contractual interest rate and contractual fees) and other key inputs, including expected lifetime credit losses, interest rates, prepayment rates, and primary origination or secondary market spreads. For certain loans, the fair value is measured based on the value of the underlying collateral. Carrying value of the loan takes into account the loan's allowance for loan losses, which represents the loan's expected credit losses over its remaining expected life. The difference between the estimated fair value and carrying value of a loan is generally attributable to changes in market interest rates, including credit spreads, market liquidity premiums and other factors that affect the fair value of a loan but do not affect its carrying value.

(b) Excludes lending-related commitments disclosed in the table below.

The majority of the Firm's lending-related commitments are not carried at fair value on a recurring basis on the Consolidated balance sheets. The carrying value and the estimated fair value of these wholesale lending-related commitments were as follows for the periods indicated.

(in billions)	March 31, 2025					December 31, 2024				
	Carrying value ^{(a)(b)}	Estimated fair value hierarchy			Total estimated fair value	Carrying value ^{(a)(b)}	Estimated fair value hierarchy			Total estimated fair value
		Level 1	Level 2	Level 3			Level 1	Level 2	Level 3	
Wholesale lending-related commitments	\$ 2.8	\$ —	\$ —	\$ 4.5	\$ 4.5	\$ 2.7	\$ —	\$ —	\$ 4.4	\$ 4.4

(a) Excludes the current carrying values of the guarantee liability and the offsetting asset, each of which is recognized at fair value at the inception of the guarantees.

(b) Includes the wholesale allowance for lending-related commitments.

The Firm does not estimate the fair value of consumer off-balance sheet lending-related commitments. In many cases, the Firm can reduce or cancel these commitments with or without notice to the borrower, as permitted by law, or in accordance with the contract. Refer to page 183 of JPMorganChase's 2024 Form 10-K for a further discussion of the valuation of lending-related commitments.

Note 3 – Fair value option

The fair value option provides an option to elect fair value for selected financial assets, financial liabilities, unrecognized firm commitments, and written loan commitments.

The Firm has elected to measure certain instruments at fair value for several reasons including to mitigate income statement volatility caused by the differences between the measurement basis of elected instruments (e.g., certain instruments that otherwise would be accounted for on an accrual basis) and the associated risk management arrangements that are accounted for on a fair value basis, as well as to better reflect those instruments that are managed on a fair value basis.

The Firm's election of fair value includes the following instruments:

- Loans purchased or originated as part of securitization warehousing activity, subject to bifurcation accounting, or managed on a fair value basis, including lending-related commitments
- Certain securities financing agreements
- Owned beneficial interests in securitized financial assets that contain embedded credit derivatives, which would otherwise be required to be separately accounted for as a derivative instrument
- Structured notes and other hybrid instruments, which are predominantly financial instruments that contain embedded derivatives, that are issued or transacted as part of client-driven activities
- Certain long-term beneficial interests issued by CIB's consolidated securitization trusts where the underlying assets are carried at fair value

Changes in fair value under the fair value option election

The following table presents the changes in fair value included in the Consolidated statements of income for the three months ended March 31, 2025 and 2024, for items for which the fair value option was elected. The profit and loss information presented below only includes the financial instruments that were elected to be measured at fair value; related risk management instruments, which are required to be measured at fair value, are not included in the table.

(in millions)	Three months ended March 31,					
	2025			2024		
	Principal transactions	All other income	Total changes in fair value recorded ^(e)	Principal transactions	All other income	Total changes in fair value recorded ^(e)

Other liabilities	2	—	2	1	—	1
Long-term debt ^{(a)(b)}	(185)	(6) ^{(c)(d)}	(191)	(934)	(8) ^{(c)(d)}	(942)

(a) Unrealized gains/(losses) due to instrument-specific credit risk (DVA) for liabilities for which the fair value option has been elected are recorded in OCI, while realized gains/(losses) are recorded in principal transactions revenue. Realized gains/(losses) due to instrument-specific credit risk recorded in principal transactions revenue were not material for the three months ended March 31, 2025 and 2024.

(b) Long-term debt measured at fair value predominantly relates to structured notes. Although the risk associated with the structured notes is actively managed, the gains/(losses) reported in this table do not include the income statement impact of the risk management instruments used to manage such risk.

(c) Reported in mortgage fees and related income.

(d) Reported in other income.

(e) Changes in fair value exclude contractual interest, which is included in interest income and interest expense for all instruments other than certain hybrid financial instruments in CIB. Refer to Note 6 for further information regarding interest income and interest expense.

Difference between aggregate fair value and aggregate remaining contractual principal balance outstanding

The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of March 31, 2025 and December 31, 2024, for loans, long-term debt and long-term beneficial interests for which the fair value option has been elected.

(in millions)	March 31, 2025			December 31, 2024		
	Contractual principal outstanding	Fair value	Fair value over/ (under) contractual principal outstanding	Contractual principal outstanding	Fair value	Fair value over/ (under) contractual principal outstanding
Loans						
Nonaccrual loans						
Loans reported as trading assets	\$ 3,305	\$ 345	\$ (2,960)	\$ 3,429	\$ 464	\$ (2,965)
Loans	1,345	1,102	(243)	1,711	1,492	(219)
Subtotal	4,650	1,447	(3,203)	5,140	1,956	(3,184)
90 or more days past due and government guaranteed						
Loans ^(a)	48	43	(5)	50	45	(5)
All other performing loans^(b)						
Loans reported as trading assets	15,494	14,079	(1,415)	12,171	10,852	(1,319)
Loans ^(c)	43,868	43,388	(480)	40,342	39,813	(529)
Subtotal	59,362	57,467	(1,895)	52,513	50,665	(1,848)
Total loans	\$ 64,060	\$ 58,957	\$ (5,103)	\$ 57,703	\$ 52,666	\$ (5,037)
Long-term debt						
Principal-protected debt	\$ 62,499 ^(e)	\$ 52,078	\$ (10,421)	\$ 57,414 ^(e)	\$ 47,780	\$ (9,634)
Nonprincipal-protected debt ^(d)	NA	54,770	NA	NA	53,000	NA
Total long-term debt	NA	\$ 106,848	NA	NA	\$ 100,780	NA
Long-term beneficial interests						
Nonprincipal-protected debt ^(d)	NA	\$ 7	NA	NA	\$ 1	NA
Total long-term beneficial interests	NA	\$ 7	NA	NA	\$ 1	NA

(a) These balances are excluded from nonaccrual loans as the loans are insured and/or guaranteed by U.S. government agencies.

(b) There were no performing loans that were ninety days or more past due as of March 31, 2025 and December 31, 2024.

(c) Includes loans insured and/or guaranteed by U.S. government agencies less than 90 days past due.

(d) Remaining contractual principal is not applicable to nonprincipal-protected structured notes and long-term beneficial interests. Unlike principal-protected structured notes and long-term beneficial interests, for which the Firm is obligated to return a stated amount of principal at maturity, nonprincipal-protected structured notes and long-term beneficial interests do not obligate the Firm to return a stated amount of principal at maturity, but for structured notes to return an amount based on the performance of an underlying variable or derivative feature embedded in the note. However, investors are exposed to the credit risk of the Firm as issuer for both nonprincipal-protected and principal-protected notes.

(e) Where the Firm issues principal-protected zero-coupon or discount notes, the balance reflects the contractual principal payment at maturity or, if applicable, the contractual principal payment at the Firm's next call date.

At March 31, 2025 and December 31, 2024, the contractual amount of lending-related commitments for which the fair value option was elected was \$12.3 billion and \$12.2 billion, respectively, with a corresponding fair value of \$3 million and \$50 million, respectively. Refer to Note 28 of JPMorganChase's 2024 Form 10-K, and Note 22 of this Form 10-Q for further information regarding off-balance sheet lending-related financial instruments.

Structured note products by balance sheet classification and risk component

The following table presents the fair value of structured notes, by balance sheet classification and the primary risk type.

(in millions)	March 31, 2025				December 31, 2024			
	Long-term debt	Short-term borrowings	Deposits	Total	Long-term debt	Short-term borrowings	Deposits	Total
Risk exposure								
Interest rate	\$ 50,201	\$ 1,305	\$ 33,432	\$ 84,938	\$ 46,220	\$ 1,065	\$ 28,871	\$ 76,156
Credit	6,836	904	—	7,740	6,213	1,242	—	7,455
Foreign exchange	2,419	1,507	272	4,198	2,309	1,058	416	3,783
Equity	45,715	9,641	3,083	58,439	44,149	7,881	2,986	55,016

Total structured notes	\$ 106,195	\$ 13,642	\$ 36,787	\$ 156,624	\$ 100,222	\$ 11,308	\$ 32,274	\$ 143,804

(a) Excludes deposits linked to precious metals for which the fair value option has not been elected of \$1.3 billion and \$869 million for the periods ended March 31, 2025 and December 31, 2024, respectively.

Note 4 – Derivative instruments

JPMorganChase makes markets in derivatives for clients and also uses derivatives to hedge or manage its own risk exposures. Refer to Note 5 of JPMorganChase’s 2024 Form 10-K for a further discussion of the Firm’s use of and accounting policies regarding derivative instruments.

The Firm’s disclosures are based on the accounting treatment and purpose of these derivatives. A limited number of the Firm’s derivatives are designated in

hedge accounting relationships and are disclosed according to the type of hedge (fair value hedge, cash flow hedge, or net investment hedge). Derivatives not designated in hedge accounting relationships include certain derivatives that are used to manage risks associated with specified assets and liabilities (“specified risk management” positions) as well as derivatives used in the Firm’s market-making businesses or for other purposes.

The following table outlines the Firm’s primary uses of derivatives and the related hedge accounting designation or disclosure category.

Type of Derivative	Use of Derivative	Designation and disclosure	Affected segment or unit	10-Q page reference
Manage specifically identified risk exposures in qualifying hedge accounting relationships:				
• Interest rate	Hedge fixed rate assets and liabilities	Fair value hedge	Corporate	106-107
• Interest rate	Hedge floating-rate assets and liabilities	Cash flow hedge	Corporate	108
• Foreign exchange	Hedge foreign currency-denominated assets and liabilities	Fair value hedge	Corporate	106-107
• Foreign exchange	Hedge foreign currency-denominated forecasted revenue and expense	Cash flow hedge	Corporate	108
• Foreign exchange	Hedge the value of the Firm’s investments in non-U.S. dollar functional currency entities	Net investment hedge	Corporate	108
• Commodity	Hedge commodity inventory	Fair value hedge	CIB, AWM	106-107
Manage specifically identified risk exposures not designated in qualifying hedge accounting relationships:				
• Interest rate	Manage the risk associated with mortgage commitments, warehouse loans and MSRs	Specified risk management	CCB	109
• Credit	Manage the credit risk associated with wholesale lending exposures	Specified risk management	CIB, AWM	109
• Interest rate and foreign exchange	Manage the risk associated with certain other specified assets and liabilities	Specified risk management	Corporate, CIB	109
Market-making derivatives and other activities:				
• Various	Market-making and related risk management	Market-making and other	CIB	109
• Various	Other derivatives	Market-making and other	CIB, AWM, Corporate	109

Notional amount of derivative contracts

The following table summarizes the notional amount of free-standing derivative contracts outstanding as of March 31, 2025 and December 31, 2024.

(in billions)	Notional amounts ^(b)	
	March 31, 2025	December 31, 2024
Interest rate contracts		
Swaps	\$ 23,156	\$ 20,437
Futures and forwards	4,723	3,067
Written options	3,286	3,067
Purchased options	3,211	3,089
Total interest rate contracts	34,376	29,660
Credit derivatives^(a)	1,566	1,191
Foreign exchange contracts		
Cross-currency swaps	4,986	4,509
Spot, futures and forwards	9,111	7,005
Written options	1,283	1,015
Purchased options	1,258	984
Total foreign exchange contracts	16,638	13,513
Equity contracts		
Swaps	927	850
Futures and forwards	233	206
Written options	991	914
Purchased options	853	788
Total equity contracts	3,004	2,758
Commodity contracts		
Swaps	168	148
Spot, futures and forwards	234	191
Written options	144	137
Purchased options	129	125
Total commodity contracts	675	601
Total derivative notional amounts	\$ 56,259	\$ 47,723

(a) Refer to the Credit derivatives discussion on pages 110-111 for more information on volumes and types of credit derivative contracts.

(b) Represents the sum of gross long and gross short third-party notional derivative contracts.

While the notional amounts disclosed above give an indication of the volume of the Firm's derivatives activity, the notional amounts significantly exceed, in the Firm's view, the possible losses that could arise from such transactions. For most derivative contracts, the notional amount is not exchanged; it is simply a reference amount used to calculate payments.

Impact of derivatives on the Consolidated balance sheets

The following table summarizes information on derivative receivables and payables (before and after netting adjustments) that are reflected on the Firm's Consolidated balance sheets as of March 31, 2025 and December 31, 2024, by accounting designation (e.g., whether the derivatives were designated in qualifying hedge accounting relationships or not) and contract type.

Free-standing derivative receivables and payables^(a)

(a) Balances exclude structured notes for which the fair value option has been elected. Refer to Note 3 for further information.

(b) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral receivables and payables when a legally enforceable master netting agreement exists.

Derivatives netting

The following tables present, as of March 31, 2025 and December 31, 2024, gross and net derivative receivables and payables by contract and settlement type. Derivative receivables and payables, as well as the related cash collateral from the same counterparty, have been netted on the Consolidated balance sheets where the Firm has obtained an appropriate legal opinion with respect to the master netting agreement. Where such a legal opinion has not been either sought or obtained, amounts are not eligible for netting on the Consolidated balance sheets, and those derivative receivables and payables are shown separately in the tables.

In addition to the cash collateral received and transferred that is presented on a net basis with derivative receivables and payables, the Firm receives and transfers additional collateral (financial instruments and cash). These amounts mitigate counterparty credit risk associated with the Firm's derivative instruments, but are not eligible for net presentation:

- collateral that consists of liquid securities and other cash collateral held at third-party custodians, which are shown separately as "Collateral not nettable on the Consolidated balance sheets" in the tables, up to the fair value exposure amount. For the purpose of this disclosure, the definition of liquid securities is consistent with the definition of high quality liquid assets as defined in the LCR rule;
- the amount of collateral held or transferred that exceeds the fair value exposure at the individual counterparty level, as of the date presented, which is excluded from the tables; and
- collateral held or transferred that relates to derivative receivables or payables where an appropriate legal opinion has not been either sought or obtained with respect to the master netting agreement, which is excluded from the tables.

Derivative payables where an appropriate legal opinion has not been either sought or obtained	8,092		8,092	8,123		8,123
Total derivative payables recognized on the Consolidated balance sheets	\$ 593,912		\$ 37,232	\$ 653,218		\$ 39,661
Collateral not nettable on the Consolidated balance sheets ^{(b)(c)}			(9,673)			(10,163)
Net amounts			\$ 27,559			\$ 29,498

(a) Exchange-traded derivative balances that relate to futures contracts are settled daily.

(b) Includes liquid securities and other cash collateral held at third-party custodians related to derivative instruments where an appropriate legal opinion has been obtained. For some counterparties, the collateral amounts of financial instruments may exceed the derivative receivables and derivative payables balances. Where this is the case, the total amount reported is limited to the net derivative receivables and net derivative payables balances with that counterparty.

(c) Derivative collateral relates only to OTC and OTC-cleared derivative instruments.

(d) Net derivatives receivable included cash collateral netted of \$46.9 billion and \$51.9 billion at March 31, 2025 and December 31, 2024. Net derivatives payable included cash collateral netted of \$53.8 billion and \$60.8 billion at March 31, 2025 and December 31, 2024, respectively. Derivative cash collateral relates to OTC and OTC-cleared derivative instruments.

Liquidity risk and credit-related contingent features

Refer to Note 5 of JPMorganChase's 2024 Form 10-K for a more detailed discussion of liquidity risk and credit-related contingent features related to the Firm's derivative contracts.

The following table shows the aggregate fair value of net derivative payables related to OTC and OTC-cleared derivatives that contain contingent collateral or termination features that may be triggered upon a ratings downgrade, and the associated collateral the Firm has posted in the normal course of business, at March 31, 2025 and December 31, 2024.

OTC and OTC-cleared derivative payables containing downgrade triggers

(in millions)	March 31, 2025	December 31, 2024
Aggregate fair value of net derivative payables	\$ 13,632	\$ 15,371
Collateral posted	14,027	15,204

The following table shows the impact of a single-notch and two-notch downgrade of the long-term issuer ratings of JPMorgan Chase & Co. and its subsidiaries, predominantly JPMorgan Chase Bank, N.A., at March 31, 2025 and December 31, 2024, related to OTC and OTC-cleared derivative contracts with contingent collateral or termination features that may be triggered upon a ratings downgrade. Derivatives contracts generally require additional collateral to be posted or terminations to be triggered when the predefined rating threshold is breached. A downgrade by a single rating agency that does not result in a rating lower than a preexisting corresponding rating provided by another major rating agency will generally not result in additional collateral (except in certain instances in which additional initial margin may be required upon a ratings downgrade), nor in termination payment requirements. The liquidity impact in the table is calculated based upon a downgrade below the lowest current rating of the rating agencies referred to in the derivative contract.

Liquidity impact of downgrade triggers on OTC and OTC-cleared derivatives

(in millions)	March 31, 2025		December 31, 2024	
	Single-notch downgrade	Two-notch downgrade	Single-notch downgrade	Two-notch downgrade
Amount of additional collateral to be posted upon downgrade ^(a)	\$ 43	\$ 1,038	\$ 119	\$ 1,205
Amount required to settle contracts with termination triggers upon downgrade ^(b)	82	815	78	458

(a) Includes the additional collateral to be posted for initial margin.

(b) Amounts represent fair values of derivative payables, and do not reflect collateral posted.

Impact of derivatives on the Consolidated statements of income

The following tables provide information related to gains and losses recorded on derivatives based on their hedge accounting designation or purpose.

Fair value hedge gains and losses

The following tables present derivative instruments, by contract type, used in fair value hedge accounting relationships, as well as pre-tax gains/(losses) recorded on such derivatives and the related hedged items for the three months ended March 31, 2025 and 2024, respectively. The Firm includes gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the related hedged item.

Three months ended March 31, 2025 (in millions)	Gains/(losses) recorded in income			Income statement impact of excluded components ^(e)		OCI impact
	Derivatives	Hedged items	Income statement impact	Amortization approach	Changes in fair value	Derivatives - Gains/(losses) recorded in OCI ^(f)
Contract type						
Interest rate ^{(a)(b)}	\$ 41	\$ 292	\$ 333	\$ —	\$ 302	\$ —
Foreign exchange ^(c)	247	(204)	43	(135)	43	37
Commodity ^(d)	(1,329)	1,400	71	—	56	—
Total	\$ (1,041)	\$ 1,488	\$ 447	\$ (135)	\$ 401	\$ 37

Three months ended March 31, 2024 (in millions)	Gains/(losses) recorded in income			Income statement impact of excluded components ^(e)		OCI impact
	Derivatives	Hedged items	Income statement impact	Amortization approach	Changes in fair value	Derivatives - Gains/(losses) recorded in OCI ^(f)
Contract type						
Interest rate ^{(a)(b)}	\$ 318	\$ (220)	\$ 98	\$ —	\$ 112	\$ —
Foreign exchange ^(c)	(139)	189	50	(116)	50	(27)
Commodity ^(d)	261	(235)	26	—	24	—
Total	\$ 440	\$ (266)	\$ 174	\$ (116)	\$ 186	\$ (27)

- (a) Primarily consists of hedges of the benchmark (e.g., Secured Overnight Financing Rate (“SOFR”)) interest rate risk of fixed-rate long-term debt and AFS securities. Gains and losses were recorded in net interest income.
- (b) Includes the amortization of income/expense associated with the inception hedge accounting adjustment applied to the hedged item. Excludes the accrual of interest on interest rate swaps and the related hedged items.
- (c) Primarily consists of hedges of the foreign currency risk of long-term debt and AFS securities for changes in spot foreign currency rates. Gains and losses related to the derivatives and the hedged items due to changes in foreign currency rates and the income statement impact of excluded components were recorded primarily in principal transactions revenue and net interest income.
- (d) Consists of overall fair value hedges of physical commodities inventories that are generally carried at the lower of cost or net realizable value (net realizable value approximates fair value). Gains and losses were recorded in principal transactions revenue.
- (e) The assessment of hedge effectiveness excludes certain components of the changes in fair values of the derivatives and hedged items such as forward points on foreign exchange forward contracts, time values and cross-currency basis spreads. Excluded components may impact earnings either through amortization of the initial amount over the life of the derivative, or through fair value changes recognized in the current period.
- (f) Represents the change in value of amounts excluded from the assessment of effectiveness under the amortization approach, predominantly cross-currency basis spreads. The amount excluded at inception of the hedge is recognized in earnings over the life of the derivative.

As of March 31, 2025 and December 31, 2024, the following amounts were recorded on the Consolidated balance sheets related to certain cumulative fair value hedge basis adjustments that are expected to reverse through the income statement in future periods as an adjustment to yield.

March 31, 2025 (in millions)	Carrying amount of the hedged items ^{(a)(b)}	Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items:		
		Active hedging relationships ^(d)	Discontinued hedging relationships ^{(d)(e)}	Total
Assets				
Investment securities - AFS	\$ 212,505 ^(c)	\$ 1,697	\$ (2,514)	\$ (817)
Liabilities				
Long-term debt	216,775	(1,361)	(9,053)	(10,414)
Beneficial interests issued by consolidated VIEs	5,353	9	(4)	5
<hr/>				
December 31, 2024 (in millions)	Carrying amount of the hedged items ^{(a)(b)}	Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items:		
		Active hedging relationships ^(d)	Discontinued hedging relationships ^{(d)(e)}	Total
Assets				
Investment securities - AFS	\$ 203,141 ^(c)	\$ (1,675)	\$ (1,959)	\$ (3,634)
Liabilities				
Long-term debt	211,288	(3,711)	(9,332)	(13,043)
Beneficial interests issued by consolidated VIEs	5,312	(30)	(5)	(35)

- (a) Excludes physical commodities with a carrying value of \$8.2 billion and \$6.2 billion at March 31, 2025 and December 31, 2024, respectively, to which the Firm applies fair value hedge accounting. As a result of the application of hedge accounting, these inventories are carried at fair value, thus recognizing unrealized gains and losses in current periods. Since the Firm exits these positions at fair value, there is no incremental impact to net income in future periods.
- (b) Excludes hedged items where only foreign currency risk is the designated hedged risk, as basis adjustments related to foreign currency hedges will not reverse through the income statement in future periods. At March 31, 2025 and December 31, 2024, the carrying amount excluded for AFS securities was \$28.6 billion and \$28.7 billion, respectively. At March 31, 2025 and December 31, 2024, the carrying amount excluded for long-term debt was \$541 million and \$518 million, respectively.
- (c) Carrying amount represents the amortized cost, net of allowance if applicable. At March 31, 2025 and December 31, 2024, the amortized cost of the portfolio layer method closed portfolios was \$70.3 billion and \$72.8 billion, of which \$47.6 billion and \$41.2 billion was designated as hedged, respectively. The amount designated as hedged is the sum of the notional amounts of all outstanding layers in each portfolio, which includes both spot starting and forward starting layers. At March 31, 2025 and December 31, 2024, the cumulative amount of basis adjustments was \$(734) million and \$(1.7) billion, which is comprised of \$462 million and \$(1.2) billion for active hedging relationships, and \$(1.2) billion and \$(566) million for discontinued hedging relationships, respectively. Refer to Note 9 for additional information.
- (d) Positive (negative) amounts related to assets represent cumulative fair value hedge basis adjustments that will reduce (increase) net interest income in future periods. Positive (negative) amounts related to liabilities represent cumulative fair value hedge basis adjustments that will increase (reduce) net interest income in future periods.
- (e) Represents basis adjustments existing on the balance sheet date associated with hedged items that have been de-designated from qualifying fair value hedging relationships.

Cash flow hedge gains and losses

The following tables present derivative instruments, by contract type, used in cash flow hedge accounting relationships, and the pre-tax gains/(losses) recorded on such derivatives, for the three months ended March 31, 2025 and 2024, respectively. The Firm includes the gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the change in cash flows on the related hedged item.

Three months ended March 31, 2025 (in millions)	Derivatives gains/(losses) recorded in income and other comprehensive income/(loss)		
	Amounts reclassified from AOCI to income	Amounts recorded in OCI	Total change in OCI for period
Contract type			
Interest rate ^(a)	\$ (599)	\$ 1,446	\$ 2,045
Foreign exchange ^(b)	(22)	141	163
Total	\$ (621)	\$ 1,587	\$ 2,208

Three months ended March 31, 2024 (in millions)	Derivatives gains/(losses) recorded in income and other comprehensive income/(loss)		
	Amounts reclassified from AOCI to income	Amounts recorded in OCI	Total change in OCI for period
Contract type			
Interest rate ^(a)	\$ (620)	\$ (1,725)	\$ (1,105)
Foreign exchange ^(b)	31	(37)	(68)
Total	\$ (589)	\$ (1,762)	\$ (1,173)

(a) Primarily consists of hedges of SOFR-indexed floating-rate assets. Gains and losses were recorded in net interest income.

(b) Primarily consists of hedges of the foreign currency risk of non-U.S. dollar-denominated revenue and expense. The income statement classification of gains and losses follows the hedged item – primarily noninterest revenue and compensation expense.

The Firm did not experience any forecasted transactions that failed to occur for the three months ended March 31, 2025 and 2024.

Over the next 12 months, the Firm expects that approximately \$(1.6) billion (after-tax) of net losses recorded in AOCI at March 31, 2025, related to cash flow hedges will be recognized in income. For cash flow hedges that have been terminated, the maximum length of time over which the derivative results recorded in AOCI will be recognized in earnings is approximately seven years, corresponding to the timing of the originally hedged forecasted cash flows. For open cash flow hedges, the maximum length of time over which forecasted transactions are hedged is approximately seven years. The Firm's longer-dated forecasted transactions relate to core lending and borrowing activities.

Net investment hedge gains and losses

The following table presents hedging instruments, by contract type, that were used in net investment hedge accounting relationships, and the pre-tax gains/(losses) recorded on such instruments for the three months ended March 31, 2025 and 2024.

Three months ended March 31, (in millions)	Gains/(losses) recorded in income ^(a) and other comprehensive income/(loss)			
	2025		2024	
	Amounts recorded in income ^(b)	Amounts recorded in OCI	Amounts recorded in income ^(b)	Amounts recorded in OCI
Foreign exchange derivatives	\$ 33	\$ (2,134)	\$ 89	\$ 1,442

(a) Certain components of hedging derivatives are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on foreign exchange forward contracts. The changes in fair value of these amounts are recorded in net interest income.

(b) Excludes amounts reclassified from AOCI to income associated with net investment hedges. There were no sales or liquidations of legal entities that resulted in reclassifications for the three months ended March 31, 2025 and 2024. Refer to Note 19 for further information.

Gains and losses on derivatives used for specified risk management purposes

The following table presents pre-tax gains/(losses) recorded on a limited number of derivatives, not designated in hedge accounting relationships, that are used to manage risks associated with certain specified assets and liabilities, including certain risks arising from mortgage commitments, warehouse loans, MSRs, wholesale lending exposures, and foreign currency-denominated assets and liabilities.

(in millions)	Derivatives gains/(losses) recorded in income	
	Three months ended March 31,	
	2025	2024
Contract type		
Interest rate ^(a)	\$ 56	\$ (223)
Credit ^(b)	(60)	(258)
Foreign exchange ^(c)	41	7
Equity ^(d)	(2)	—
Total	\$ 35	\$ (474)

(a) Primarily represents interest rate derivatives used to hedge the interest rate risk inherent in mortgage commitments, warehouse loans and MSRs, as well as written commitments to originate warehouse loans. Gains and losses were recorded predominantly in mortgage fees and related income.

(b) Relates to credit derivatives used to mitigate credit risk associated with lending exposures in the Firm's wholesale businesses. These derivatives do not include credit derivatives used to mitigate counterparty credit risk arising from derivative receivables, which is included in gains and losses on derivatives related to market-making activities and other derivatives. Gains and losses were recorded in principal transactions revenue.

(c) Primarily relates to derivatives used to mitigate foreign exchange risk of specified foreign currency-denominated assets and liabilities. Gains and losses were recorded in principal transactions revenue.

(d) Gains and losses were recorded in principal transactions revenue.

Gains and losses on derivatives related to market-making activities and other derivatives

The Firm makes markets in derivatives in order to meet the needs of customers and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. All derivatives not included in the hedge accounting or specified risk management categories above are included in this category. Gains and losses on these derivatives are primarily recorded in principal transactions revenue. Refer to Note 5 for information on principal transactions revenue.

Credit derivatives

Refer to Note 5 of JPMorganChase's 2024 Form 10-K for a more detailed discussion of credit derivatives. The following tables present a summary of the notional amounts of credit derivatives and credit-related notes the Firm sold and purchased as of March 31, 2025 and December 31, 2024. The Firm does not use notional amounts of credit derivatives as the primary measure of risk management for such derivatives, because the notional amount does not take into account the probability of the occurrence of a credit event, the recovery value of the reference obligation, or related cash instruments and economic hedges, each of which reduces, in the Firm's view, the risks associated with such derivatives.

Total credit derivatives and credit-related notes

March 31, 2025 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings ^(c)	Net protection (sold)/purchased ^(d)	Other protection purchased ^(e)
Credit derivatives				
Credit default swaps	\$ (591,524)	\$ 609,628	\$ 18,104	\$ 6,022
Other credit derivatives ^(a)	(143,716)	200,742	57,026	14,533
Total credit derivatives	(735,240)	810,370	75,130	20,555
Credit-related notes ^(b)	—	—	—	11,141
Total	\$ (735,240)	\$ 810,370	\$ 75,130	\$ 31,696

December 31, 2024 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings ^(c)	Net protection (sold)/purchased ^(d)	Other protection purchased ^(e)
Credit derivatives				
Credit default swaps	\$ (450,184)	\$ 474,554	\$ 24,370	\$ 6,858
Other credit derivatives ^(a)	(110,913)	137,927	27,014	10,169
Total credit derivatives	(561,097)	612,481	51,384	17,027
Credit-related notes ^(b)	—	—	—	10,471
Total	\$ (561,097)	\$ 612,481	\$ 51,384	\$ 27,498

(a) Other credit derivatives predominantly consist of credit swap options and total return swaps.

(b) Predominantly represents Other protection purchased by CIB.

(c) Represents the total notional amount of protection purchased where the underlying reference instrument is identical to the reference instrument on protection sold; the notional amount of protection purchased for each individual identical underlying reference instrument may be greater or lower than the notional amount of protection sold.

(d) Does not take into account the fair value of the reference obligation at the time of settlement, which would generally reduce the amount the seller of protection pays to the buyer of protection in determining settlement value.

(e) Represents protection purchased by the Firm on referenced instruments (single-name, portfolio or index) where the Firm has not sold any protection on the identical reference instrument. Also includes credit protection against certain loans and lending-related commitments in the retained lending portfolio through the issuance of credit derivatives and credit-related notes.

The following tables summarize the notional amounts by the ratings, maturity profile, and total fair value, of credit derivatives as of March 31, 2025 and December 31, 2024, where JPMorganChase is the seller of protection. The maturity profile is based on the remaining contractual maturity of the credit derivative contracts. The ratings profile is based on the rating of the reference entity on which the credit derivative contract is based. The ratings and maturity profile of credit derivatives where JPMorganChase is the purchaser of protection are comparable to the profile reflected below.

Protection sold — credit derivatives ratings^(a)/maturity profile

March 31, 2025 (in millions)	<1 year	1–5 years	>5 years	Total notional amount	Fair value of receivables ^(b)	Fair value of payables ^(b)	Net fair value
Risk rating of reference entity							
Investment-grade	\$ (163,323)	\$ (303,031)	\$ (108,238)	\$ (574,592)	\$ 4,788	\$ (1,185)	\$ 3,603
Noninvestment-grade	(45,260)	(85,886)	(29,502)	(160,648)	2,333	(2,127)	206
Total	\$ (208,583)	\$ (388,917)	\$ (137,740)	\$ (735,240)	\$ 7,121	\$ (3,312)	\$ 3,809
December 31, 2024 (in millions)							
	<1 year	1–5 years	>5 years	Total notional amount	Fair value of receivables ^(b)	Fair value of payables ^(b)	Net fair value
Risk rating of reference entity							
Investment-grade	\$ (135,950)	\$ (277,052)	\$ (33,379)	\$ (446,381)	\$ 4,593	\$ (904)	\$ 3,689
Noninvestment-grade	(42,149)	(70,525)	(2,042)	(114,716)	1,889	(1,738)	151
Total	\$ (178,099)	\$ (347,577)	\$ (35,421)	\$ (561,097)	\$ 6,482	\$ (2,642)	\$ 3,840

(a) The ratings scale is primarily based on external credit ratings defined by S&P and Moody's.

(b) Amounts are shown on a gross basis, before the benefit of legally enforceable master netting agreements including cash collateral netting.

Note 5 – Noninterest revenue and noninterest expense

Noninterest revenue

Refer to Note 6 of JPMorganChase's 2024 Form 10-K for a discussion of the components of and accounting policies for the Firm's noninterest revenue.

Investment banking fees

The following table presents the components of investment banking fees.

(in millions)	Three months ended March 31,	
	2025	2024
Underwriting		
Equity	\$ 321	\$ 354
Debt	1,169	1,003
Total underwriting	1,490	1,357
Advisory	688	597
Total investment banking fees	\$ 2,178	\$ 1,954

Principal transactions

The following table presents all realized and unrealized gains and losses recorded in principal transactions revenue. This table excludes interest income and interest expense on trading assets and liabilities, which are an integral part of the overall performance of the Firm's client-driven market-making activities in CIB and fund deployment activities in Treasury and CIO. Refer to Note 6 for further information on interest income and interest expense.

Trading revenue is presented primarily by instrument type. The Firm's client-driven market-making businesses generally utilize a variety of instrument types in connection with their market-making and related risk-management activities; accordingly, the trading revenue presented in the table below is not representative of the total revenue of any individual LOB.

(in millions)	Three months ended March 31,	
	2025	2024
Trading revenue by instrument type		
Interest rate ^(a)	\$ 1,358	\$ 1,071
Credit ^(b)	238	691
Foreign exchange	1,376	1,536
Equity	4,174	3,277
Commodity	481	200
Total trading revenue	7,627	6,775
Private equity gains/(losses)	(13)	15
Principal transactions	\$ 7,614	\$ 6,790

(a) Includes the impact of changes in funding valuation adjustments on derivatives.

(b) Includes the impact of changes in credit valuation adjustments on derivatives, net of the associated hedging activities.

Lending- and deposit-related fees

The following table presents the components of lending- and deposit-related fees.

(in millions)	Three months ended March 31,	
	2025	2024
Lending-related fees ^(a)	\$ 533	\$ 603
Deposit-related fees	1,599	1,299
Total lending- and deposit-related fees	\$ 2,132	\$ 1,902

(a) Includes the amortization of the fair value discount on certain acquired lending-related commitments associated with First Republic, predominantly in AWM and CIB. The discount, which is deferred in other liabilities and recognized on a straight-line basis over the commitment period, continues to decline as commitments expire.

Deposit-related fees include the impact of credits earned by clients that reduce such fees.

Asset management fees

The following table presents the components of asset management fees.

(in millions)	Three months ended March 31,	
	2025	2024
Asset management fees		
Investment management fees	\$ 4,603	\$ 4,059
All other asset management fees	97	87
Total asset management fees	\$ 4,700	\$ 4,146

Commissions and other fees

The following table presents the components of commissions and other fees.

(in millions)	Three months ended March 31,	
	2025	2024
Commissions and other fees		
Brokerage commissions and fees	\$ 900	\$ 763
Administration fees	649	606
All other commissions and fees ^(a)	484	436
Total commissions and other fees	\$ 2,033	\$ 1,805

(a) Includes annuity sales commissions, depository receipt-related service fees and travel-related sales commissions, as well as other service fees, which are recognized as revenue when the services are rendered.

Mortgage fees and related income: refer to Note 14 for additional information.

Card income

The following table presents the components of card income.

(in millions)	Three months ended March 31,	
	2025	2024
Interchange and merchant processing income	\$ 8,398	\$ 7,831
Rewards costs and partner payments	(6,785)	(6,171)
All other ^(a)	(397)	(442)
Total card income	\$ 1,216	\$ 1,218

(a) Predominantly represents the amortization of account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12-month period.

Other income

The following table presents certain components of other income.

(in millions)	Three months ended March 31,	
	2025	2024
Operating lease income	\$ 829	\$ 672
First Republic-related gain	588	—

Refer to Note 16 for information on operating lease income included within other income.

First Republic-related gain: On January 17, 2025, the Firm reached an agreement with the FDIC with respect to certain outstanding items related to the First Republic acquisition. As a result of the agreement, the Firm made a payment of \$609 million to the FDIC on January 31, 2025 and reduced its additional payable to the FDIC, which resulted in a gain of \$588 million recorded in other income in the first quarter of 2025. Refer to Note 34 on pages 319-321 of the Firm's 2024 Form 10-K for additional information.

Noninterest expense

Other expense

Other expense on the Firm's Consolidated statements of income includes the following:

(in millions)	Three months ended March 31,	
	2025	2024
Legal expense	\$ 121	\$ (72)
FDIC-related expense ^(a)	(11)	973
Operating losses	386	299

(a) Included an FDIC special assessment accrual release of \$323 million for the three months ended March 31, 2025, and an accrual increase of \$725 million for the three months ended March 31, 2024.

Note 6 – Interest income and interest expense

Refer to Note 7 of JPMorganChase’s 2024 Form 10-K for a description of JPMorganChase’s accounting policies regarding interest income and interest expense.

The following table presents the components of interest income and interest expense.

(in millions)	Three months ended March 31,	
	2025	2024
Interest income		
Loans ^(a)	\$ 22,420	\$ 22,874
Taxable securities	5,992	4,871
Non-taxable securities ^(b)	270	323
Total investment securities ^(a)	6,262	5,194
Trading assets - debt instruments	5,557	4,592
Federal funds sold and securities purchased under resale agreements	4,216	4,215
Securities borrowed	2,307	2,166
Deposits with banks	4,139	6,386
All other interest-earning assets ^(c)	1,952	2,011
Total interest income	\$ 46,853	\$ 47,438
Interest expense		
Interest-bearing deposits	\$ 11,077	\$ 12,234
Federal funds purchased and securities loaned or sold under repurchase agreements	5,189	3,969
Short-term borrowings	535	535
Trading liabilities – debt and all other interest-bearing liabilities ^(d)	2,091	2,636
Long-term debt	4,392	4,618
Beneficial interest issued by consolidated VIEs	296	364
Total interest expense	\$ 23,580	\$ 24,356
Net interest income	\$ 23,273	\$ 23,082
Provision for credit losses	3,305	1,884
Net interest income after provision for credit losses	\$ 19,968	\$ 21,198

(a) Includes the amortization and accretion of purchase premiums and discounts, as well as net deferred fees and costs on loans.

(b) Represents securities that are tax-exempt for U.S. federal income tax purposes.

(c) Includes interest earned on brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets which are classified in other assets on the Consolidated balance sheets.

(d) All other interest-bearing liabilities includes interest expense on brokerage-related customer payables.

Note 7 – Pension and other postretirement employee benefit plans

Refer to Note 8 of JPMorganChase’s 2024 Form 10-K for a discussion of JPMorganChase’s pension and OPEB plans.

The following table presents the net periodic benefit costs reported in the Consolidated statements of income for the Firm’s defined benefit pension, defined contribution and OPEB plans.

(in millions)	Three months ended March 31,	
	2025	2024
Total net periodic defined benefit plan cost/(credit)	\$ (65)	\$ (113)
Total defined contribution plans	435	388
Total pension and OPEB cost included in noninterest expense	\$ 370	\$ 275

As of both March 31, 2025 and December 31, 2024, the fair values of plan assets for the Firm’s significant defined benefit pension and OPEB plans were \$22.2 billion.

Note 8 – Employee share-based incentives

Refer to Note 9 of JPMorganChase’s 2024 Form 10-K for a discussion of the accounting policies and other information relating to employee share-based incentives.

The Firm recognized the following noncash compensation expense related to its various employee share-based incentive plans in its Consolidated statements of income.

(in millions)	Three months ended March 31,	
	2025	2024
Cost of prior grants of restricted stock units (“RSUs”), performance share units (“PSUs”) and stock appreciation rights (“SARs”) that are amortized over their applicable vesting periods	\$ 424	\$ 435
Accrual of estimated costs of share-based awards to be granted in future periods, predominantly those to full-career eligible employees	629	503
Total noncash compensation expense related to employee share-based incentive plans	\$ 1,053	\$ 938

In the first quarter of 2025, in connection with its annual incentive grant for the 2024 performance year, the Firm granted 12 million RSUs and 462 thousand PSUs with weighted-average grant date fair values of \$259.74 per RSU and \$261.10 per PSU.

Note 9 – Investment securities

Investment securities consist of debt securities that are classified as AFS or HTM. Debt securities classified as trading assets are discussed in Note 2.

Predominantly all of the Firm's AFS and HTM securities are held by Treasury and CIO in connection with its asset-liability management activities. At March 31, 2025, the investment securities portfolio consisted of debt securities with an average credit

rating of AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings).

Refer to Note 10 of JPMorganChase's 2024 Form 10-K for additional information regarding the investment securities portfolio.

The amortized costs and estimated fair values of the investment securities portfolio were as follows for the dates indicated.

(in millions)	March 31, 2025				December 31, 2024			
	Amortized cost ^{(c)(d)}	Gross unrealized gains	Gross unrealized losses	Fair value	Amortized cost ^{(c)(d)}	Gross unrealized gains	Gross unrealized losses	Fair value

Total held-to-maturity securities	265,084	91	22,922	242,253	274,468	152	26,720	247,900
Total investment securities, net of allowance for credit losses	\$ 667,400	\$ 1,872	\$ 27,656	\$ 641,616	\$ 685,513	\$ 1,267	\$ 32,028	\$ 654,752

(a) Represents the amount of portfolio layer method basis adjustments related to AFS securities hedged in a closed portfolio. Under U.S. GAAP portfolio layer method basis adjustments are not allocated to individual securities, however, the amounts impact the unrealized gains or losses in the table for the types of securities being hedged. Refer to Note 4 for additional information.

(b) The Firm purchased \$1.6 billion and \$479 million of HTM securities for the three months ended March 31, 2025 and 2024, respectively.

(c) The amortized cost of investment securities is reported net of allowance for credit losses of \$118 million and \$152 million at March 31, 2025 and December 31, 2024, respectively.

(d) Excludes \$3.9 billion and \$3.7 billion of accrued interest receivable at March 31, 2025 and December 31, 2024, respectively. The Firm did not reverse through interest income any accrued interest receivable for the three months ended March 31, 2025 and 2024. Refer to Note 10 of JPMorganChase's 2024 Form 10-K for further discussion of accounting policies for accrued interest receivable on investment securities.

AFS securities impairment

The following tables present the fair value and gross unrealized losses by aging category for AFS securities at March 31, 2025 and December 31, 2024. The tables exclude U.S. Treasury and government agency securities and U.S. GSE and government agency MBS with unrealized losses of \$3.1 billion and \$5.3 billion, at March 31, 2025 and December 31, 2024, respectively; changes in the value of these securities are generally driven by changes in interest rates rather than changes in their credit profile given the explicit or implicit guarantees provided by the U.S. government.

HTM securities – credit risk

Credit quality indicator

The primary credit quality indicator for HTM securities is the risk rating assigned to each security. At both March 31, 2025 and December 31, 2024, all HTM securities were rated investment grade and were current and accruing, with approximately 99% rated at least AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings).

Allowance for credit losses on investment securities

The allowance for credit losses on investment securities as of March 31, 2025 was \$118 million, which included a \$17 million reduction in allowance related to a sale of a corporate debt security. As of March 31, 2024, the allowance for credit losses in investment securities was \$154 million.

Refer to Note 10 of JPMorganChase’s 2024 Form 10-K for further discussion of accounting policies for AFS and HTM securities.

Selected impacts of investment securities on the Consolidated statements of income

Average yield ^(a)	0.58 %	1.61 %	2.50 %	3.29 %	2.50 %

- (a) Average yield is computed using the effective yield of each security owned at the end of the period, weighted based on the amortized cost of each security. The effective yield considers the contractual coupon, amortization of premiums and accretion of discounts, and the effect of related hedging derivatives, including closed portfolio hedges. Taxable-equivalent amounts are used where applicable. The effective yield excludes unscheduled principal prepayments; and accordingly, actual maturities of securities may differ from their contractual or expected maturities as certain securities may be prepaid. However, for certain callable debt securities, the average yield is calculated to the earliest call date.
- (b) For purposes of this table, the amortized cost of available-for-sale securities excludes the allowance for credit losses of \$36 million and the portfolio layer fair value hedge basis adjustments of \$463 million at March 31, 2025. The amortized cost of held-to-maturity securities also excludes the allowance for credit losses of \$82 million at March 31, 2025.
- (c) Substantially all of the Firm's U.S. residential MBS and collateralized mortgage obligations are due in 10 years or more, based on contractual maturity. The estimated weighted-average life, which reflects anticipated future prepayments, is approximately eight years for agency residential MBS, six years for agency residential collateralized mortgage obligations, and five years for nonagency residential collateralized mortgage obligations.

Note 10 – Securities financing activities

Refer to Note 11 of JPMorganChase’s 2024 Form 10-K for a discussion of accounting policies relating to securities financing activities. Refer to Note 3 for further information regarding securities financing agreements for which the fair value option has been elected. Refer to Note 23 for further information regarding assets pledged and collateral received in securities financing agreements.

The table below summarizes the gross and net amounts of the Firm’s securities financing agreements as of March 31, 2025 and December 31, 2024. When the Firm has obtained an appropriate legal opinion with respect to a master netting agreement with a counterparty and where other relevant netting criteria under U.S. GAAP are met, the Firm nets, on the Consolidated balance sheets, the balances outstanding under its securities financing agreements with the same counterparty. In addition, the Firm exchanges securities and/or cash collateral with its counterparty to reduce the economic exposure with

the counterparty, but such collateral is not eligible for net Consolidated balance sheet presentation. Where the Firm has obtained an appropriate legal opinion with respect to the counterparty master netting agreement, such collateral, along with securities financing balances that do not meet all these relevant netting criteria under U.S. GAAP, is presented in the table below as “Amounts not nettable on the Consolidated balance sheets,” and reduces the “Net amounts” presented. Where a legal opinion has not been either sought or obtained, the securities financing balances are presented gross in the “Net amounts” below. In transactions where the Firm is acting as the lender in a securities-for-securities lending agreement and receives securities that can be pledged or sold as collateral, the Firm recognizes the securities received at fair value within other assets and the obligation to return those securities within accounts payable and other liabilities on the Consolidated balance sheets.

(in millions)	March 31, 2025				
	Gross amounts	Amounts netted on the Consolidated balance sheets	Amounts presented on the Consolidated balance sheets	Amounts not nettable on the Consolidated balance sheets ^(b)	Net amounts ^(c)

- (a) Includes securities-for-securities lending agreements of \$7.9 billion and \$5.9 billion at March 31, 2025 and December 31, 2024, respectively, accounted for at fair value, where the Firm is acting as lender.
- (b) In some cases, collateral exchanged with a counterparty exceeds the net asset or liability balance with that counterparty. In such cases, the amounts reported in this column are limited to the related net asset or liability with that counterparty.
- (c) Includes securities financing agreements that provide collateral rights, but where an appropriate legal opinion with respect to the master netting agreement has not been either sought or obtained. At March 31, 2025 and December 31, 2024, included \$8.6 billion and \$8.7 billion, respectively, of securities purchased under resale agreements; \$44.4 billion and \$42.9 billion, respectively, of securities borrowed; \$33.3 billion and \$40.9 billion, respectively, of securities sold under repurchase agreements; and securities loaned and other which were not material.

The tables below present as of March 31, 2025 and December 31, 2024 the types of financial assets pledged in securities financing agreements and the remaining contractual maturity of the securities financing agreements.

Transfers not qualifying for sale accounting

At March 31, 2025 and December 31, 2024, the Firm held \$910 million and \$805 million, respectively, of financial assets for which the rights have been transferred to third parties; however, the transfers did not qualify as a sale in accordance with U.S. GAAP. These transfers have been recognized as collateralized financing transactions. The transferred assets are recorded in trading assets and loans, and the corresponding liabilities are recorded primarily in short-term borrowings and long-term debt on the Consolidated balance sheets.

Note 11 – Loans

Loan accounting framework

The accounting for a loan depends on management’s strategy for the loan. The Firm accounts for loans based on the following categories:

- Originated or purchased loans held-for-investment (i.e., “retained”)
- Loans held-for-sale
- Loans at fair value

Refer to Note 12 of JPMorganChase's 2024 Form 10-K for a detailed discussion of loans, including accounting policies. Refer to Note 3 of this Form 10-Q for further information on the Firm's elections of fair value accounting under the fair value option. Refer to Note 2 of this Form 10-Q for information on loans carried at fair value and classified as trading assets.

Loan portfolio

The Firm’s loan portfolio is divided into three portfolio segments, which are the same segments used by the Firm to determine the allowance for loan losses: Consumer, excluding credit card; Credit card; and Wholesale. Within each portfolio segment the Firm monitors and assesses the credit risk in the following classes of loans, based on the risk characteristics of each loan class.

Consumer, excluding credit card	Credit card	Wholesale ^{(c)(d)}
<ul style="list-style-type: none"> • Residential real estate^(a) • Auto and other^(b) 	<ul style="list-style-type: none"> • Credit card loans 	<ul style="list-style-type: none"> • Secured by real estate • Commercial and industrial • Other^(e)

(a) Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in CIB.

(b) Includes scored auto, business banking and consumer unsecured loans as well as overdrafts, primarily in CCB.

(c) Includes loans held in CIB, AWM, Corporate, and risk-rated exposure held in CCB, for which the wholesale methodology is applied when determining the allowance for loan losses.

(d) The wholesale portfolio segment’s classes align with loan classifications as defined by the bank regulatory agencies, based on the loan's collateral, purpose, and type of borrower.

(e) Includes loans to financial institutions, SPEs, personal investment companies and trusts, individuals and individual entities (predominantly Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB), states and political subdivisions, as well as loans to nonprofits. Refer to Note 14 of JPMorganChase’s 2024 Form 10-K for more information on SPEs.

The following tables summarize the Firm’s loan balances by portfolio segment.

March 31, 2025 (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total ^{(a)(b)}
Retained	\$ 372,892	\$ 223,384	\$ 704,714	\$ 1,300,990
Held-for-sale	735	—	9,437	10,172
At fair value	17,511	—	27,022	44,533
Total	\$ 391,138	\$ 223,384	\$ 741,173	\$ 1,355,695

December 31, 2024 (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total ^{(a)(b)}
Retained	\$ 376,334	\$ 232,860	\$ 690,396	\$ 1,299,590
Held-for-sale	945	—	6,103	7,048
At fair value	15,531	—	25,819	41,350
Total	\$ 392,810	\$ 232,860	\$ 722,318	\$ 1,347,988

(a) Excludes \$6.6 billion of accrued interest receivables at both March 31, 2025 and December 31, 2024. The Firm wrote off accrued interest receivables of \$28 million and \$31 million for the three months ended March 31, 2025 and 2024, respectively.

(b) Loans (other than those for which the fair value option has been elected) are presented net of unamortized discounts and premiums and net deferred loan fees or costs. These amounts were not material as of March 31, 2025 and December 31, 2024. Refer to Note 34 of JPMorganChase’s 2024 Form 10-K for more information on the discount associated with First Republic loans.

The following tables provide information about the carrying value of retained loans purchased, sold and reclassified to held-for-sale during the periods indicated. Loans that were reclassified to held-for-sale and sold in a subsequent period are excluded from the sales line of this table.

Three months ended March 31, (in millions)	2025				2024			
	Consumer, excluding credit card	Credit card	Wholesale	Total	Consumer, excluding credit card	Credit card	Wholesale	Total
Purchases	\$ 127 ^{(b)(c)}	\$ —	\$ 130	\$ 257	\$ 124 ^{(b)(c)}	\$ —	\$ 161	\$ 285
Sales	—	—	11,715	11,715	3,364	—	9,582	12,946
Retained loans reclassified to held-for-sale ^(a)	44	—	353	397	987	—	185	1,172

(a) Reclassifications of loans to held-for-sale are non-cash transactions.

(b) Includes purchases of residential real estate loans, including the Firm's voluntary repurchases of certain delinquent loans from loan pools as permitted by Government National Mortgage Association ("Ginnie Mae") guidelines for the three months ended March 31, 2025 and 2024.

The Firm typically elects to repurchase these delinquent loans as it continues to service them and/or manage the foreclosure process in accordance with applicable requirements of Ginnie Mae, FHA, RHS, and/or VA.

(c) Excludes purchases of retained loans of \$216 million and \$204 million for the three months ended March 31, 2025 and 2024, respectively, which are predominantly sourced through the correspondent origination channel and underwritten in accordance with the Firm's standards.

Gains and losses on sales of loans

The following table provides information on the net gains/(losses) on sales of loans and lending-related commitments (including adjustments to record loans and lending-related commitments held-for-sale at the lower of cost or fair value), which were recognized in noninterest revenue. In addition, the sale of loans may also result in write downs, recoveries or changes in the allowance recognized in the provision for credit losses.

Three months ended March 31, (in millions)	2025	2024
Net gains/(losses) on sales of loans and lending-related commitments ^(a)	\$ (70)	\$ 96

(a) Includes \$(70) million and \$66 million related to loans for the three months ended March 31, 2025 and 2024, respectively.

Consumer, excluding credit card loan portfolio

Consumer loans, excluding credit card loans, consist primarily of scored residential mortgages, home equity loans and lines of credit, auto and business banking loans, with a focus on serving the prime consumer credit market. These loans include home equity loans secured by junior liens, prime mortgage loans with an interest-only payment period, and certain payment-option loans that may result in negative amortization.

The following table provides information about retained consumer loans, excluding credit card, by class.

(in millions)	March 31, 2025	December 31, 2024
Residential real estate	\$ 306,523	\$ 309,513
Auto and other	66,369	66,821
Total retained loans	\$ 372,892	\$ 376,334

Delinquency rates are the primary credit quality indicator for consumer loans. Refer to Note 12 of JPMorganChase's 2024 Form 10-K for further information on consumer credit quality indicators.

Residential real estate

Delinquency is the primary credit quality indicator for retained residential real estate loans. The following tables provide information on delinquency and gross charge-offs.

March 31, 2025									
(in millions, except ratios)	Term loans by origination year ^(c)						Revolving loans		Total

Gross charge-offs	\$ —	\$ —	\$ 1	\$ 1	\$ —	\$ 176	\$ 21	\$ 7	\$ 206

(a) Individual delinquency classifications include mortgage loans insured by U.S. government agencies which were not material at March 31, 2025 and December 31, 2024.

(b) Excludes mortgage loans that are 30 or more days past due insured by U.S. government agencies which were not material at March 31, 2025 and December 31, 2024. These amounts have been excluded based upon the government guarantee.

(c) Purchased loans are included in the year in which they were originated.

Approximately 38% of the total revolving loans are senior lien loans; the remaining balance are junior lien loans. The lien position the Firm holds is considered in the Firm's allowance for credit losses. Revolving loans that have been converted to term loans have higher delinquency rates than those that are still within the revolving period. That is primarily because the fully-amortizing payment that is generally required for those products is higher than the minimum payment options available for revolving loans within the revolving period.

Nonaccrual loans and other credit quality indicators

The following table provides information on nonaccrual and other credit quality indicators for retained residential real estate loans.

(in millions, except weighted-average data)	March 31, 2025		December 31, 2024

Total retained loans	\$	306,523	\$	309,513

- (a) Includes collateral-dependent residential real estate loans that are charged down to the fair value of the underlying collateral less costs to sell. The Firm reports, in accordance with regulatory guidance, residential real estate loans that have been discharged under Chapter 7 bankruptcy and not reaffirmed by the borrower ("Chapter 7 loans") as collateral-dependent nonaccrual loans, regardless of their delinquency status. At March 31, 2025, approximately 9% of Chapter 7 residential real estate loans were 30 days or more past due.
- (b) Mortgage loans insured by U.S. government agencies excluded from nonaccrual loans were not material at March 31, 2025 and December 31, 2024.
- (c) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
- (d) Interest income on nonaccrual loans recognized on a cash basis was \$37 million and \$43 million for the three months ended March 31, 2025 and 2024, respectively.
- (e) Represents the aggregate unpaid principal balance of loans divided by the estimated current property value. Current property values are estimated, at a minimum, quarterly, based on home valuation models using nationally recognized home price index valuation estimates incorporating actual data to the extent available and forecasted data where actual data is not available. Current estimated combined LTV for junior lien home equity loans considers all available lien positions, as well as unused lines, related to the property.
- (f) Refreshed FICO scores represent each borrower's most recent credit score, which is obtained by the Firm on at least a quarterly basis.
- (g) Includes residential real estate loans, primarily held in LLCs in AWM that did not have a refreshed FICO score. These loans have been included in a FICO band based on management's estimation of the borrower's credit quality.
- (h) Included U.S. government-guaranteed loans as of March 31, 2025 and December 31, 2024.
- (i) Excludes loans with no FICO and/or LTV data available.
- (j) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at March 31, 2025.

Loan modifications

The Firm grants certain modifications of residential real estate loans to borrowers experiencing financial difficulty. The Firm's proprietary modification programs as well as government programs, including U.S. GSE programs, that generally provide various modifications to borrowers experiencing financial difficulty including, but not limited to, interest rate reductions, term extensions, other-than-insignificant payment deferral and principal forgiveness that would otherwise have been required under the terms of the original agreement, are considered FDMs. Refer to Note 12 of JPMorganChase's 2024 Form 10-K for further information.

Financial effects of FDMs

For the three months ended March 31, 2025, retained residential real estate FDMs were \$61 million. The financial effects of the FDMs, which were largely in the form of term extensions and interest rate reductions, included extending the weighted-average life of the loans by 15 years, and reducing the weighted-average contractual interest rate from 7.41% to 6.18% for the three months ended March 31, 2025.

For the three months ended March 31, 2024, retained residential real estate FDMs were \$39 million. The financial effects of the FDMs, which were predominantly in the form of term extensions and interest rate reductions, included extending the weighted-average life of the loans by 16 years, and reducing the weighted-average contractual interest rate from 7.39% to 4.28% for the three months ended March 31, 2024.

As of March 31, 2025 and December 31, 2024, there were no additional commitments to lend to borrowers experiencing financial difficulty whose loans have been modified as FDMs.

For the three months ended March 31, 2025 and 2024, loans subject to a trial modification, where the terms of the loans have not been permanently modified, and Chapter 7 loans were not material.

Payment status of FDMs

The following table provides information on the payment status of retained residential real estate FDMs during the twelve months ended March 31, 2025 and 2024

(in millions)	Amortized cost basis	
	Twelve months ended March 31, 2025	Twelve months ended March 31, 2024
Current	\$ 130	\$ 97
30-149 days past due	55	17
150 or more days past due	46	11
Total	\$ 231	\$ 125

Defaults of FDMs

Retained residential real estate FDMs that defaulted during the three months ended March 31, 2025 and 2024 and were reported as FDMs in the twelve months prior to the default were not material.

Active and suspended foreclosure

At March 31, 2025 and December 31, 2024, the Firm had retained residential real estate loans, excluding those insured by U.S. government agencies, with a carrying value of \$603 million and \$576 million, respectively, that were not included in REO, but were in the process of active or suspended foreclosure.

Auto and other

Delinquency is the primary credit quality indicator for retained auto and other loans. The following tables provide information on delinquency and gross charge-offs.

March 31, 2025									
(in millions, except ratios)	Term loans by origination year						Revolving loans		Total

New Jersey	2,432	2,468
Pennsylvania	2,037	2,012
Georgia	1,707	1,716
Arizona	1,628	1,643
North Carolina	1,594	1,597
All other	25,849	26,069
Total retained loans	\$ 66,369	\$ 66,821

- (a) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
- (b) Interest income on nonaccrual loans recognized on a cash basis was not material for the three months ended March 31, 2025 and 2024.
- (c) The geographic regions presented in this table are ordered based on the magnitude of the corresponding loan balances at March 31, 2025.

Loan modifications

The Firm grants certain modifications of auto and other loans to borrowers experiencing financial difficulty.

For the three months ended March 31, 2025 and 2024, retained auto and other FDMs were not material.

As of March 31, 2025 and December 31, 2024, there were no additional commitments to lend to borrowers modified as FDMs.

Credit card loan portfolio

The credit card portfolio segment includes credit card loans originated and purchased by the Firm. Delinquency rates are the primary credit quality indicator for credit card loans.

Refer to Note 12 of JPMorganChase's 2024 Form 10-K for further information on the credit card loan portfolio, including credit quality indicators.

The following tables provide information on delinquency and gross charge-offs.

(in millions, except ratios)	March 31, 2025

No FICO available	0.2	0.2

(a) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at March 31, 2025.

Loan modifications

The Firm grants certain modifications of credit card loans to borrowers experiencing financial difficulty. These modifications may involve placing the customer's credit card account on a fixed payment plan, generally for 60 months, which typically includes reducing the interest rate on the credit card account. If the borrower does not make the contractual payments when due under the modified payment terms, the credit card loan continues to age and will be charged-off in accordance with the Firm's standard charge-off policy. In most cases, the Firm does not reinstate the borrower's line of credit.

Financial effects of FDMs

The following tables provide information on retained credit card FDMs.

(in millions, except ratios)	Loan modifications		
	Three months ended March 31, 2025		
	Amortized cost basis	% of loan modifications to total retained credit card loans	Financial effect of loan modifications
Term extension and interest rate reduction ^{(a)(b)}	\$ 376	0.17 %	Term extension with a reduction in the weighted average contractual interest rate from 23.04% to 3.53%
Other ^{(b)(c)}	5	—	Reduced weighted-average contractual interest rate from 20.95% to 8.61%
Total	\$ 381		

(in millions, except ratios)	Loan modifications		
	Three months ended March 31, 2024		
	Amortized cost basis	% of loan modifications to total retained credit card loans	Financial effect of loan modifications
Term extension and interest rate reduction ^{(a)(b)}	\$ 259	0.13 %	Term extension with a reduction in the weighted average contractual interest rate from 23.88% to 3.30%
Total	\$ 259		

- (a) Term extension includes credit card loans whose terms have been modified under long-term programs by placing the customer's credit card account on a fixed payment plan.
(b) The interest rates represent the weighted average at the time of modification.
(c) Primarily interest rate reduction.

Payment status of FDMs

The following table provides information on the payment status of retained credit card FDMs during the twelve months ended March 31, 2025 and 2024.

(in millions)	Amortized cost basis	
	Twelve months ended March 31,	Twelve months ended March 31,
	2025	2024
Current and less than 30 days past due and still accruing	\$ 915	\$ 626
30-89 days past due and still accruing	83	65
90 or more days past due and still accruing	47	43
Total	\$ 1,045	\$ 734

Defaults of FDMs

Retained credit card FDMs that defaulted during the three months ended March 31, 2025 and 2024 and were reported as FDMs in the twelve months prior to the default were not material.

For credit card loans modified as FDMs, payment default is deemed to have occurred when the borrower misses two consecutive contractual payments. Defaulted modified credit card loans remain in the modification program and continue to be charged off in accordance with the Firm's standard charge-off policy.

Wholesale loan portfolio

Wholesale loans include loans made to a variety of clients, ranging from large corporate and institutional clients to small businesses and high-net-worth individuals. The primary credit quality indicator for wholesale loans is the internal risk rating assigned to each loan. Refer to Note 12 of JPMorganChase's 2024 Form 10-K for further information on these risk ratings.

Internal risk rating is the primary credit quality indicator for retained wholesale loans. The following tables provide information on internal risk rating and gross charge-offs.

The following table presents additional information on retained loans secured by real estate, which consists of loans secured wholly or substantially by a lien or liens on real property at origination.

(in millions, except ratios)	Multifamily		Other commercial		Total retained Secured by real estate loans	
	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024
Retained loans secured by real estate	\$ 100,631	\$ 101,114	\$ 61,960	\$ 61,318	\$ 162,591	\$ 162,432
Criticized	4,622	4,700	5,962	6,030	10,584	10,730
% of criticized to total retained loans secured by real estate	4.59 %	4.65 %	9.62 %	9.83 %	6.51 %	6.61 %
Criticized nonaccrual	\$ 322	\$ 337	\$ 1,130	\$ 1,102	\$ 1,452	\$ 1,439
% of criticized nonaccrual loans to total retained loans secured by real estate	0.32 %	0.33 %	1.82 %	1.80 %	0.89 %	0.89 %

Geographic distribution and delinquency

The following table provides information on the geographic distribution and delinquency for retained wholesale loans.

(in millions)	Secured by real estate		Commercial and industrial		Other		Total retained loans	
	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024
Loans by geographic distribution^(a)								
Total U.S.	\$ 159,293	\$ 159,209	\$ 127,913	\$ 127,626	\$ 283,712	\$ 278,077	\$ 570,918	\$ 564,912
Total non-U.S.	3,298	3,223	41,830	39,164	88,668	83,097	133,796	125,484
Total retained loans	\$ 162,591	\$ 162,432	\$ 169,743	\$ 166,790	\$ 372,380	\$ 361,174	\$ 704,714	\$ 690,396
Loan delinquency								
Current and less than 30 days past due and still accruing	\$ 160,338	\$ 159,949	\$ 167,201	\$ 164,104	\$ 370,343	\$ 359,191	\$ 697,882	\$ 683,244
30–89 days past due and still accruing	698	918	569	868	1,422	1,152	2,689	2,938
90 or more days past due and still accruing ^(b)	103	126	122	58	23	88	248	272
Criticized nonaccrual	1,452	1,439	1,851	1,760	592	743	3,895	3,942
Total retained loans	\$ 162,591	\$ 162,432	\$ 169,743	\$ 166,790	\$ 372,380	\$ 361,174	\$ 704,714	\$ 690,396

(a) The U.S. and non-U.S. distribution is determined based predominantly on the domicile of the borrower.

(b) Represents loans that are considered well-collateralized and therefore still accruing interest.

Nonaccrual loans

The following table provides information on retained wholesale nonaccrual loans.

(in millions)	Secured by real estate		Commercial and industrial		Other		Total retained loans	
	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024	Mar 31, 2025	Dec 31, 2024
Nonaccrual loans								
With an allowance	\$ 468	\$ 366	\$ 1,484	\$ 1,362	\$ 507	\$ 555	\$ 2,459	\$ 2,283
Without an allowance ^(a)	984	1,073	367	398	85	188	1,436	1,659
Total nonaccrual loans^(b)	\$ 1,452	\$ 1,439	\$ 1,851	\$ 1,760	\$ 592	\$ 743	\$ 3,895	\$ 3,942

(a) When the discounted cash flows or collateral value equals or exceeds the amortized cost of the loan, the loan does not require an allowance. This typically occurs when the loans have been partially charged off and/or there have been interest payments received and applied to the loan balance.

(b) Interest income on nonaccrual loans recognized on a cash basis was not material for the three months ended March 31, 2025 and 2024.

Loan modifications

The Firm grants certain modifications of wholesale loans to borrowers experiencing financial difficulty.

Financial effects of FDMs

The following tables provide information on retained wholesale loan modifications considered FDMs during the three months ended March 31, 2025 and 2024.

(in millions, except ratios)	Secured by real estate

Total	\$ 637	\$ 1,947	\$ 266	\$ 163	\$ 1,428	\$ 599

Defaults of FDMs

The following table provides information on retained wholesale FDMs that defaulted in the three months ended March 31, 2025 and 2024 that were reported as FDMs in the twelve months prior to the default.

(in millions)	Amortized cost basis					
	Three months ended March 31, 2025			Three months ended March 31, 2024		
	Secured by real estate	Commercial and industrial	Other	Secured by real estate	Commercial and industrial	Other
Term extension	\$ 13	\$ 9	\$ 11	\$ 22	\$ 43	\$ 12
Total^(a)	\$ 13	\$ 9	\$ 11	\$ 22	\$ 43	\$ 12

(a) Represents FDMs that were 30 days or more past due.

As of March 31, 2025 and December 31, 2024, additional commitments on modified loans to borrowers experiencing financial difficulty were \$947 million and \$1.8 billion, respectively, in Commercial and industrial, and \$1 million and \$69 million, respectively, in Other loan class. Additional commitments on modified loans to borrowers experiencing financial difficulty whose loans have been modified as FDMs in Secured by real estate were not material at each period.

Note 12 – Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments.

Refer to Note 13 of JPMorganChase's 2024 Form 10-K for a detailed discussion of the allowance for credit losses and the related accounting policies.

Allowance for credit losses and related information

The table below summarizes information about the allowances for credit losses and includes a breakdown of loans and lending-related commitments by impairment methodology. Refer to Note 10 of JPMorganChase's 2024 Form 10-K and Note 9 of this Form 10-Q for further information on the allowance for credit losses on investment securities.

Total lending-related commitments	\$ 25,873	\$ 99	\$ 522,553	\$ 548,525	\$ 28,994	\$ —	\$ 511,653	\$ 540,647

- (a) At March 31, 2025 and 2024, in addition to the allowance for credit losses in the table above, the Firm also had an allowance for credit losses of \$283 million and \$274 million, respectively, associated with certain accounts receivable in CIB.
- (b) Includes collateral-dependent loans, including those for which foreclosure is deemed probable, and nonaccrual risk-rated loans.
- (c) The allowance for lending-related commitments is reported in accounts payable and other liabilities on the Consolidated balance sheets.
- (d) At March 31, 2025 and 2024, lending-related commitments excluded \$20.3 billion and \$17.7 billion, respectively, for the consumer, excluding credit card portfolio segment; \$1.0 trillion and \$943.9 billion, respectively, for the credit card portfolio segment; and \$26.3 billion and \$20.9 billion, respectively, for the wholesale portfolio segment, which were not subject to the allowance for lending-related commitments.

Discussion of changes in the allowance

The allowance for credit losses as of March 31, 2025 was \$27.8 billion, reflecting a net addition of \$1.0 billion from December 31, 2024. The net addition to the allowance for credit losses was largely driven by changes in the weighted-average macroeconomic outlook, including the qualitative adjustment to reflect additional weight placed on the adverse scenarios due to elevated risks and uncertainties related to the geopolitical and macroeconomic environment.

The net addition to the allowance for credit losses included:

- \$562 million in **wholesale**, which also reflected changes in credit quality on client-specific exposures and the impact of new lending-related commitments, and
- \$441 million in **consumer**, predominantly driven by Card Services.

The Firm's allowance for credit losses is estimated using a weighted average of five internally developed macroeconomic scenarios. The adverse scenarios incorporate more punitive macroeconomic factors than the central case assumptions provided in the following table, resulting in:

- a weighted average U.S. unemployment rate peaking at 5.8% in the first quarter of 2026, and
- a weighted average U.S. real GDP level that is 2.6% lower than the central case at the end of the second quarter of 2026.

The following table presents the Firm's central case assumptions for the periods presented:

	Central case assumptions at March 31, 2025		
	2Q25	4Q25	2Q26
U.S. unemployment rate ^(a)	4.3 %	4.3 %	4.3 %
YoY growth in U.S. real GDP ^(b)	2.5 %	2.2 %	2.0 %

	Central case assumptions at December 31, 2024		
	2Q25	4Q25	2Q26
U.S. unemployment rate ^(a)	4.5 %	4.3 %	4.3 %
YoY growth in U.S. real GDP ^(b)	2.0 %	1.9 %	1.8 %

(a) Reflects quarterly average of forecasted U.S. unemployment rate.

(b) The year over year growth in U.S. real GDP in the forecast horizon of the central scenario is calculated as the percentage change in U.S. real GDP levels from the prior year.

Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

Refer to Note 13 and Note 10 of JPMorganChase's 2024 Form 10-K for a description of the policies, methodologies and judgments used to determine the Firm's allowance for credit losses on loans, lending-related commitments, and investment securities.

Refer to Note 11 for additional information on the consumer and wholesale credit portfolios.

Refer to Critical Accounting Estimates Used by the Firm on pages 72–75 for further information on the allowance for credit losses and related management judgments.

Note 13 – Variable interest entities

Refer to Note 1 and Note 14 of JPMorganChase’s 2024 Form 10-K for a further description of the Firm's accounting policies regarding consolidation of and involvement with VIEs.

The following table summarizes the most significant types of Firm-sponsored VIEs by business segment. The Firm considers a “Firm-sponsored” VIE to include any entity where: (1) JPMorganChase is the primary beneficiary of the structure; (2) the VIE is used by JPMorganChase to securitize Firm assets; (3) the VIE issues financial instruments with the JPMorganChase name; or (4) the entity is a JPMorganChase–administered asset-backed commercial paper conduit.

Line of Business	Transaction Type	Activity	Form 10-Q page references
CCB	Credit card securitization trusts	Securitization of originated credit card receivables	142
	Mortgage securitization trusts	Servicing and securitization of both originated and purchased residential mortgages	142–144
CIB	Mortgage and other securitization trusts	Securitization of both originated and purchased residential and commercial mortgages, and other consumer loans	142–144
	Multi-seller conduits	Assisting clients in accessing the financial markets in a cost-efficient manner and structuring transactions to meet investor needs	144
	Municipal bond vehicles	Financing of municipal bond investments	144

In addition, CIB also invests in and provides financing, lending-related services and other services to VIEs sponsored by third parties. Refer to pages 145–146 of this Note for more information on the VIEs sponsored by third parties.

Significant Firm-sponsored VIEs

Credit card securitizations

As a result of the Firm’s continuing involvement, the Firm is considered to be the primary beneficiary of its Firm-sponsored credit card securitization trust, the Chase Issuance Trust.

Firm-sponsored mortgage and other securitization trusts

The Firm securitizes (or has securitized) originated and purchased residential mortgages, commercial mortgages and other consumer loans primarily in its CCB and CIB businesses. Depending on the particular transaction, as well as the respective business involved, the Firm may act as the servicer of the loans and/or retain certain beneficial interests in the securitization trusts.

The following tables present the total unpaid principal amount of assets held in Firm-sponsored private-label securitization entities, including those in which the Firm has continuing involvement, and those that are consolidated by the Firm. Continuing involvement includes servicing the loans, holding senior interests or subordinated interests (including amounts required to be held pursuant to credit risk retention rules),

recourse or guarantee arrangements, and derivative contracts. In certain instances, the Firm's only continuing involvement is servicing the loans. The Firm's maximum loss exposure from retained and purchased interests is the carrying value of these interests. Refer to page 148 of this Note for information on the securitization-related loan delinquencies and liquidation losses.

(a) Excludes U.S. GSEs and government agency securitizations and re-securitizations, which are not Firm-sponsored.

(b) Consists of securities backed by commercial real estate loans and non-mortgage-related consumer receivables.

(c) Excludes the following: retained servicing; securities retained from loan sales and securitization activity related to U.S. GSEs and government agencies; interest rate and foreign exchange derivatives primarily used to manage interest rate and foreign exchange risks of securitization entities; senior securities of \$186 million and \$256 million at March 31, 2025 and December 31, 2024, respectively, and subordinated securities of \$143 million and \$49 million at March 31, 2025 and December 31, 2024, respectively, which the Firm purchased in connection with CIB's secondary market-making activities.

(d) Includes interests held in re-securitization transactions.

(e) As of March 31, 2025 and December 31, 2024, 78% and 77%, respectively, of the Firm's retained securitization interests, which are predominantly carried at fair value and include amounts required to be held pursuant to credit risk retention rules, were risk-rated "A" or better, on an S&P-equivalent basis. The retained interests in prime residential mortgages consisted of \$3.1 billion and \$2.9 billion of investment-grade retained interests at March 31, 2025 and December 31, 2024, respectively, and \$276 million and \$216 million of noninvestment-grade retained interests at March 31, 2025 and December 31, 2024, respectively. The retained interests in commercial and other securitization trusts consisted of \$6.5 billion and \$6.0 billion of investment-grade retained interests at March 31, 2025 and December 31, 2024, respectively, and \$1.0 billion and \$1.4 billion of noninvestment-grade retained interests at March 31, 2025 and December 31, 2024, respectively.

Residential mortgage

The Firm securitizes residential mortgage loans originated by CCB, as well as residential mortgage loans purchased from third parties by either CCB or CIB.

Commercial mortgages and other consumer securitizations

CIB originates and securitizes commercial mortgage loans, and engages in underwriting and trading activities involving the securities issued by securitization trusts.

Re-securitizations

The following table presents the principal amount of securities transferred to re-securitization VIEs.

(in millions)	Three months ended March 31,	
	2025	2024
Transfers of securities to VIEs		
U.S. GSEs and government agencies	\$ 5,490	\$ 8,406

The Firm did not transfer any private label securities to re-securitization VIEs during the three months ended March 31, 2025 and 2024, and retained interests in any such Firm-sponsored VIEs as of March 31, 2025 and December 31, 2024 were not material.

The following table presents information on the Firm's interests in nonconsolidated re-securitization VIEs.

(in millions)	Nonconsolidated re-securitization VIEs	
	March 31, 2025	December 31, 2024
U.S. GSEs and government agencies		
Interest in VIEs	\$ 3,699	\$ 3,219

As of March 31, 2025 and December 31, 2024, the Firm did not consolidate any U.S. GSE and government agency re-securitization VIEs or any Firm-sponsored private-label re-securitization VIEs.

Multi-seller conduits

In the normal course of business, JPMorganChase makes markets in and invests in commercial paper issued by the Firm-administered multi-seller conduits. The Firm held \$3.2 billion and \$2.9 billion of the commercial paper issued by the Firm-administered multi-seller conduits at March 31, 2025 and December 31, 2024, respectively, which have been eliminated in consolidation. The Firm's investments reflect the Firm's funding needs and capacity and were not driven by market illiquidity. Other than the amounts required to be held pursuant to credit risk retention rules, the Firm is not obligated under any agreement to purchase the commercial paper issued by the Firm-administered multi-seller conduits.

Deal-specific liquidity facilities, program-wide liquidity and credit enhancement provided by the Firm have been eliminated in consolidation. The Firm or the Firm-administered multi-seller conduits provide lending-related commitments to certain clients of the Firm-administered multi-seller conduits. The unfunded commitments were \$12.5 billion and \$10.3 billion at March 31, 2025 and December 31, 2024, respectively, and are reported as off-balance sheet lending-related commitments in other unfunded commitments to extend credit. Refer to Note 22 for more information on off-balance sheet lending-related commitments.

Municipal bond vehicles

Municipal bond vehicles or tender option bond ("TOB") trusts allow institutions to finance their municipal bond investments at short-term rates. TOB transactions are known as customer TOB trusts and non-customer TOB trusts. Customer TOB trusts are sponsored by a third party.

The Firm serves as sponsor for all non-customer TOB transactions.

Consolidated VIE assets and liabilities

The following table presents information on assets and liabilities related to VIEs consolidated by the Firm as of March 31, 2025 and December 31, 2024.

March 31, 2025 (in millions)	Assets				Liabilities		
	Trading assets	Loans	Other ^(c)	Total assets ^(d)	Beneficial interests in VIE assets ^(e)	Other ^(f)	Total liabilities
VIE program type							
Firm-sponsored credit card trusts	\$ —	\$ 12,439	\$ 165	\$ 12,604	\$ 5,353	\$ 10	\$ 5,363
Firm-administered multi-seller conduits	—	18,954	124	19,078	15,899	31	15,930
Municipal bond vehicles	3,008	—	37	3,045	3,254	21	3,275
Mortgage securitization entities ^(a)	—	613	8	621	112	46	158
Other	544	4,522 ^(b)	315	5,381	50	326	376
Total	\$ 3,552	\$ 36,528	\$ 649	\$ 40,729	\$ 24,668	\$ 434	\$ 25,102

December 31, 2024 (in millions)	Assets				Liabilities		
	Trading assets	Loans	Other ^(c)	Total assets ^(d)	Beneficial interests in VIE assets ^(e)	Other ^(f)	Total liabilities
VIE program type							
Firm-sponsored credit card trusts	\$ —	\$ 13,531	\$ 168	\$ 13,699	\$ 5,312	\$ 10	\$ 5,322
Firm-administered multi-seller conduits	1	20,383	133	20,517	18,228	26	18,254
Municipal bond vehicles	3,388	—	22	3,410	3,617	15	3,632
Mortgage securitization entities ^(a)	—	630	8	638	115	48	163
Other	496	1,966 ^(b)	350	2,812	51	355	406
Total	\$ 3,885	\$ 36,510	\$ 681	\$ 41,076	\$ 27,323	\$ 454	\$ 27,777

(a) Includes residential mortgage securitizations.

(b) Primarily includes consumer loans in CIB.

(c) Includes assets classified as cash and other assets on the Consolidated balance sheets.

(d) The assets of the consolidated VIEs included in the program types above are used to settle the liabilities of those entities. The assets and liabilities include third-party assets and liabilities of consolidated VIEs and exclude intercompany balances that eliminate in consolidation.

(e) The interest-bearing beneficial interest liabilities issued by consolidated VIEs are classified on the Consolidated balance sheets as "Beneficial interests issued by consolidated VIEs". The holders of these beneficial interests generally do not have recourse to the general credit of JPMorganChase. Included in beneficial interests in VIE assets are long-term beneficial interests of \$5.5 billion at both March 31, 2025 and December 31, 2024.

(f) Includes liabilities classified as accounts payable and other liabilities on the Consolidated balance sheets.

VIEs sponsored by third parties

The Firm enters into transactions with VIEs structured by other parties. These include, for example, acting as a derivative counterparty, liquidity provider, investor, underwriter, placement agent, remarketing agent, trustee or custodian. These transactions are conducted at arm's-length, and individual credit decisions are based on the analysis of the specific VIE, taking into consideration the quality of the underlying assets. Where the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, or a variable interest that could potentially be significant, the Firm generally does not consolidate the VIE, but it records and reports these positions on its Consolidated balance sheets in the same manner it would record and report positions in respect of any other third-party transaction.

Tax credit vehicles

The Firm holds investments in unconsolidated tax credit vehicles, which are limited partnerships and similar entities that own and operate affordable housing, alternative energy, and other projects. These entities are primarily considered VIEs. A third party is typically the general partner or managing member and has control over the significant activities of the tax credit vehicles, and accordingly the Firm does not consolidate tax credit vehicles. The Firm generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits allocated to the projects. The maximum loss exposure, represented by equity investments and funding commitments, was \$34.3 billion and \$35.2 billion at March 31, 2025 and December 31, 2024, of which \$13.9 billion and \$15.0 billion was unfunded at March 31, 2025 and December 31, 2024, respectively. The Firm assesses each project and to reduce the risk

of loss, may withhold varying amounts of its capital investment until the project qualifies for tax credits. Refer to Note 22 of this Form 10-Q for more information on off-balance sheet lending-related commitments.

The Firm elected the proportional amortization method for certain tax-oriented investments on a program-by-program basis. The proportional amortization method requires the cost of eligible investments, within an elected program, be amortized in proportion to the tax benefits received with the resulting amortization reported directly in income tax expense, which aligns with the associated tax credits and other tax benefits. Investments must meet certain criteria to be eligible, including that substantially all of the return is from income tax credits and other income tax benefits.

In addition, under this method deferred taxes are generally not recorded as the investment is now amortized in proportion to the income tax credits and other income tax benefits received. Delayed equity contributions that are unconditional and legally binding or conditional and probable of occurring are recorded in other liabilities with a corresponding increase in the carrying value of the investment. The guidance also requires a reevaluation of eligible investments when significant modifications or events occur that result in a change in the nature of the investment or a change in the Firm's relationship with the underlying project. During the period, there were no significant modifications or events that resulted in a change in the nature of an eligible investment or a change in the Firm's relationship with the underlying project.

The following table provides information on tax-oriented investments for which the Firm elected to apply the proportional amortization method.

(in millions)	Alternative energy and affordable housing programs	
	Three months ended March 31,	
	2025	2024
Programs for which the Firm elected proportional amortization:		
Carrying value ^(a)	\$ 31,540	\$ 29,821
Tax credits and other tax benefits ^(b)	1,358	1,266
Investments that qualify to be accounted for using proportional amortization:		
Amortization losses recognized as a component of income tax expense	(983)	(1,016)
Non-income-tax-related gains/ (losses) and other returns received that are recognized outside of income tax expense ^(c)	31	48

- (a) Recorded in Other assets on the Consolidated balance sheets. Excludes programs to which the Firm does not apply the proportional amortization method, such as historic tax credit and new market tax credit programs.
- (b) Reflected in Income tax expense on the Consolidated statements of income and Operating activities on the Consolidated statements of cash flows.
- (c) Recorded in Other income on the Consolidated statements of income and Operating activities on the Consolidated statements of cash flows.

Customer municipal bond vehicles (TOB trusts)

The Firm may provide various services to customer TOB trusts, including remarketing agent, liquidity or tender option provider. In certain customer TOB transactions, the Firm, as liquidity provider, has entered into a reimbursement agreement with the Residual holder.

In those transactions, upon the termination of the vehicle, the Firm has recourse to the third-party Residual holders for any shortfall. The Firm does not have any intent to protect Residual holders from potential losses on any of the underlying municipal bonds. The Firm does not consolidate customer TOB trusts, since the Firm does not have the power to make decisions that significantly impact the economic performance of the municipal bond vehicle. The Firm's maximum exposure as a liquidity provider to customer TOB trusts at March 31, 2025 and December 31, 2024 was \$6.2 billion and \$5.8 billion, respectively. The fair value of assets held by such VIEs at March 31, 2025 and December 31, 2024 was \$8.5 billion and \$8.1 billion, respectively.

Loan securitizations

The Firm has securitized and sold a variety of loans, including residential mortgages, credit card receivables, commercial mortgages and other consumer loans.

Securitization activity

The following table provides information related to the Firm's securitization activities for the three months ended March 31, 2025 and 2024, related to assets held in Firm-sponsored securitization entities that were not consolidated by the Firm, and where sale accounting was achieved at the time of the securitization.

(in millions)	Three months ended March 31,			
	2025		2024	
	Residential mortgage ^(d)	Commercial and other ^(e)	Residential mortgage ^(d)	Commercial and other ^(e)
Principal securitized	\$ 4,524	\$ 2,834	\$ 4,922	\$ 2,358
All cash flows during the period:^(a)				
Proceeds received from loan sales as financial instruments ^{(b)(c)}	\$ 4,665	\$ 2,849	\$ 4,831	\$ 2,324
Servicing fees collected	8	11	6	3
Cash flows received on interests	120	279	70	130

(a) Excludes re-securitization transactions.

(b) Primarily includes Level 2 assets.

(c) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.

(d) Represents prime mortgages. Excludes loan securitization activity related to U.S. GSEs and government agencies.

(e) Includes commercial mortgages and auto loans.

Loans and excess MSR sold to U.S. government-sponsored enterprises and loans in securitization transactions pursuant to Ginnie Mae guidelines

In addition to the amounts reported in the securitization activity tables above, the Firm, in the normal course of business, sells originated and purchased mortgage loans and certain originated excess MSR on a nonrecourse basis, predominantly to U.S. GSEs. These loans and excess MSR are sold primarily for the purpose of securitization by the U.S. GSEs, who provide certain guarantee provisions (e.g., credit enhancement of the loans). The Firm also sells loans into securitization transactions pursuant to Ginnie Mae guidelines; these loans are typically insured or guaranteed by another U.S. government agency. The Firm does not consolidate the securitization vehicles underlying these transactions as it is not the primary beneficiary. For a limited number of loan sales, the Firm is obligated to share a portion of the credit risk associated with the sold loans with the purchaser. Refer to Note 22 of this Form 10-Q for additional information about the Firm's loan sales and securitization-related indemnifications and Note 14 for additional information about the impact of the Firm's sale of certain excess MSR.

The following table summarizes the activities related to loans sold to the U.S. GSEs, and loans in securitization transactions pursuant to Ginnie Mae guidelines.

(in millions)	Three months ended March 31,	
	2025	2024
Carrying value of loans sold	\$ 8,614	\$ 4,536
Proceeds received from loan sales as cash	638	306
Proceeds from loan sales as securities ^{(a)(b)}	7,893	4,192
Total proceeds received from loan sales^(c)	\$ 8,531	\$ 4,498
Gains/(losses) on loan sales ^{(d)(e)}	\$ —	\$ —

(a) Includes securities from U.S. GSEs and Ginnie Mae that are generally sold shortly after receipt or retained as part of the Firm's investment securities portfolio.

(b) Included in level 2 assets.

(c) Excludes the value of MSR retained upon the sale of loans.

(d) Gains/(losses) on loan sales include the value of MSR.

(e) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.

Options to repurchase delinquent loans

In addition to the Firm's obligation to repurchase certain loans due to material breaches of representations and warranties as discussed in Note 22, the Firm also has the option to repurchase delinquent loans that it services for Ginnie Mae loan pools, as well as for other U.S. government agencies under certain arrangements. The Firm typically elects to repurchase delinquent loans from Ginnie Mae loan pools as it continues to service them and/or manage the foreclosure process in accordance with the applicable requirements, and such loans continue to be insured or guaranteed. When the Firm's repurchase option becomes exercisable, such loans must be reported on the Consolidated balance sheets as a loan with a corresponding liability. Refer to Note 11 for additional information.

The following table presents loans the Firm repurchased or had an option to repurchase, real estate owned, and foreclosed government-guaranteed residential mortgage loans recognized on the Firm's Consolidated balance sheets as of March 31, 2025 and December 31, 2024. Substantially all of these loans and real estate are insured or guaranteed by U.S. government agencies.

(in millions)	March 31, 2025	December 31, 2024
Loans repurchased or option to repurchase ^(a)	\$ 616	\$ 577
Real estate owned	4	6
Foreclosed government-guaranteed residential mortgage loans ^(b)	9	10

(a) Primarily all of these amounts relate to loans that have been repurchased from Ginnie Mae loan pools.

(b) Relates to voluntary repurchases of loans, which are included in accrued interest and accounts receivable.

Loan delinquencies and liquidation losses

The table below includes information about components of and delinquencies related to nonconsolidated securitized financial assets held in Firm-sponsored private-label securitization entities, in which the Firm has continuing involvement as of March 31, 2025 and December 31, 2024. For loans sold or securitized where servicing is the Firm's only form of continuing involvement, the Firm generally experiences a loss only if the Firm was required to repurchase a delinquent loan or foreclosed asset due to a breach in representations and warranties associated with its loan sale or servicing contracts.

(in millions)	Securitized assets		90 days past due		Net liquidation losses/ (recoveries)	
	March 31, 2025	December 31, 2024	March 31, 2025	December 31, 2024	Three months ended March 31,

Total loans securitized	\$ 190,894	\$ 178,203	\$ 2,358	\$ 2,329	\$ 64	\$ 9

Note 14 – Goodwill, mortgage servicing rights, and other intangible assets

Refer to Note 15 of JPMorganChase’s 2024 Form 10-K for a detailed discussion of goodwill, mortgage servicing rights, and other intangible assets and the related accounting policies.

Goodwill

Goodwill is recorded upon completion of a business combination as the difference between the purchase price and the fair value of the net assets acquired, and can be adjusted up to one year from the acquisition date as additional information pertaining to facts and circumstances that existed as of the acquisition date is obtained about the fair value of assets acquired and liabilities assumed.

The following table presents goodwill attributed to the reportable business segments and Corporate.

(in millions)	March 31, 2025	December 31, 2024
Consumer & Community Banking	\$ 32,116	\$ 32,116
Commercial & Investment Bank	11,240	11,236
Asset & Wealth Management	8,552	8,521
Corporate	713	692
Total goodwill	\$ 52,621	\$ 52,565

The following table presents changes in the carrying amount of goodwill.

(in millions)	Three months ended March 31,	
	2025	2024
Balance at beginning of period	\$ 52,565	\$ 52,634
Changes during the period from:		
Business combinations	—	34
Other ^(a)	56	(32)
Balance at March 31,	\$ 52,621	\$ 52,636

(a) Primarily foreign currency adjustments.

Goodwill impairment testing

Goodwill is tested for impairment during the fourth quarter of each fiscal year, or more often if events or circumstances, such as adverse changes in the business climate, indicate that there may be an impairment. Refer to Note 15 of JPMorganChase’s 2024 Form 10-K for a further discussion of the Firm’s goodwill impairment testing.

Unanticipated declines in business performance, increases in credit losses, increases in capital requirements, as well as deterioration in economic or market conditions, adverse regulatory or legislative changes or increases in the estimated market cost of equity, could cause the estimated fair values of the Firm’s reporting units to decline in the future, which could result in a material impairment charge to earnings in a future period related to some portion of the associated goodwill.

As of March 31, 2025, the Firm reviewed current economic conditions, estimated market cost of equity, as well as actual business results and projections of business performance. Based on such reviews, the Firm has concluded that goodwill was not impaired as of March 31, 2025 or December 31, 2024, nor was goodwill written off due to impairment during the three months ended March 31, 2025 or 2024.

Mortgage servicing rights

MSRs represent the fair value of expected future cash flows for performing servicing activities for others. The fair value considers estimated future servicing fees and ancillary revenue, offset by estimated costs to service the loans, and generally declines over time as net servicing cash flows are received, effectively amortizing the MSR asset against contractual servicing and ancillary fee income. MSRs are either purchased from third parties or recognized upon sale or securitization of mortgage loans if servicing is retained. Refer to Notes 2 and 15 of JPMorganChase's 2024 Form 10-K for a further description of the MSR asset, interest rate risk management, and the valuation of MSRs.

The following table summarizes MSR activity for the three months ended March 31, 2025 and 2024.

(in millions, except where otherwise noted)	As of or for the three months ended March 31,	
	2025	2024
Fair value at beginning of period	\$ 9,121	\$ 8,522
MSR activity:		
Originations of MSRs	111	58
Purchase of MSRs ^(a)	279	2
Disposition of MSRs	4	5
Net additions/(dispositions)	394	65
Changes due to collection/realization of expected cash flows	(261)	(260)
Changes in valuation due to inputs and assumptions:		
Changes due to market interest rates and other ^(b)	(100)	268
Changes in valuation due to other inputs and assumptions:		
Projected cash flows (e.g., cost to service)	1	7
Discount rates	—	—
Prepayment model changes and other ^(c)	(28)	3
Total changes in valuation due to other inputs and assumptions	(27)	10
Total changes in valuation due to inputs and assumptions	(127)	278
Fair value at March 31,	\$ 9,127	\$ 8,605
Changes in unrealized gains/(losses) included in income related to MSRs held at March 31,	\$ (127)	\$ 278
Contractual service fees, late fees and other ancillary fees included in income	402	399
Third-party mortgage loans serviced at March 31, (in billions)	666	627
Servicer advances, net of an allowance for uncollectible amounts, at March 31 ^(d)	529	607

(a) Includes purchase price adjustments associated with MSRs purchased in the prior quarter, primarily as a result of loans that prepaid within 90 days of settlement, allowing the Firm to recover the purchase price.

(b) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.

(c) Represents changes in prepayments other than those attributable to changes in market interest rates.

(d) Represents amounts the Firm pays as the servicer (e.g., scheduled principal and interest, taxes and insurance), which will generally be reimbursed within a short period of time after the advance from future cash flows from the trust or the underlying loans. The Firm's credit risk associated with these servicer advances is minimal because reimbursement of the advances is typically senior to all cash payments to investors. In addition, the Firm maintains the right to stop payment to investors if the collateral is insufficient to cover the advance. However, certain of these servicer advances may not be recoverable if they were not made in accordance with applicable rules and agreements.

The following table presents the components of mortgage fees and related income (including the impact of MSR risk management activities) for the three months ended March 31, 2025 and 2024.

(in millions)	Three months ended March 31,	
	2025	2024
CCB mortgage fees and related income		
Production revenue	\$ 110	\$ 130
Net mortgage servicing revenue:		
Operating revenue:		
Loan servicing revenue	404	405
Changes in MSR asset fair value due to collection/realization of expected cash flows	(260)	(260)
Total operating revenue	144	145
Risk management:		
Changes in MSR asset fair value due to market interest rates and other ^(a)	(100)	268
Other changes in MSR asset fair value due to other inputs and assumptions in model ^(b)	(27)	10
Changes in derivative fair value and other	136	(279)
Total risk management	9	(1)
Total net mortgage servicing revenue	153	144
Total CCB mortgage fees and related income	263	274
All other	15	1
Mortgage fees and related income	\$ 278	\$ 275

(a) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.

(b) Represents the aggregate impact of changes in model inputs and assumptions such as projected cash flows (e.g., cost to service), discount rates and changes in prepayments other than those attributable to changes in market interest rates (e.g., changes in prepayments due to changes in home prices).

Changes in fair value based on variations in assumptions generally cannot be easily extrapolated, because the relationship of the change in the assumptions to the change in fair value are often highly interrelated and may not be linear. In the following table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which would either magnify or counteract the impact of the initial change.

The table below outlines the key economic assumptions used to determine the fair value of the Firm's MSRs at March 31, 2025 and December 31, 2024, and outlines the sensitivities of those fair values to immediate adverse changes in those assumptions, as defined below.

(in millions, except rates)	Mar 31, 2025	Dec 31, 2024
Weighted-average prepayment speed assumption (constant prepayment rate)	6.84 %	6.19 %
Impact on fair value of 10% adverse change	\$ (178)	\$ (209)
Impact on fair value of 20% adverse change	(348)	(406)
Weighted-average option adjusted spread ^(a)	6.06 %	5.97 %
Impact on fair value of a 100 basis point adverse change	\$ (387)	\$ (391)
Impact on fair value of a 200 basis point adverse change	(745)	(751)

(a) Includes the impact of operational risk and regulatory capital.

Other intangible assets

The Firm's finite-lived and indefinite-lived other intangible assets are initially recorded at their fair value primarily upon completion of a business combination. Finite-lived intangible assets, including core deposit intangibles, customer relationship intangibles, and certain other intangible assets, are amortized over their useful lives, estimated based on the expected future economic benefits. The Firm's intangible assets with indefinite lives, such as asset management contracts, are not subject to amortization and are assessed periodically for impairment.

As of March 31, 2025 and December 31, 2024, the net carrying values of other intangible assets consisted of finite-lived intangible assets of \$1.6 billion and \$1.7 billion, respectively, as well as indefinite-lived intangible assets, which are not subject to amortization, of \$1.2 billion at both periods.

Note 15 – Deposits

Refer to Note 17 of JPMorganChase’s 2024 Form 10-K for further information on deposits.

As of March 31, 2025 and December 31, 2024, noninterest-bearing and interest-bearing deposits were as follows:

(in millions)	March 31, 2025	December 31, 2024
U.S. offices		
Noninterest-bearing (included \$33,545 and \$28,904 at fair value) ^(a)	\$ 581,623	\$ 592,500
Interest-bearing (included \$1,290 and \$1,101 at fair value) ^(a)	1,416,585	1,345,914
Total deposits in U.S. offices	1,998,208	1,938,414
Non-U.S. offices		
Noninterest-bearing (included \$1,926 and \$2,255 at fair value) ^(a)	29,856	26,806
Interest-bearing (included \$378 and \$1,508 at fair value) ^(a)	467,813	440,812
Total deposits in non-U.S. offices	497,669	467,618
Total deposits	\$ 2,495,877	\$ 2,406,032

(a) Includes structured notes classified as deposits for which the fair value option has been elected. Refer to Note 3 for further discussion.

As of March 31, 2025 and December 31, 2024, time deposits in denominations that met or exceeded the insured limit were as follows:

(in millions)	March 31, 2025	December 31, 2024
U.S. offices	\$ 152,755	\$ 149,239
Non-U.S. offices ^(a)	90,575	92,639
Total	\$ 243,330	\$ 241,878

(a) Represents all time deposits in non-U.S. offices as these deposits typically exceed the insured limit.

As of March 31, 2025, the remaining maturities of interest-bearing time deposits in each of the 12-month periods ending March 31 were as follows:

March 31, (in millions)	U.S.	Non-U.S.	Total
2026	\$224,066	\$ 87,658	\$ 311,724
2027	660	115	775
2028	465	4	469
2029	402	45	447
2030	444	694	1,138
After 5 years	172	133	305
Total	\$226,209	\$ 88,649	\$ 314,858

Note 16 – Leases

Refer to Note 18 of JPMorganChase’s 2024 Form 10-K for a further discussion on leases.

Firm as lessee

At March 31, 2025, JPMorganChase and its subsidiaries were obligated under a number of noncancellable leases, predominantly operating leases for premises and equipment used primarily for business purposes.

Operating lease liabilities and right-of-use (“ROU”) assets are recognized at the lease commencement date based on the present value of the future minimum lease payments over the lease term.

The carrying values of the Firm’s operating leases were as follows:

(in millions)	March 31, 2025	December 31, 2024
Right-of-use assets	\$ 8,716	\$ 8,494
Lease liabilities	9,133	8,900

The Firm’s net rental expense was \$573 million and \$541 million for the three months ended March 31, 2025 and 2024, respectively.

Firm as lessor

The Firm’s lease financings are predominantly auto operating leases, and are included in other assets on the Firm’s Consolidated balance sheets.

The following table presents the Firm’s operating lease income, included within other income, and the related depreciation expense, included within technology, communications and equipment expense, on the Consolidated statements of income.

(in millions)	Three months ended March 31,	
	2025	2024
Operating lease income	\$ 829	\$ 672
Depreciation expense	505	435

Note 17 – Preferred stock

Refer to Note 21 of JPMorganChase’s 2024 Form 10-K for a further discussion on preferred stock.

The following is a summary of JPMorganChase’s non-cumulative preferred stock outstanding as of March 31, 2025 and December 31, 2024, and the quarterly dividend declarations for the three months ended March 31, 2025 and 2024.

	Shares ^(a)		Carrying value (in millions)		Issue date	Contractual rate in effect at March 31, 2025	Earliest redemption date ^(b)	Floating annualized rate ^(c)	Dividend declared per share	
	March 31, 2025	December 31, 2024	March 31, 2025	December 31, 2024					Three months ended March 31,	
									2025	2024

Total preferred stock	2,005,375	2,005,375	\$ 20,045	\$ 20,050						

(a) Represented by depositary shares.

(b) Each series of fixed-to-floating rate preferred stock converts to a floating rate at the earliest redemption date.

(c) References in the table to “SOFR” mean a floating annualized rate equal to three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spreads noted. References to “CMT” mean a floating annualized rate equal to the five-year Constant Maturity Treasury (“CMT”) rate plus the spreads noted.

(d) The initial dividend declared is prorated based on the number of days outstanding for the period. Dividends were declared quarterly thereafter at the contractual rate.

(e) The dividend rate for Series S preferred stock became floating and payable quarterly starting on February 1, 2024; prior to which the dividend rate was fixed at 6.75% or \$337.50 per share payable semiannually. The dividend rate for each quarterly dividend period commencing on February 1, 2024 was three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spread of 3.78%.

(f) As of March 31, 2024, no dividends had been declared on the Series NN preferred stock since the original issue date of March 12, 2024.

Each series of preferred stock has a liquidation value and redemption price per share of \$10,000, plus accrued but unpaid dividends. The aggregate liquidation value was \$20.1 billion at March 31, 2025.

Issuances

On February 4, 2025, the Firm issued \$3.0 billion of fixed-rate reset non-cumulative preferred stock, Series OO.

On March 12, 2024, the Firm issued \$2.5 billion of fixed-rate reset non-cumulative preferred stock, Series NN.

Redemptions

On February 1, 2025, the Firm redeemed all \$3.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series HH.

On October 1, 2024, the Firm redeemed all \$1.6 billion of its fixed-to-floating rate non-cumulative preferred stock, Series X.

On August 1, 2024, the Firm redeemed all \$2.3 billion of its fixed-to-floating rate non-cumulative preferred stock, Series FF.

On May 1, 2024, the Firm redeemed all \$5.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series Q, Series R and Series S.

On April 30, 2024, the Firm redeemed all \$1.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series U.

Note 18 – Earnings per share

Refer to Note 23 of JPMorganChase’s 2024 Form 10-K for a discussion of the computation of basic and diluted earnings per share (“EPS”). The following table presents the calculation of basic and diluted EPS for the three months ended March 31, 2025 and 2024.

(in millions, except per share amounts)	Three months ended March 31,	
	2025	2024
Basic earnings per share		
Net income	\$ 14,643	\$ 13,419
Less: Preferred stock dividends	255	397
Net income applicable to common equity	14,388	13,022
Less: Dividends and undistributed earnings allocated to participating securities	71	80
Net income applicable to common stockholders	\$ 14,317	\$ 12,942
Total weighted-average basic shares outstanding	2,819.4	2,908.3
Net income per share	\$ 5.08	\$ 4.45
Diluted earnings per share		
Net income applicable to common stockholders	\$ 14,317	\$ 12,942
Total weighted-average basic shares outstanding	2,819.4	2,908.3
Add: Dilutive impact of unvested PSUs, nondividend-earning RSUs and SARs	4.9	4.5
Total weighted-average diluted shares outstanding	2,824.3	2,912.8
Net income per share	\$ 5.07	\$ 4.44

Note 19 – Accumulated other comprehensive income/(loss)

AOCI includes the after-tax change in unrealized gains and losses on investment securities, foreign currency translation adjustments (including the impact of related derivatives), fair value changes of excluded components on fair value hedges, cash flow hedging activities, net gain/(loss) related to the Firm's defined benefit pension and OPEB plans, and fair value option-elected liabilities arising from changes in the Firm's own credit risk (DVA).

As of or for the three months ended March 31, 2025 (in millions)	Unrealized gains/(losses) on investment securities	Translation adjustments, net of hedges	Fair value hedges	Cash flow hedges	Defined benefit pension and OPEB plans	DVA on fair value option elected liabilities	Accumulated other comprehensive income/(loss)
Balance at January 1, 2025	\$ (3,830)	\$ (2,074)	\$ (221)	\$(4,814)	\$ (1,141)	\$ (376)	\$ (12,456)
Net change	953	489	28	1,674	(16)	217	3,345
Balance at March 31, 2025	\$ (2,877)^(a)	\$ (1,585)	\$ (193)	\$(3,140)	\$ (1,157)	\$ (159)	\$ (9,111)

As of or for the three months ended March 31, 2024 (in millions)	Unrealized gains/(losses) on investment securities	Translation adjustments, net of hedges	Fair value hedges	Cash flow hedges	Defined benefit pension and OPEB plans	DVA on fair value option elected liabilities	Accumulated other comprehensive income/(loss)
Balance at January 1, 2024	\$ (3,743)	\$ (1,216)	\$ (134)	\$(3,932)	\$ (1,078)	\$ (340)	\$ (10,443)
Net change	141	(204)	(21)	(889)	26	(249)	(1,196)
Balance at March 31, 2024	\$ (3,602) ^(a)	\$ (1,420)	\$ (155)	\$(4,821)	\$ (1,052)	\$ (589)	\$ (11,639)

(a) Included after-tax net unamortized unrealized gains/(losses) of \$(639) million and \$(824) million as of March 31, 2025 and 2024, respectively, related to AFS securities that have been transferred to HTM.

The following table presents the pre-tax and after-tax changes in the components of OCI.

Three months ended March 31, (in millions)	2025			2024		
	Pre-tax	Tax effect	After-tax	Pre-tax	Tax effect	After-tax
Unrealized gains/(losses) on investment securities:						
Net unrealized gains/(losses) arising during the period	\$ 1,220	\$ (295)	\$ 925	\$ (181)	\$ 44	\$ (137)
Reclassification adjustment for realized (gains)/losses included in net income ^(a)	37	(9)	28	366	(88)	278
Net change	1,257	(304)	953	185	(44)	141
Translation adjustments^(b):						
Translation	2,211	(105)	2,106	(1,365)	68	(1,297)
Hedges	(2,134)	517	(1,617)	1,442	(349)	1,093
Net change	77	412	489	77	(281)	(204)
Fair value hedges, net change^(c)	37	(9)	28	(27)	6	(21)
Cash flow hedges:						
Net unrealized gains/(losses) arising during the period	1,587	(383)	1,204	(1,762)	426	(1,336)
Reclassification adjustment for realized (gains)/losses included in net income ^(d)	621	(151)	470	589	(142)	447
Net change	2,208	(534)	1,674	(1,173)	284	(889)
Defined benefit pension and OPEB plans, net change	(19)	3	(16)	36	(10)	26
DVA on fair value option elected liabilities, net change	286	(69)	217	(327)	78	(249)
Total other comprehensive income/(loss)	\$ 3,846	\$ (501)	\$ 3,345	\$ (1,229)	\$ 33	\$ (1,196)

(a) The pre-tax amount is reported in Investment securities gains/(losses) in the Consolidated statements of income.

(b) Reclassifications of pre-tax realized gains/(losses) on translation adjustments and related hedges are reported in other income/expense in the Consolidated statements of income. There were no sales or liquidations of legal entities that resulted in reclassifications for the three months ended March 31, 2025 and 2024.

(c) Represents changes in fair value of cross-currency swaps attributable to changes in cross-currency basis spreads, which are excluded from the assessment of hedge effectiveness and recorded in other comprehensive income. The initial cost of cross-currency basis spreads is recognized in earnings as part of the accrual of interest on the cross-currency swaps.

(d) The pre-tax amounts are primarily recorded in noninterest revenue, net interest income and compensation expense in the Consolidated statements of income.

Note 20 – Restricted cash and other restricted assets

Refer to Note 26 of JPMorganChase’s 2024 Form 10-K for a detailed discussion of the Firm’s restricted cash and other restricted assets.

Certain of the Firm’s cash and other assets are restricted as to withdrawal or usage. These restrictions are imposed by various regulatory authorities based on the particular activities of the Firm’s subsidiaries.

The Firm is also subject to rules and regulations established by other U.S. and non-U.S. regulators. As part of its compliance with the respective regulatory requirements, the Firm’s broker-dealer activities are subject to certain restrictions on cash and other assets.

The following table presents the components of the Firm’s restricted cash:

(in billions)	March 31, 2025	December 31, 2024
Segregated for the benefit of securities and cleared derivative customers	\$ 20.0	\$ 18.7
Cash reserves at non-U.S. central banks and held for other general purposes	8.9	8.8
Total restricted cash^(a)	\$ 28.9	\$ 27.5

(a) Comprises \$27.7 billion and \$26.1 billion in deposits with banks, and \$1.2 billion and \$1.4 billion in cash and due from banks on the Consolidated balance sheets as of March 31, 2025 and December 31, 2024, respectively.

Also, as of March 31, 2025 and December 31, 2024, the Firm had the following other restricted assets:

- Cash and securities pledged with clearing organizations for the benefit of customers of \$36.4 billion and \$40.7 billion, respectively.
- Securities with a fair value of \$26.1 billion and \$26.8 billion, respectively, were also restricted in relation to customer activity.

Note 21 – Regulatory capital

Refer to Note 27 of JPMorganChase’s 2024 Form 10-K for a detailed discussion on regulatory capital.

The Federal Reserve establishes capital requirements, including well-capitalized standards, for the Firm as a consolidated financial holding company. The Office of the Comptroller of the Currency (“OCC”) establishes similar minimum capital requirements and standards for the Firm’s principal insured depository institution (“IDI”) subsidiary, JPMorgan Chase Bank, N.A.

Under the risk-based capital and leverage-based guidelines of the Federal Reserve, JPMorgan Chase & Co. is required to maintain minimum ratios for CET1 capital, Tier 1 capital, Total capital, Tier 1 leverage and the SLR. Failure to meet these minimum requirements could cause the Federal Reserve to take action. JPMorgan Chase Bank, N.A. is also subject to these capital requirements established by its primary regulators.

The following table presents the risk-based regulatory capital ratio requirements and well-capitalized ratios to which the Firm and JPMorgan Chase Bank, N.A. were subject as of March 31, 2025 and December 31, 2024.

	Standardized capital ratio requirements		Advanced capital ratio requirements		Well-capitalized ratios	
	BHC ^(a)	IDI ^(b)	BHC ^(a)	IDI ^(b)	BHC ^(c)	IDI ^(d)
Risk-based capital ratios						
CET1 capital	12.3 %	7.0 %	11.5 %	7.0 %	NA	6.5 %
Tier 1 capital	13.8	8.5	13.0	8.5	6.0 %	8.0
Total capital	15.8	10.5	15.0	10.5	10.0	10.0

Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and JPMorgan Chase Bank, N.A. are subject.

- (a) Represents the regulatory capital ratio requirements applicable to the Firm. The CET1, Tier 1 and Total capital ratio requirements each include a respective minimum requirement plus a GSIB surcharge of 4.5% as calculated under Method 2; plus a 3.3% SCB for Basel III Standardized ratios and a fixed 2.5% capital conservation buffer for Basel III Advanced ratios. The countercyclical buffer is currently set to 0% by the federal banking agencies.
- (b) Represents requirements for JPMorgan Chase Bank, N.A. The CET1, Tier 1 and Total capital ratio requirements include a fixed capital conservation buffer requirement of 2.5% that is applicable to JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. is not subject to the GSIB surcharge.
- (c) Represents requirements for bank holding companies pursuant to regulations issued by the Federal Reserve.
- (d) Represents requirements for JPMorgan Chase Bank, N.A. pursuant to regulations issued under the FDIC Improvement Act.

The following table presents the leverage-based regulatory capital ratio requirements and well-capitalized ratios to which the Firm and JPMorgan Chase Bank, N.A. were subject as of March 31, 2025 and December 31, 2024.

	Capital ratio requirements ^(a)		Well-capitalized ratios	
	BHC	IDI	BHC ^(b)	IDI
Leverage-based capital ratios				
Tier 1 leverage	4.0 %	4.0 %	NA	5.0 %
SLR	5.0	6.0	NA	6.0

Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and JPMorgan Chase Bank, N.A. are subject.

- (a) Represents minimum SLR requirement of 3.0%, as well as supplementary leverage buffer requirements of 2.0% and 3.0% for BHC and JPMorgan Chase Bank, N.A., respectively.
- (b) The Federal Reserve’s regulations do not establish well-capitalized thresholds for these measures for BHCs.

CECL Regulatory Capital Transition

Beginning January 1, 2022, the \$2.9 billion CECL capital benefit, provided by the Federal Reserve in response to the COVID-19 pandemic, was phased out at 25% per year over a three-year period and fully phased out as of January 1, 2025. As of December 31, 2024, the Firm’s CET1 capital reflected the remaining benefit of \$720 million associated with the CECL capital transition provisions.

Similarly, as of January 1, 2025, the Firm has phased out the other CECL capital transition provisions which impacted Tier 2 capital, adjusted average assets, total leverage exposure and RWA, as applicable.

Refer to Note 27 of JPMorganChase’s 2024 Form 10-K for further information on CECL capital transition provisions.

The following tables present risk-based capital metrics under both the Basel III Standardized and Basel III Advanced approaches and leverage-based capital metrics for JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. As of March 31, 2025 and December 31, 2024, JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. were well-capitalized and met all capital requirements to which each was subject.

March 31, 2025 (in millions, except ratios)	Basel III Standardized		Basel III Advanced	
	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.
Risk-based capital metrics:^(a)				
CET1 capital	\$ 279,791	\$ 277,695	\$ 279,791	\$ 277,695
Tier 1 capital	299,132	277,699	299,132	277,699
Total capital	330,533	298,442	316,529 ^(b)	284,478 ^(b)
Risk-weighted assets	1,815,045	1,763,680	1,799,055 ^(b)	1,641,027 ^(b)
CET1 capital ratio	15.4 %	15.7 %	15.6 %	16.9 %
Tier 1 capital ratio	16.5	15.7	16.6	16.9
Total capital ratio	18.2	16.9	17.6	17.3

December 31, 2024 (in millions, except ratios)	Basel III Standardized		Basel III Advanced	
	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.
Risk-based capital metrics:^(a)

Tier 1 capital ratio	16.8	16.0	16.9	17.3
Total capital ratio	18.5	17.2	17.9	17.7

(a) As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The capital metrics for the period ended December 31, 2024 reflected the CECL capital transition provisions.

(b) Includes the impacts of certain assets associated with First Republic to which the Standardized approach has been applied as permitted by the transition provisions in the U.S. capital rules.

Three months ended (in millions, except ratios)	March 31, 2025		December 31, 2024	
	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.	JPMorgan Chase & Co.	JPMorgan Chase Bank, N.A.
Leverage-based capital metrics:^(a)				
Adjusted average assets ^(b)	\$ 4,180,147	\$ 3,512,974	\$ 4,070,499	\$ 3,491,283
Tier 1 leverage ratio	7.2 %	7.9 %	7.2 %	7.9 %
Total leverage exposure	\$ 4,953,480	\$ 4,269,679	\$ 4,837,568	\$ 4,246,516
SLR	6.0 %	6.5 %	6.1 %	6.5 %

(a) As of January 1, 2025, the benefit from the CECL capital transition provision had been fully phased out. The capital metrics for the period ended December 31, 2024 reflected the CECL capital transition provisions.

(b) Adjusted average assets, for purposes of calculating the leverage ratios, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, and other intangible assets.

Note 22 – Off-balance sheet lending-related financial instruments, guarantees, and other commitments

JPMorganChase provides lending-related financial instruments (e.g., commitments and guarantees) to address the financing needs of its customers and clients. The contractual amount of these financial instruments represents the maximum possible credit risk to the Firm should the customer or client draw upon the commitment or the Firm be required to fulfill its obligation under the guarantee, and should the customer or client subsequently fail to perform according to the terms of the contract. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn or a default occurring. As a result, the total contractual amount of these instruments is not, in the Firm's view, representative of its expected future credit exposure or funding requirements. Refer to Note 28 of JPMorganChase's 2024 Form 10-K for a further discussion of lending-related commitments and guarantees, and the Firm's related accounting policies.

To provide for expected credit losses in wholesale and certain consumer lending-related commitments, an allowance for credit losses on lending-related commitments is maintained. Refer to Note 12 for further information regarding the allowance for credit losses on lending-related commitments.

The following table summarizes the contractual amounts and carrying values of off-balance sheet lending-related financial instruments, guarantees and other commitments at March 31, 2025 and December 31, 2024. The amounts in the table below for credit card, home equity and certain scored business banking lending-related commitments represent the total available credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit for these commitments will be utilized at the same time. The Firm can reduce or cancel these commitments, in accordance with the contract, or to the extent otherwise permitted by law, including when there has been a demonstrable decline in the creditworthiness of the borrower or significant decrease in the value of underlying property.

Off-balance sheet lending-related financial instruments, guarantees and other commitments

By remaining maturity (in millions)	Contractual amount						Carrying value ^{(h)(i)}

Other guarantees and commitments ^(g)	14,062	454	377	803	15,696	12,396	23	28

(a) Includes certain commitments to purchase loans from correspondents.

(b) Also includes commercial card lending-related commitments primarily in CIB.

(c) Predominantly all consumer and wholesale lending-related commitments are in the U.S.

(d) As of March 31, 2025 and December 31, 2024, reflected the contractual amount net of risk participations totaling \$147 million and \$85 million, respectively, for other unfunded commitments to extend credit; \$9.5 billion at both periods for standby letters of credit and other financial guarantees; \$526 million and \$556 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations.

(e) As of March 31, 2025 and December 31, 2024, collateral held by the Firm in support of securities lending indemnification agreements was \$376.7 billion and \$328.7 billion, respectively. Securities lending collateral primarily consists of cash, G7 government securities, and securities issued by U.S. GSEs and government agencies.

(f) As of March 31, 2025 and December 31, 2024, includes guarantees to the Fixed Income Clearing Corporation under the sponsored member repo program and commitments and guarantees associated with the Firm's membership in certain clearing houses.

(g) As of March 31, 2025 and December 31, 2024, primarily includes unfunded commitments to purchase secondary market loans, other equity investment commitments, and unfunded commitments related to certain tax-oriented equity investments.

(h) For lending-related products, the carrying value includes the allowance for lending-related commitments and the guarantee liability; for derivative-related products, and lending-related commitments for which the fair value option was elected, the carrying value represents the fair value.

(i) For lending-related commitments, the carrying value also includes fees and any purchase discounts or premiums that are deferred and recognized in accounts payable and other liabilities on the Consolidated balance sheets. Deferred amounts for revolving commitments and commitments not expected to fund, are amortized to lending- and deposit-related fees on a straight line basis over the commitment period. For all other commitments the deferred amounts remain deferred until the commitment funds or is sold.

Other unfunded commitments to extend credit

Other unfunded commitments to extend credit generally consist of commitments for working capital and general corporate purposes, extensions of credit to support commercial paper facilities and bond financings in the event that those obligations cannot be remarketed to new investors, as well as committed liquidity facilities to clearing organizations. The Firm also issues commitments under multipurpose facilities which could be drawn upon in several forms, including the issuance of a standby letter of credit.

The following table summarizes the contractual amount and carrying value of standby letters of credit and other financial guarantees and other letters of credit arrangements as of March 31, 2025 and December 31, 2024.

Standby letters of credit, other financial guarantees and other letters of credit

(in millions)	March 31, 2025		December 31, 2024	
	Standby letters of credit and other financial guarantees	Other letters of credit	Standby letters of credit and other financial guarantees	Other letters of credit
Investment-grade ^(a)	\$ 20,093	\$ 3,695	\$ 20,443	\$ 3,380
Noninvestment-grade ^(a)	8,432	1,106	8,233	974
Total contractual amount	\$ 28,525	\$ 4,801	\$ 28,676	\$ 4,354
Allowance for lending-related commitments	\$ 121	\$ 37	\$ 94	\$ 37
Guarantee liability	396	—	379	—
Total carrying value	\$ 517	\$ 37	\$ 473	\$ 37
Commitments with collateral	\$ 16,723	\$ 381	\$ 16,805	\$ 357

(a) The ratings scale is based on the Firm's internal risk ratings. Refer to Note 11 for further information on internal risk ratings.

Derivatives qualifying as guarantees

The Firm transacts in certain derivative contracts that have the characteristics of a guarantee under U.S. GAAP. Refer to Note 28 of JPMorganChase's 2024 Form 10-K for further information on these derivatives.

The following table summarizes the derivatives qualifying as guarantees as of March 31, 2025 and December 31, 2024.

(in millions)	March 31, 2025	December 31, 2024
Notional amounts		
Derivative guarantees	\$ 48,671	\$ 49,628
Stable value contracts with contractually limited exposure	34,988	32,939
Maximum exposure of stable value contracts with contractually limited exposure	1,342	1,740
Fair value		
Derivative payables	38	113

In addition to derivative contracts that meet the characteristics of a guarantee, the Firm is both a purchaser and seller of credit protection in the credit derivatives market. Refer to Note 4 for a further discussion of credit derivatives.

Standby letters of credit and other financial guarantees

Standby letters of credit and other financial guarantees are conditional lending commitments issued by the Firm to guarantee the performance of a client or customer to a third party under certain arrangements, such as commercial paper facilities, bond financings, acquisition financings, trade financings and similar transactions.

Loan sales- and securitization-related indemnifications

In connection with the Firm's mortgage loan sale and securitization activities with U.S. GSEs the Firm has made representations and warranties that the loans sold meet certain requirements, and that may require the Firm to repurchase mortgage loans and/or indemnify the loan purchaser if such representations and warranties are breached by the Firm.

The liability related to repurchase demands associated with private label securitizations is separately evaluated by the Firm in establishing its litigation reserves. Refer to Note 24 of this Form 10-Q and Note 30 of JPMorganChase's 2024 Form 10-K for additional information regarding litigation.

Merchant charge-backs

Under the rules of payment networks, in its role as a merchant acquirer, the Firm's Merchant Services business in CIB Payments, retains a contingent liability for disputed processed credit and debit card transactions that result in a charge-back to the merchant. If a dispute is resolved in the cardholder's favor, the Firm will (through the cardholder's issuing bank) credit or refund the amount to the cardholder and will charge back the transaction to the merchant. If the Firm is unable to collect the amount from the merchant, the Firm will bear the loss for the amount credited or refunded to the cardholder. The Firm mitigates this risk by withholding future settlements, retaining cash reserve accounts or obtaining other collateral. In addition, the Firm recognizes a valuation allowance that covers the payment or performance risk related to charge-backs.

Sponsored member repo program

The Firm acts as a sponsoring member to clear eligible overnight and term resale and repurchase agreements through the Government Securities Division of the Fixed Income Clearing Corporation ("FICC") on behalf of clients that become sponsored members under the FICC's rules. The Firm also guarantees to the FICC the prompt and full payment and performance of its sponsored member clients' respective obligations under the FICC's rules. The Firm minimizes its liability under these guarantees by obtaining a security interest in the cash or high-quality securities collateral that the clients place with the clearing house; therefore, the Firm expects the risk of loss to be remote. The Firm's maximum possible exposure, without taking into consideration the associated collateral, is included in the Exchange & clearing house guarantees and commitments line on page 161. Refer to Note 11 of JPMorganChase's 2024 Form 10-K for additional information on credit risk mitigation practices on resale agreements and the types of collateral pledged under repurchase agreements.

Guarantees of subsidiaries

The Parent Company has guaranteed certain long-term debt and structured notes of its subsidiaries, including JPMorgan Chase Financial Company LLC ("JPMFC"), a 100%-owned finance subsidiary. All securities issued by JPMFC are fully and unconditionally guaranteed by the Parent Company and no other subsidiary of the Parent Company guarantees these securities. These guarantees, which rank pari passu with the Firm's unsecured and unsubordinated indebtedness, are not included in the table on page 161 of this Note. Refer to Note 20 of JPMorganChase's 2024 Form 10-K for additional information.

Note 23 – Pledged assets and collateral

Refer to Note 29 of JPMorganChase's 2024 Form 10-K for a discussion of the Firm's pledged assets and collateral.

Pledged assets

The Firm pledges financial assets that it owns to maintain potential borrowing capacity at discount windows with Federal Reserve banks, various other central banks and FHLBs. Additionally, the Firm pledges assets for other purposes, including to collateralize repurchase and other securities financing agreements, to cover short sales and to collateralize derivative contracts and deposits. Certain of these pledged assets may be sold or repledged or otherwise used by the secured parties and are parenthetically identified on the Consolidated balance sheets as assets pledged.

The following table presents the carrying value of the Firm's pledged assets.

(in billions)	March 31, 2025	December 31, 2024
Assets that may be sold or repledged or otherwise used by secured parties	\$ 242.1	\$ 152.5
Assets that may not be sold or repledged or otherwise used by secured parties	360.9	297.9
Assets pledged at Federal Reserve banks and FHLBs	698.9	724.0
Total pledged assets	\$ 1,301.9	\$ 1,174.4

Total pledged assets do not include assets of consolidated VIEs; these assets are used to settle the liabilities of those entities. Refer to Note 13 for additional information on assets and liabilities of consolidated VIEs. Refer to Note 10 for additional information on the Firm's securities financing activities. Refer to Note 20 of JPMorganChase's 2024 Form 10-K for additional information on the Firm's long-term debt.

Collateral

The Firm accepts financial assets as collateral that it is permitted to sell or repledge, deliver or otherwise use. This collateral is generally obtained under resale and other securities financing agreements, prime brokerage-related held-for-investment customer receivables and derivative contracts. Collateral is generally used under repurchase and other securities financing agreements, to cover short sales and to collateralize derivative contracts and deposits.

The following table presents the fair value of collateral accepted.

(in billions)	March 31, 2025	December 31, 2024
Collateral permitted to be sold or repledged, delivered, or otherwise used	\$ 1,652.9	\$ 1,544.0
Collateral sold, repledged, delivered or otherwise used	1,262.1	1,210.7

Note 24 – Litigation

Contingencies

As of March 31, 2025, the Firm and its subsidiaries and affiliates are defendants or respondents in numerous evolving legal proceedings, including private proceedings, public proceedings, government investigations, regulatory enforcement matters, and the matters described below. The litigations range from individual actions involving a single plaintiff to class action lawsuits with potentially millions of class members. Investigations and regulatory enforcement matters involve both formal and informal proceedings, by both governmental agencies and self-regulatory organizations. These legal proceedings are at varying stages of adjudication, arbitration or investigation, and involve each of the Firm's lines of business and several geographies and a wide variety of claims (including common law tort and contract claims and statutory antitrust, securities and consumer protection claims), some of which present novel legal theories.

The Firm believes the estimate of the aggregate range of reasonably possible losses, in excess of reserves established, for its legal proceedings is from \$0 to approximately \$1.1 billion at March 31, 2025. This estimated aggregate range of reasonably possible losses was based upon information available as of that date for those proceedings in which the Firm believes that an estimate of reasonably possible loss can be made. For certain matters, the Firm does not believe that such an estimate can be made, as of that date. The Firm's estimate of the aggregate range of reasonably possible losses involves significant judgment, given:

- the number, variety and varying stages of the proceedings, including the fact that many are in preliminary stages,
- the existence in many such proceedings of multiple defendants, including the Firm, whose share of liability (if any) has yet to be determined,
- the numerous yet-unresolved issues in many of the proceedings, including issues regarding class certification and the scope of many of the claims, and
- the uncertainty of the various potential outcomes of such proceedings, including where the Firm has made assumptions concerning future rulings by the court or other adjudicator, or about the behavior or incentives of adverse parties or regulatory authorities, and those assumptions prove to be incorrect.

In addition, the outcome of a particular proceeding may be a result which the Firm did not take into account in its estimate because the Firm had deemed the likelihood of that outcome to be remote.

Accordingly, the Firm's estimate of the aggregate

range of reasonably possible losses will change from time to time, and actual losses may vary significantly.

Set forth below are descriptions of the Firm's material legal proceedings.

1MDB Litigation. J.P. Morgan (Suisse) SA was named as a defendant in a civil litigation filed in May 2021 in Malaysia by 1Malaysia Development Berhad ("1MDB"), a Malaysian state-owned and controlled investment fund. The claim alleges "dishonest assistance" against J.P. Morgan (Suisse) SA in relation to payments of \$300 million and \$500 million, from 2009 and 2010, respectively, received from 1MDB and paid into an account at J.P. Morgan (Suisse) SA held by 1MDB PetroSaudi Limited, a joint venture company between 1MDB and PetroSaudi Holdings (Cayman) Limited. In March 2024, the Court upheld the Firm's challenge to the validity of service and the Malaysian Court's jurisdiction to hear the claim. That decision has been appealed by 1MDB. In August 2023, the Court denied an application by 1MDB to discontinue its claim with permission to re-file a new claim in the future. That decision was appealed by both 1MDB and the Firm, and an appeals court is scheduled to hear both appeals in November 2025. In its appeal, the Firm seeks to prevent any claim from continuing.

In addition, in November 2023, the Federal Office of the Attorney General (OAG) in Switzerland notified J.P. Morgan (Suisse) SA that it is conducting an investigation into possible criminal liability in connection with transactions arising from J.P. Morgan (Suisse) SA's relationship with the 1MDB PetroSaudi joint venture and its related persons for the period September 2009 through August 2015. The OAG investigation is ongoing.

Amrapali. India's Enforcement Directorate ("ED") is investigating J.P. Morgan India Private Limited in connection with investments made in 2010 and 2012 by two offshore funds formerly managed by JPMorganChase entities into residential housing projects developed by the Amrapali Group ("Amrapali") relating to delays in delivering or failure to deliver residential units. In August 2021, the ED issued an order fining J.P. Morgan India Private Limited approximately \$31.5 million, and the Firm is appealing that order. Relatedly, in July 2019, the Supreme Court of India issued an order making preliminary findings that Amrapali and other parties, including unspecified JPMorganChase entities and the offshore funds that had invested in the projects, violated certain criminal currency control and money laundering provisions, and ordered the ED to conduct a further inquiry. The Firm is responding to and cooperating with the inquiry.

Foreign Exchange Investigations and Litigation. The Firm previously reported settlements with certain government authorities relating to its foreign exchange (“FX”) sales and trading activities and controls related to those activities. Among those resolutions, in May 2015, the Firm pleaded guilty to a single violation of federal antitrust law. The Department of Labor (“DOL”) granted the Firm exemptions that permit the Firm and its affiliates to continue to rely on the Qualified Professional Asset Manager exemption under the Employee Retirement Income Security Act (“ERISA”) through the ten-year disqualification period following the antitrust plea. The only remaining FX-related governmental inquiry is a South Africa Competition Commission matter which is currently pending before the South Africa Competition Tribunal.

With respect to civil litigation matters, some FX-related individual and putative class actions filed outside the U.S., including in the U.K., Israel, the Netherlands, Brazil and Australia remain. In July 2023, the U.K. Court of Appeal overturned the Competition Appeal Tribunal's earlier denial of a request for class certification on an opt-out basis. The defendants have appealed this decision to the U.K. Supreme Court. In Israel, a settlement in principle has been reached on the putative class action, which remains subject to court approval. In Australia, the parties have reached an agreement in principle to settle the class action. The settlement is subject to Court approval.

Interchange Litigation. Groups of merchants and retail associations filed a series of class action complaints alleging that Visa and Mastercard, as well as certain banks, conspired to set the price of credit and debit card interchange fees and enacted related rules in violation of antitrust laws.

In September 2018, the parties settled the class action seeking monetary relief, with the defendants collectively contributing approximately \$6.2 billion. The settlement has been approved by the United States District Court for the Eastern District of New York and affirmed on appeal. Based on the percentage of merchants that opted out of the settlement, \$700 million has been returned to the defendants from the settlement escrow. A separate class action seeking injunctive relief continues, and in September 2021, the District Court granted plaintiffs’ motion for class certification in part, and denied the motion in part. In June 2024, the District Court denied preliminary approval of a settlement of the injunctive class action in which Visa and Mastercard agreed to certain changes to their respective network rules and system-wide reductions in interchange rates for U.S.-based merchants. The parties are considering next steps.

Of the merchants who opted out of the damages class settlement, certain merchants filed individual actions raising similar allegations against Visa and

Mastercard, as well as against the Firm and other banks. While some of those actions remain pending, the defendants have reached settlements with the merchants who opted out representing approximately 80% of the combined Mastercard-branded and Visa-branded payment card sales volume. A number of these actions are pending in the United States District Court for the Southern District of New York, and that court has scheduled a trial of the claims brought by several merchants to begin in October 2025.

LIBOR and Other Benchmark Rate Investigations and Litigation. JPMorganChase has responded to inquiries from various governmental agencies and entities around the world relating primarily to the British Bankers Association’s (“BBA”) London Interbank Offered Rate (“LIBOR”) for various currencies and the European Banking Federation’s Euro Interbank Offered Rate (“EURIBOR”). The Swiss Competition Commission’s investigation of the Firm relating to EURIBOR has been settled, and the Firm paid a penalty and costs of approximately 9 million Swiss franc. The Firm appealed a December 2016 decision by the European Commission against the Firm and other banks finding an infringement of European antitrust rules relating to EURIBOR. In December 2023, the European General Court annulled the fine imposed by the European Commission, but exercised its discretion to re-impose a fine in an identical amount. In March 2024, the Firm filed an appeal of this decision with the Court of Justice of the European Union.

In addition, the Firm has been named as a defendant along with other banks in various individual and putative class actions related to benchmark rates, including U.S. dollar LIBOR. In actions related to U.S. dollar LIBOR during the period that it was administered by the BBA, the United States District Court for the Southern District of New York granted class certification of antitrust claims related to bonds and interest rate swaps sold directly by the defendants, including the Firm. The Firm has obtained dismissal of certain actions and resolved certain other actions, and as to all remaining actions has moved for summary judgment. In addition, a lawsuit filed by a group of individual plaintiffs asserting antitrust claims, alleging that the Firm and other defendants were engaged in an unlawful agreement to set U.S. dollar LIBOR and conspired to monopolize the market for LIBOR-based consumer loans and credit cards was dismissed in October 2023 and affirmed on appeal by the United States Court of Appeals for the Ninth Circuit in December 2024. The Firm has resolved all non-U.S. dollar LIBOR actions.

Russian Litigation. The Firm is obligated to comply with international sanctions laws, which mandate the blocking of certain assets. These laws apply when assets associated with individuals, companies, products or services are within the scope of the

sanctions. The Firm has faced actual and threatened litigation in Russia seeking payments that the Firm cannot make under, and is contractually excused from paying as a result of, relevant sanctions laws. In claims involving the Firm and claims filed against other financial institutions, Russian courts have disregarded the parties' contractual agreements concerning forum selection and did not recognize foreign sanctions laws as a basis for not making payment. Russian courts have entered judgment against the Firm in a number of claims, including one for \$439 million, and a judgment has been executed against assets held onshore by the Firm in Russia. The total amount of the judgments exceeds the total amount of available assets that the Firm holds in Russia. The Firm continues to appeal the Russian courts' decisions, and judgments may not be executed while on appeal. Russian courts have also ordered interim freezes of Firm assets in Russia (including, among other things, funds in bank accounts, securities, shares in authorized capital, and certain trademarks, of the named defendants) pending a determination of certain underlying claims against the Firm. The Firm has challenged claims being pursued in the Russian courts and related freeze orders in other jurisdictions provided for by the parties' contractual forum selections. If further claims are enforced despite the actions taken by the Firm to challenge the claims and orders and to seek the proper application of law, the Firm's assets in Russia could be seized in full, and certain client assets could also be seized, or the Firm could be prevented from complying with its obligations.

Shareholder Litigation. Several shareholder putative class actions, as well as shareholder derivative actions purporting to act on behalf of the Firm, have been filed against the Firm, its Board of Directors and certain of its current and former officers.

Certain of these shareholder suits relate to historical trading practices by former employees in the precious metals and U.S. treasuries markets and related conduct which were the subject of the Firm's resolutions with the DOJ, CFTC and SEC in September 2020, and fiduciary activities that were separately the subject of a resolution between JPMorgan Chase Bank, N.A. and the OCC in November 2020. One of these shareholder derivative suits was filed in the Supreme Court of the State of New York in May 2022, asserting breach of fiduciary duty and unjust enrichment claims relating to the historical trading practices and related conduct and fiduciary activities which were the subject of the resolutions described above. In December 2022, the court granted defendants' motion to dismiss this action in full, and in April 2025 the appellate court affirmed the dismissal.

A second shareholder derivative action relating to the historical trading practices and related conduct was

filed in the United States District Court for the Eastern District of New York in December 2022. Defendants have moved to dismiss the complaint.

Zelle Network Litigation. In December 2024, the Consumer Financial Protection Bureau ("CFPB") filed a complaint against Early Warning Services, LLC ("EWS"), Bank of America, N.A., Wells Fargo Bank, N.A. and JPMorgan Chase Bank, N.A. in the United States District Court for the District of Arizona. The CFPB alleged that EWS and the defendant banks failed to take sufficient efforts to prevent fraud on the Zelle network. In March 2025, the Court dismissed the complaint with prejudice at the request of the CFPB.

* * *

In addition to the various legal proceedings discussed above, JPMorganChase and its subsidiaries are named as defendants or are otherwise involved in a substantial number of other legal proceedings. The Firm believes it has meritorious defenses to the claims asserted against it in its currently outstanding legal proceedings and it intends to defend itself vigorously. Additional legal proceedings may be initiated from time to time in the future.

The Firm has established reserves for several hundred of its currently outstanding legal proceedings. In accordance with the provisions of U.S. GAAP for contingencies, the Firm accrues for a litigation-related liability when it is probable that such a liability has been incurred and the amount of the loss can be reasonably estimated. The Firm evaluates its outstanding legal proceedings each quarter to assess its litigation reserves, and makes adjustments in such reserves, upward or downward, as appropriate, based on management's best judgment after consultation with counsel. The Firm's legal expense was \$121 million and \$(72) million for the three months ended March 31, 2025 and 2024, respectively. There is no assurance that the Firm's litigation reserves will not need to be adjusted in the future.

In view of the inherent difficulty of predicting the outcome of legal proceedings, particularly where the claimants seek very large or indeterminate damages, or where the matters present novel legal theories, involve a large number of parties or are in early stages of discovery, the Firm cannot state with confidence what will be the eventual outcomes of the currently pending matters, the timing of their ultimate resolution or the eventual losses, fines, penalties or consequences related to those matters. JPMorganChase believes, based upon its current knowledge and after consultation with counsel, consideration of the material legal proceedings described above and after taking into account its current litigation reserves and its estimated aggregate range of possible losses, that the other legal proceedings currently pending against it should not

have a material adverse effect on the Firm's consolidated financial condition. The Firm notes, however, that in light of the uncertainties involved in such proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves it has currently accrued or that a matter will not have material reputational consequences. As a result, the outcome of a particular matter may be material to JPMorganChase's operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of JPMorganChase's income for that period.

Note 25 – Business segments & Corporate

The Firm is managed on an LOB basis. There are three reportable business segments – Consumer & Community Banking, Commercial & Investment Bank, and Asset & Wealth Management – with the remaining activities in Corporate.

The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is evaluated by the Firm's Operating Committee, whose members act collectively as the Firm's chief operating decision maker. Segment results are presented on a managed basis. Refer to JPMorganChase's 2024 Form 10-K Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on page 67 for a definition of managed basis and Note 32 for a further discussion of the Firm's business segments.

Description of business segment reporting methodology

Results of the reportable business segments are intended to present each segment as if it were a stand-alone business. The management reporting process that derives business segment results includes the allocation of certain income and expense items. The Firm periodically assesses the assumptions, methodologies and reporting classifications used for segment reporting, and therefore further refinements may be implemented in future periods. The Firm also assesses the level of capital required for each LOB on at least an annual basis. The Firm's LOBs also provide various business metrics which are utilized by the Firm and its investors and analysts in assessing performance.

Revenue sharing

When business segments or businesses within each segment join efforts to sell products and services to the Firm's clients and customers, the participating businesses may agree to share revenue from those transactions. Revenue is generally recognized in the segment responsible for the related product or service, with allocations to the other segments or businesses involved in the transaction. The segment and business results reflect these revenue-sharing agreements.

Funds transfer pricing

Funds transfer pricing ("FTP") is the process by which the Firm allocates interest income and expense to the LOBs and Other Corporate and transfers the primary interest rate risk and liquidity risk to Treasury and CIO.

The funds transfer pricing process considers the interest rate and liquidity risk characteristics of assets and liabilities and off-balance sheet products.

Periodically, the methodology and assumptions utilized in the FTP process are adjusted to reflect economic conditions and other factors, which may

impact the allocation of net interest income to the segments. Effective in the fourth quarter of 2024, the Firm updated its FTP with respect to consumer deposits, which resulted in an increase in the funding benefit reflected within CCB's net interest income that is fully offset in Corporate, with no effect on the Firm's net interest income.

As a result of lower average interest rates in the current period, the cost of funding for assets and the funding benefit earned for liabilities generally decreased compared with the prior year.

Foreign exchange risk

Foreign exchange risk is transferred from the LOBs and Other Corporate to Treasury and CIO for certain revenues and expenses. Treasury and CIO manages these risks centrally and reports the impact of foreign exchange rate movements related to the transferred risk in its results.

Capital allocation

The amount of capital assigned to each LOB and Corporate is referred to as equity. At least annually, the assumptions, judgments and methodologies used to allocate capital are reassessed and, as a result, the capital allocated to the LOBs and Corporate may change. Refer to Note 32 of JPMorganChase's 2024 Form 10-K for additional information on capital allocation.

Segment & Corporate results

The following table provides a summary of the Firm's segment results as of or for the three months ended March 31, 2025 and 2024, on a managed basis. The Firm's definition of managed basis starts with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm (and each of the reportable business segments) on an FTE basis. Accordingly, revenue from

investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. Refer to Note 32 of JPMorganChase's 2024 Form 10-K for additional information on the Firm's managed basis.

(a) Segment managed results reflect revenue on an FTE basis with the corresponding income tax impact recorded within income tax expense/(benefit). These adjustments are eliminated in reconciling items to arrive at the Firm's reported U.S. GAAP results.

(b) Excludes expense related to services provided by Corporate support units, which is allocated from Corporate to each respective reportable business segment, as applicable, through noncompensation expense.

(c) Reflects occupancy; technology, communications and equipment; professional and outside services; marketing; and other expense. Refer to Note 5 for additional information on other expense.

(d) Certain services are provided by Corporate and used by each of the reportable business segments. The costs of these services, including compensation-related costs, are allocated from Corporate to the respective reportable business segments, with the allocations recorded in noncompensation expense.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
JPMorgan Chase & Co.:

Results of Review of Interim Financial Statements

We have reviewed the accompanying consolidated balance sheet of JPMorgan Chase & Co. and its subsidiaries (the “Firm”) as of March 31, 2025, and the related consolidated statements of income, comprehensive income, changes in stockholders’ equity and cash flows for the three-month periods ended March 31, 2025 and 2024, including the related notes (collectively referred to as the “interim financial statements”). Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Firm as of December 31, 2024, and the related consolidated statements of income, comprehensive income, changes in stockholders’ equity and of cash flows for the year then ended (not presented herein), and in our report dated February 14, 2025, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet information as of December 31, 2024, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Basis for Review Results

These interim financial statements are the responsibility of the Firm’s management. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Firm in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our review in accordance with the standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

(a) Represents securities which are tax-exempt for U.S. federal income tax purposes.

(b) Includes brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated Balance Sheets.

(c) The rates reflect the impact of interest earned on cash collateral where the cash collateral has been netted against certain derivative payables.

(d) All other interest-bearing liabilities include brokerage-related customer payables.

(e) The combined balance of trading liabilities – debt and equity instruments was \$157.3 billion and \$174.1 billion for the three months ended March 31, 2025 and 2024, respectively.

(f) Interest includes the effect of certain related hedging derivatives. Taxable-equivalent amounts are used where applicable.

(g) The annualized rate for securities based on amortized cost was 3.82% and 3.60% for the three months ended March 31, 2025 and 2024, respectively, and does not give effect to changes in fair value that are reflected in AOCI.

GLOSSARY OF TERMS AND ACRONYMS

2024 Form 10-K: Annual report on Form 10-K for year ended December 31, 2024, filed with the U.S. Securities and Exchange Commission.

ABS: Asset-backed securities

Active foreclosures: Loans referred to foreclosure where formal foreclosure proceedings are ongoing. Includes both judicial and non-judicial states.

AFS: Available-for-sale

Allowance for loan losses to total retained loans: represents period-end allowance for loan losses divided by retained loans.

Amortized cost: Amount at which a financing receivable or investment is originated or acquired, adjusted for accretion or amortization of premium, discount, and net deferred fees or costs, collection of cash, charge-offs, foreign exchange, and fair value hedge accounting adjustments. For AFS securities, amortized cost is also reduced by any impairment losses recognized in earnings. Amortized cost is not reduced by the allowance for credit losses, except where explicitly presented net.

AOI: Accumulated other comprehensive income/(loss)

ARM(s): Adjustable rate mortgage(s)

AUC: "Assets under custody": Represents assets held directly or indirectly on behalf of clients under safekeeping, custody and servicing arrangements.

Auto loan and lease origination volume: Dollar amount of auto loans and leases originated.

AWM: Asset & Wealth Management

Beneficial interests issued by consolidated VIEs: represents the interest of third-party holders of debt, equity securities, or other obligations, issued by VIEs that JPMorganChase consolidates.

BHC: Bank holding company

BWM: Banking & Wealth Management

Bridge Financing Portfolio: A portfolio of held-for-sale unfunded loan commitments and funded loans. The unfunded commitments include both short-term bridge loan commitments that will ultimately be replaced by longer term financing as well as term loan commitments. The funded loans include term loans and funded revolver facilities.

CCAR: Comprehensive Capital Analysis and Review

CCB: Consumer & Community Banking

CCP: Central Counterparty

CDS: Credit default swaps

CECL: Current Expected Credit Losses

CEO: Chief Executive Officer

CET1 capital: Common equity Tier 1 capital

CFO: Chief Financial Officer

CFTC: Commodity Futures Trading Commission

CIB: Commercial & Investment Bank

CIO: Chief Investment Office

Client assets: Represent assets under management as well as custody, brokerage, administration and deposit accounts.

Client deposits and other third-party liabilities: Deposits, as well as deposits that are swept to on-balance sheet liabilities (e.g., commercial paper, federal funds purchased and securities loaned or sold under repurchase agreements) as part of client cash management programs.

Client investment assets: Represent assets under management as well as custody, brokerage and annuity accounts, and deposits held in investment accounts.

CLTV: Combined loan-to-value

CMT: Constant Maturity Treasury

Collateral-dependent: A loan is considered to be collateral-dependent when repayment of the loan is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulty, including when foreclosure is deemed probable based on borrower delinquency.

Commercial Card: provides a wide range of payment services to corporate and public sector clients worldwide through the commercial card products. Services include procurement, corporate travel and entertainment, expense management services, and business-to-business payment solutions.

Credit derivatives: Financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Upon the occurrence of a credit event by the reference entity, which may include, among other events, the bankruptcy or failure to pay its obligations, or certain restructurings of the debt of the reference entity, neither party has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value at the time of settling the credit derivative contract. The determination as to whether a credit event has occurred is generally made by the relevant International Swaps and Derivatives Association ("ISDA") Determinations Committee.

Criticized: Criticized loans, lending-related commitments and derivative receivables that are

classified as special mention, substandard and doubtful categories for regulatory purposes and are generally consistent with a rating of CCC+/Caa1 and below, as defined by S&P and Moody's.

CRR: Capital Requirements Regulation

CVA: Credit valuation adjustment

DVA: Debit valuation adjustment

EC: European Commission

Eligible HQLA: Eligible high-quality liquid assets, for purposes of calculating the LCR, is the amount of unencumbered HQLA that satisfy certain operational considerations as defined in the LCR rule.

Eligible LTD: Long-term debt satisfying certain eligibility criteria

Embedded derivatives: are implicit or explicit terms or features of a financial instrument that affect some or all of the cash flows or the value of the instrument in a manner similar to a derivative. An instrument containing such terms or features is referred to as a "hybrid." The component of the hybrid that is the non-derivative instrument is referred to as the "host." For example, callable debt is a hybrid instrument that contains a plain vanilla debt instrument (i.e., the host) and an embedded option that allows the issuer to redeem the debt issue at a specified date for a specified amount (i.e., the embedded derivative). However, a floating rate instrument is not a hybrid composed of a fixed-rate instrument and an interest rate swap.

EPS: Earnings per share

ERISA: Employee Retirement Income Security Act of 1974

ESG: Environmental, Social and Governance

ETD: "Exchange-traded derivatives": Derivative contracts that are executed on an exchange and settled via a central clearing house.

EU: European Union

Expense categories:

- **Volume- and/or revenue-related** expenses generally correlate with changes in the related business/transaction volume or revenue. Examples of volume- and revenue-related expenses include commissions and incentive compensation, depreciation expense related to operating lease assets, and brokerage expense related to equities trading transaction volume.
- **Investments** include expenses associated with supporting medium- to longer-term strategic plans of the Firm. Examples of investments include initiatives in technology (including related compensation), marketing, and compensation for new bankers and client advisors.
- **Structural** expenses are those associated with the day-to-day cost of running the bank and are

expenses not covered by the above two categories. Examples of structural expenses include employee salaries and benefits, as well as noncompensation costs such as real estate and all other expenses.

Fannie Mae: Federal National Mortgage Association

FASB: Financial Accounting Standards Board

FCA: Financial Conduct Authority

FDIC: Federal Deposit Insurance Corporation

FDM: "Financial difficulty modification" applies to loan modifications effective January 1, 2023, and is deemed to occur when the Firm modifies specific terms of the original loan agreement. The following types of modifications are considered FDMs: principal forgiveness, interest rate reduction, other-than-insignificant payment deferral, term extension or a combination of these modifications.

Federal Reserve: The Board of the Governors of the Federal Reserve System

FFIEC: Federal Financial Institutions Examination Council

FHA: Federal Housing Administration

FHLB: Federal Home Loan Bank

FICO score: A measure of consumer credit risk based on information in consumer credit reports produced by Fair Isaac Corporation. Because certain aged data is excluded from credit reports based on rules in the Fair Credit Reporting Act, FICO scores may not reflect all historical information about a consumer.

FICC: Fixed Income Clearing Corporation

FINRA: Financial Industry Regulatory Authority

Firm: JPMorgan Chase & Co.

First Republic: On May 1, 2023, JPMorganChase acquired certain assets and assumed certain liabilities of First Republic Bank (the "First Republic acquisition") from the FDIC. "First Republic-related," "associated with First Republic" or similar expressions refer to the relevant effects of the First Republic acquisition, as well as subsequent related business and activities, as applicable. Refer to Note 34 of the Firm's 2024 Form 10-K for additional information.

Forward points: represents the interest rate differential between two currencies, which is either added to or subtracted from the current exchange rate (i.e., "spot rate") to determine the forward exchange rate.

Freddie Mac: Federal Home Loan Mortgage Corporation

Free-standing derivatives: is a derivative contract entered into either separate and apart from any of the Firm's other financial instruments or equity transactions. Or, in conjunction with some other

transaction and is legally detachable and separately exercisable.

FTE: Fully taxable-equivalent

FVA: Funding valuation adjustment

FX: Foreign exchange

G7: “Group of Seven nations”: Countries in the G7 are Canada, France, Germany, Italy, Japan, the U.K. and the U.S.

G7 government securities: Securities issued by the government of one of the G7 nations.

Ginnie Mae: Government National Mortgage Association

GSIB: Global systemically important banks

HELOC: Home equity line of credit

Home equity – senior lien: represents loans and commitments where JPMorganChase holds the first security interest on the property.

Home equity – junior lien: represents loans and commitments where JPMorganChase holds a security interest that is subordinate in rank to other liens.

HQLA: High-quality liquid assets

HTM: Held-to-maturity

IBOR: Interbank Offered Rate

IDI: Insured depository institutions

IHC: JPMorgan Chase Holdings LLC, an intermediate holding company

Investment-grade: An indication of credit quality based on JPMorganChase’s internal risk assessment system. “Investment grade” generally represents a risk profile similar to a rating of a “BBB-”/“Baa3” or better, as defined by independent rating agencies.

IPO: Initial Public Offering

IR: Interest rate

ISDA: International Swaps and Derivatives Association

JPMorganChase: JPMorgan Chase & Co.

JPMorgan Chase Bank, N.A.: JPMorgan Chase Bank, National Association

JPMorgan Chase Foundation or Foundation: a not-for-profit organization that makes contributions for charitable and educational purposes.

J.P. Morgan Securities: J.P. Morgan Securities LLC

JPMSE: J.P. Morgan SE

LCR: Liquidity coverage ratio

LIBOR: London Interbank Offered Rate

LLC: Limited Liability Company

LOB: Line of business

LTV: “Loan-to-value ratio”: For residential real estate loans, the relationship, expressed as a percentage, between the principal amount of a loan and the

appraised value of the collateral (i.e., residential real estate) securing the loan.

Origination date LTV ratio

The LTV ratio at the origination date of the loan. Origination date LTV ratios are calculated based on the actual appraised values of collateral (i.e., loan-level data) at the origination date.

Current estimated LTV ratio

An estimate of the LTV as of a certain date. The current estimated LTV ratios are calculated using estimated collateral values derived from a nationally recognized home price index measured at the metropolitan statistical area (“MSA”) level. These MSA-level home price indices consist of actual data to the extent available and forecasted data where actual data is not available. As a result, the estimated collateral values used to calculate these ratios do not represent actual appraised loan-level collateral values; as such, the resulting LTV ratios are necessarily imprecise and should therefore be viewed as estimates.

Combined LTV ratio

The LTV ratio considering all available lien positions, as well as unused lines, related to the property. Combined LTV ratios are used for junior lien home equity products.

Macro businesses: the macro businesses include Rates, Currencies and Emerging Markets, Fixed Income Financing and Commodities in CIB’s Fixed Income Markets.

Managed basis: A non-GAAP presentation of Firmwide financial results that includes reclassifications to present revenue on a fully taxable-equivalent basis. Management also uses this financial measure at the segment level, because it believes this provides information to enable investors to understand the underlying operational performance and trends of the particular business segment and facilitates a comparison of the business segment with the performance of competitors.

Markets: consists of CIB’s Fixed Income Markets and Equity Markets businesses.

Master netting agreement: A single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due).

MBS: Mortgage-backed securities

MD&A: Management’s discussion and analysis

Measurement alternative: Measures equity securities without readily determinable fair values at cost less

impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer.

Merchant Services: offers merchants payment processing capabilities, fraud and risk management, data and analytics, and other payments services. Through Merchant Services, merchants of all sizes can accept payments via credit and debit cards and payments in multiple currencies.

MEV: Macroeconomic variable

Moody's: Moody's Investor Services

Mortgage product types:

Alt-A

Alt-A loans are generally higher in credit quality than subprime loans but have characteristics that would disqualify the borrower from a traditional prime loan. Alt-A lending characteristics may include one or more of the following: (i) limited documentation; (ii) a high CLTV ratio; (iii) loans secured by non-owner occupied properties; or (iv) a debt-to-income ratio above normal limits. A substantial proportion of the Firm's Alt-A loans are those where a borrower does not provide complete documentation of his or her assets or the amount or source of his or her income.

Option ARMs

The option ARM real estate loan product is an adjustable-rate mortgage loan that provides the borrower with the option each month to make a fully amortizing, interest-only or minimum payment. The minimum payment on an option ARM loan is based on the interest rate charged during the introductory period. This introductory rate is usually significantly below the fully indexed rate. The fully indexed rate is calculated using an index rate plus a margin. Once the introductory period ends, the contractual interest rate charged on the loan increases to the fully indexed rate and adjusts monthly to reflect movements in the index. The minimum payment is typically insufficient to cover interest accrued in the prior month, and any unpaid interest is deferred and added to the principal balance of the loan. Option ARM loans are subject to payment recast, which converts the loan to a variable-rate fully amortizing loan upon meeting specified loan balance and anniversary date triggers.

Prime

Prime mortgage loans are made to borrowers with good credit records who meet specific underwriting requirements, including prescriptive requirements related to income and overall debt levels. New prime mortgage borrowers provide full documentation and generally have reliable payment histories.

Subprime

Subprime loans are loans that, prior to mid-2008, were offered to certain customers with one or more high risk characteristics, including but not limited to: (i)

unreliable or poor payment histories; (ii) a high LTV ratio of greater than 80% (without borrower-paid mortgage insurance); (iii) a high debt-to-income ratio; (iv) an occupancy type for the loan is other than the borrower's primary residence; or (v) a history of delinquencies or late payments on the loan.

MREL: Minimum requirements for own funds and eligible liabilities

MSR: Mortgage servicing rights

NA: Data is not applicable or available for the period presented.

Net Capital Rule: Rule 15c3-1 under the Securities Exchange Act of 1934.

Net charge-off/(recovery) rate: represents net charge-offs/(recoveries) (annualized) divided by average retained loans for the reporting period.

Net interchange income includes the following components:

- **Interchange income:** Fees earned by credit and debit card issuers on sales transactions.
- **Rewards costs:** The cost to the Firm for points earned by cardholders enrolled in credit card rewards programs generally tied to sales transactions.
- **Partner payments:** Payments to co-brand credit card partners based on the cost of loyalty program rewards earned by cardholders on credit card transactions.

Net yield on interest-earning assets: The average rate for interest-earning assets less the average rate paid for all sources of funds.

NFA: National Futures Association

NM: Not meaningful

Nonaccrual loans: Loans for which interest income is not recognized on an accrual basis. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest has been in default for a period of 90 days or more unless the loan is both well-secured and in the process of collection. Collateral-dependent loans are typically maintained on nonaccrual status.

Nonperforming assets: Nonperforming assets include nonaccrual loans, nonperforming derivatives and certain assets acquired in loan satisfactions, predominantly real estate owned and other commercial and personal property.

NSFR: Net Stable Funding Ratio

OCC: Office of the Comptroller of the Currency

OCI: Other comprehensive income/(loss)

OPEB: Other postretirement employee benefit

Operating losses: Primarily refer to fraud losses associated with customer deposit accounts, credit and debit cards; exclude legal expense

OTC: “Over-the-counter derivatives”: Derivative contracts that are negotiated, executed and settled bilaterally between two derivative counterparties, where one or both counterparties is a derivatives dealer.

OTC cleared: “Over-the-counter cleared derivatives”: Derivative contracts that are negotiated and executed bilaterally, but subsequently settled via a central clearing house, such that each derivative counterparty is only exposed to the default of that clearing house.

Overhead ratio: Noninterest expense as a percentage of total net revenue.

Parent Company: JPMorgan Chase & Co.

Participating securities: represents unvested share-based compensation awards containing nonforfeitable rights to dividends or dividend equivalents (collectively, “dividends”), which are included in the earnings per share calculation using the two-class method. JPMorganChase grants restricted stock and RSUs to certain employees under its share-based compensation programs, which entitle the recipients to receive nonforfeitable dividends during the vesting period on a basis equivalent to the dividends paid to holders of common stock. These unvested awards meet the definition of participating securities. Under the two-class method, all earnings (distributed and undistributed) are allocated to each class of common stock and participating securities, based on their respective rights to receive dividends.

PCD: “Purchased credit deteriorated” assets represent acquired financial assets that as of the date of acquisition have experienced a more-than-insignificant deterioration in credit quality since origination, as determined by the Firm.

Pillar 1: The Basel framework consists of a three “Pillar” approach. Pillar 1 establishes minimum capital requirements, defines eligible capital instruments, and prescribes rules for calculating RWA.

Pillar 3: The Basel framework consists of a three “Pillar” approach. Pillar 3 encourages market discipline through disclosure requirements which allow market participants to assess the risk and capital profiles of banks.

PRA: Prudential Regulation Authority

Preferred stock dividends: reflects dividends declared and deemed dividends upon redemption of preferred stock

Pre-provision profit/(loss): represents total net revenue less noninterest expense. The Firm believes that this financial measure is useful in assessing the

ability of a lending institution to generate income in excess of its provision for credit losses.

Principal transactions revenue: Principal transactions revenue is driven by many factors, including the bid-offer spread, which is the difference between the price at which the Firm is willing to buy a financial or other instrument and the price at which the Firm is willing to sell that instrument. It also consists of realized (as a result of closing out or termination of transactions, or interim cash payments) and unrealized (as a result of changes in valuation) gains and losses on financial and other instruments (including those accounted for under the fair value option) primarily used in client-driven market-making activities and on private equity investments. In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities (including physical commodities inventories and financial instruments that reference commodities). Principal transactions revenue also includes certain realized and unrealized gains and losses related to hedge accounting and specified risk-management activities, including: (a) certain derivatives designated in qualifying hedge accounting relationships (primarily fair value hedges of commodity and foreign exchange risk), (b) certain derivatives used for specific risk management purposes, primarily to mitigate credit risk and foreign exchange risk, and (c) other derivatives.

PSU(s): Performance share units

Regulatory VaR: Daily aggregated VaR calculated in accordance with regulatory rules.

REO: Real estate owned

Reported basis: Financial statements prepared under U.S. GAAP, which excludes the impact of taxable-equivalent adjustments.

Retained loans: Loans that are held-for-investment (i.e. excludes loans held-for-sale and loans at fair value).

Revenue wallet: Total fee revenue based on estimates of investment banking fees generated across the industry (i.e., the revenue wallet) from investment banking transactions in M&A, equity and debt underwriting, and loan syndications. Source: Dealogic, a third-party provider of investment banking competitive analysis and volume based league tables for the above noted industry products.

RHS: Rural Housing Service of the U.S. Department of Agriculture

ROE: Return on equity

ROTCE: Return on tangible common equity

ROU assets: Right-of-use assets

RSU(s): Restricted stock units

RWA: "Risk-weighted assets": Basel III establishes two comprehensive approaches for calculating RWA (a Standardized approach and an Advanced approach) which include capital requirements for credit risk, market risk, and in the case of Basel III Advanced, also operational risk. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced.

S&P: Standard and Poors

SA-CCR: Standardized Approach for Counterparty Credit Risk

SAR as it pertains to Hong Kong: Special Administrative Region

SAR(s) as it pertains to employee stock awards: Stock appreciation rights

SCB: Stress capital buffer

Scored portfolios: Consumer loan portfolios that predominantly include residential real estate loans, credit card loans, auto loans to individuals and certain small business loans.

SEC: U.S. Securities and Exchange Commission

Securitized Products Group: Comprised of Securitized Products and tax-oriented investments.

Seed capital: Initial JPMorgan capital invested in products, such as mutual funds, with the intention of ensuring the fund is of sufficient size to represent a viable offering to clients, enabling pricing of its shares, and allowing the manager to develop a track record. After these goals are achieved, the intent is to remove the Firm's capital from the investment.

Shelf securities: Securities registered with the SEC under a shelf registration statement that have not been issued, offered or sold. These securities are not included in league tables until they have actually been issued.

Single-name: Single reference-entities

SLR: Supplementary leverage ratio

SMBS: Stripped Mortgage-Backed Securities

SOFR: Secured Overnight Financing Rate

SPEs: Special purpose entities

Structural interest rate risk: represents interest rate risk of the non-trading assets and liabilities of the Firm.

Structured notes: Structured notes are financial instruments whose cash flows are linked to the

movement in one or more indexes, interest rates, foreign exchange rates, commodities prices, prepayment rates, underlying reference pool of loans or other market variables. The notes typically contain embedded (but not separable or detachable) derivatives. Contractual cash flows for principal, interest, or both can vary in amount and timing throughout the life of the note based on non-traditional indexes or non-traditional uses of traditional interest rates or indexes.

Suspended foreclosures: Loans referred to foreclosure where formal foreclosure proceedings have started but are currently on hold, which could be due to bankruptcy or loss mitigation. Includes both judicial and non-judicial states.

Taxable-equivalent basis: In presenting managed results, the total net revenue for each of the business segments and the Firm is presented on a tax-equivalent basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities; the corresponding income tax impact related to tax-exempt items is recorded within income tax expense.

TBVPs: Tangible book value per share

TCE: Tangible common equity

TLAC: Total Loss Absorbing Capacity

U.K.: United Kingdom

U.S.: United States of America

U.S. GAAP: Accounting principles generally accepted in the United States of America.

U.S. government agencies: U.S. government agencies include, but are not limited to, agencies such as Ginnie Mae and FHA, and do not include Fannie Mae and Freddie Mac which are U.S. government-sponsored enterprises ("U.S. GSEs"). In general, obligations of U.S. government agencies are fully and explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government in the event of a default.

U.S. GSE(s): "U.S. government-sponsored enterprises" are quasi-governmental, privately-held entities established or chartered by the U.S. government to serve public purposes as specified by the U.S. Congress to improve the flow of credit to specific sectors of the economy and provide certain essential services to the public. U.S. GSEs include Fannie Mae and Freddie Mac, but do not include Ginnie Mae or FHA. U.S. GSE obligations are not explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government.

U.S. Treasury: U.S. Department of the Treasury

Unaudited: Financial statements and/or information that have not been subject to auditing procedures by an independent registered public accounting firm.

VA: U.S. Department of Veterans Affairs

VaR: "Value-at-risk" is a measure of the dollar amount of potential loss from adverse market moves in an ordinary market environment.

VIes: Variable interest entities

Warehouse loans: consist of prime mortgages originated with the intent to sell that are accounted for at fair value and classified as loans.

LINE OF BUSINESS METRICS

CONSUMER & COMMUNITY BANKING (“CCB”)

Debit and credit card sales volume: Dollar amount of card member purchases, net of returns.

Deposit margin: Represents net interest income expressed as a percentage of average deposits.

Home Lending Production and Home Lending Servicing revenue comprises the following:

Net mortgage servicing revenue: Includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSR; the impact of risk management activities associated with MSR; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies.

Production revenue: Includes fees and income recognized as earned on mortgage loans originated with the intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option.

Mortgage origination channels comprise the following:

Retail: Borrowers who buy or refinance a home through direct contact with a mortgage banker employed by the Firm using a branch office, the Internet or by phone. Borrowers are frequently referred to a mortgage banker by a banker in a Chase branch, real estate brokers, home builders or other third parties.

Correspondent: Banks, thrifts, other mortgage banks and other financial institutions that sell closed loans to the Firm.

Card Services: is a business that primarily issues credit cards to consumers and small businesses.

Net revenue rate: Represents Card Services net revenue (annualized) expressed as a percentage of average loans for the period.

Auto loan and lease origination volume: Dollar amount of auto loans and leases originated.

COMMERCIAL & INVESTMENT BANK (“CIB”)

Definition of selected CIB revenue:

Investment Banking: Includes investment banking fees as well as other revenues associated with investment banking activities and services including advising on corporate strategy and structure, and capital-raising in equity and debt markets.

Payments: reflects revenue from cash management solutions, including services that enable clients to manage payments globally across liquidity and account solutions, commerce solutions, clearing, trade and working capital.

Lending: includes revenue from a variety of financing alternatives, which includes on a secured basis.

Fixed Income Markets: primarily includes revenue related to market-making and lending across global fixed income markets, including foreign exchange, interest rate, credit and commodities markets.

Equity Markets: primarily includes revenue related to market-making and lending across global equity markets, including cash, derivative and prime brokerage products.

Securities Services: revenues are primarily generated from net interest income, asset based fees, and transaction based fees. Our core product offering is organized into four key areas: custody, fund services, liquidity and trading services, and data solutions. These services are marketed primarily to institutional investors.

Description of certain business metrics:

Assets under custody (“AUC”): represents activities associated with the safekeeping and servicing of assets on which Securities Services earns fees.

Investment banking fees: represents advisory, equity underwriting, bond underwriting and loan syndication fees.

Description of CIB client coverage segment for Banking & Payments revenue^(a):

Global Corporate Banking & Global Investment Banking: provides banking products and services generally to large corporations, financial institutions and merchants.

Commercial Banking: provides banking products and services generally to middle market clients, including start-ups, small and mid-sized companies, local governments, municipalities, and nonprofits, as well as to commercial real estate clients.

Other: includes amounts related to credit protection purchased against certain retained loans and lending-related commitments in Lending, the impact of equity investments in Payments and revenues not aligned with a primary client coverage segment.

(a) **Global Banking** is a client coverage view within the Banking & Payments business and is comprised of the Global Corporate Banking, Global Investment Banking and Commercial Banking client coverage segments.

ASSET & WEALTH MANAGEMENT (“AWM”)

Assets under management (“AUM”): represent assets managed by AWM on behalf of its Private Banking, Global Institutional and Global Funds clients. Includes “Committed capital not Called.”

Client assets: represent assets under management, as well as custody, brokerage, administration and deposit accounts.

Multi-asset: Any fund or account that allocates assets under management to more than one asset class.

Alternative assets "Alternatives": The following types of assets constitute alternative investments – hedge funds, currency, real estate, private equity and other investment funds designed to focus on nontraditional strategies.

AWM’s lines of business consist of the following:

Asset Management: offers multi-asset investment management solutions across equities, fixed income, alternatives and money market funds to institutional and retail investors providing for a broad range of clients’ investment needs.

Global Private Bank: provides retirement products and services, brokerage, custody, trusts and estates, loans, mortgages, deposits and investment management to high net worth clients.

AWM’s client segments consist of the following:

Private Banking: clients include high- and ultra-high-net-worth individuals, families, money managers and business owners.

Global Institutional: clients include both corporate and public institutions, endowments, foundations, nonprofit organizations and governments worldwide.

Global Funds: clients include financial intermediaries and individual investors.

Asset Management has two high-level measures of its overall fund performance:

Percentage of active mutual fund and active ETF assets under management in funds rated 4- or 5-star: Mutual fund rating services rank funds based on their risk-adjusted performance over various periods. A 5-star rating is the best rating and represents the top 10% of industry-wide ranked funds. A 4-star rating represents the next 22.5% of industry-wide ranked funds. A 3-star rating represents the next 35% of industry-wide ranked funds. A 2-star rating represents the next 22.5% of industry-wide ranked funds. A 1-star rating is the worst rating and represents the bottom 10% of industry-wide ranked funds. An overall Morningstar rating is derived from a weighted average of the performance associated with a fund’s three-, five- and ten- year (if applicable) Morningstar Rating metrics. For U.S.-domiciled funds, separate star ratings are provided at the individual share class level.

The Nomura “star rating” is based on three-year risk-adjusted performance only. Funds with fewer than three years of history are not rated and hence excluded from these rankings. All ratings, the assigned peer categories and the asset values used to derive these rankings are sourced from the applicable fund rating provider. Where applicable, the fund rating providers redenominate asset values into U.S. dollars. The percentage of AUM is based on star ratings at the share class level for U.S.-domiciled funds, and at a “primary share class” level to represent the star rating of all other funds, except for Japan, for which Nomura provides ratings at the fund level. The performance data may have been different if all share classes had been included. Past performance is not indicative of future results.

Percentage of active mutual fund and active ETF assets under management in funds ranked in the 1st or 2nd quartile (one, three, and five years): All quartile rankings, the assigned peer categories and the asset values used to derive these rankings are sourced from the fund rating providers. Quartile rankings are based on the net-of-fee absolute return of each fund. Where applicable, the fund rating providers redenominate asset values into U.S. dollars. The percentage of AUM is based on fund performance and associated peer rankings at the share class level for U.S.-domiciled funds, at a “primary share class” level to represent the quartile ranking for U.K., Luxembourg and Hong Kong funds and at the fund level for all other funds. The performance data may have been different if all share classes had been included. Past performance is not indicative of future results.

“Primary share class” means the C share class for European funds and Acc share class for Hong Kong and Taiwan funds. If these share classes are not available, the oldest share class is used as the primary share class.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Refer to the Market Risk Management section of Management's discussion and analysis and pages 141–149 of JPMorganChase's 2024 Form 10-K for a discussion of the quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Firm's management, including its Chairman and Chief Executive Officer and its Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chairman and Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. Refer to Exhibits 31.1 and 31.2 for the Certifications furnished by the Chairman and Chief Executive Officer and Chief Financial Officer, respectively.

The Firm is committed to maintaining high standards of internal control over financial reporting. Nevertheless, because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Deficiencies or lapses in internal controls may occur from time to time, and there can be no assurance that any such deficiencies will not result in significant deficiencies or material weaknesses in internal control in the future and collateral consequences therefrom. Refer to "Management's report on internal control over financial reporting" on page 168 of JPMorganChase's 2024 Form 10-K for further information. There was no change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that occurred during the three months ended March 31, 2025, that has materially affected, or is reasonably likely to materially affect, the Firm's internal control over financial reporting.

Part II – Other Information

Item 1. Legal Proceedings.

Refer to the discussion of the Firm's material legal proceedings in Note 24 of this Form 10-Q for information that updates the disclosures set forth under Part I, Item 3: Legal Proceedings, in JPMorganChase's 2024 Form 10-K.

Item 1A. Risk Factors.

Refer to Part I, Item 1A: Risk Factors on pages 10–37 of JPMorganChase's 2024 Form 10-K and Forward-Looking Statements on page 77 of this Form 10-Q for a discussion of certain risk factors affecting the Firm.

Supervision and regulation

Refer to the Supervision and regulation section on pages 2–7 of JPMorganChase's 2024 Form 10-K for information on Supervision and Regulation.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Repurchases under the common share repurchase program

Refer to Capital Risk Management on pages 33–39 of this Form 10-Q and pages 97–107 of JPMorganChase's 2024 Form 10-K for information regarding repurchases under the Firm's common share repurchase program.

On June 28, 2024, the Firm announced that its Board of Directors had authorized a new \$30 billion common share repurchase program, effective July 1, 2024.

Shares repurchased pursuant to the common share repurchase program during the three months ended March 31, 2025 were as follows:

Three months ended March 31, 2025	Total number of shares of common stock repurchased	Average price paid per share of common stock ^(a)	Aggregate purchase price of common stock repurchases ^(a) (in millions)	Dollar value of remaining authorized repurchase ^{(a)(b)} (in millions)
January	12,056,759	\$ 251.91	\$ 3,037	\$ 16,289
February	7,462,938	269.15	2,009	14,280
March	10,433,923	241.28	2,517	11,763
First quarter	29,953,620	\$ 252.50	\$ 7,563	\$ 11,763

(a) Excludes excise tax and commissions.

(b) Represents the amount remaining under the \$30 billion repurchase program.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

Trading arrangements

The following table provides information concerning Rule 10b5-1 trading arrangements (as defined in Item 408 of Regulation S-K under the Securities Exchange Act of 1934) adopted in the first quarter of 2025, by any director or officer who is subject to the filing requirements of Section 16 of the Securities Exchange Act of 1934 ("Section 16 Director or Officer"). These trading arrangements are intended to satisfy the affirmative defense of Rule 10b5-1(c). Certain of the Firm's Section 16 Directors or Officers may participate in employee stock purchase plans, 401(k) plans or dividend reinvestment plans of the Firm that have been designed to comply with Rule 10b5-1(c). No non-Rule 10b5-1 trading arrangements (as defined in Item 408 of Regulation S-K under the Securities Exchange Act of 1934) were adopted by any Section 16 Director or Officer during the first quarter of 2025. Additionally, no Rule 10b5-1 or non-Rule 10b5-1 trading arrangements were terminated by any Section 16 Director or Officer in the first quarter of 2025.

Name	Title	Adoption date	Duration ^(d)	Aggregate number of shares to be sold
Linda Bammann ^(a)	Director	January 17, 2025	January 17, 2025 – December 31, 2025	19,000
Jeremy Barnum	Chief Financial Officer	January 28, 2025	January 28, 2025 – December 31, 2025	40,014
Ashley Bacon	Chief Risk Officer	February 11, 2025	February 11, 2025 – September 30, 2025	10,403
Lori Beer	Chief Information Officer	February 14, 2025	February 14, 2025 – September 30, 2025	5,873
Mary Erdoes	CEO, AWM	February 11, 2025	February 11, 2025 – June 30, 2025	14,055
Stacey Friedman ^(b)	General Counsel	February 14, 2025	February 14, 2025 – September 30, 2025	9,429
Marianne Lake ^(c)	CEO, CCB	February 14, 2025	February 14, 2025 – September 30, 2025	12,274
Douglas Petno	Co-CEO, CIB	February 13, 2025	February 13, 2025 – September 30, 2025	10,141
Jennifer Piepszak	Chief Operating Officer	January 28, 2025	January 28, 2025 – September 30, 2025	12,257

(a) Transaction by entity of which Ms. Bammann has either a direct or indirect pecuniary interest.

(b) Transaction by Ms. Friedman and a trust of which Ms. Friedman has either a direct or indirect pecuniary interest.

(c) Transaction by trust of which Ms. Lake has either a direct or indirect pecuniary interest.

(d) Sales under the trading arrangement will not commence until completion of the required cooling off period under Rule 10b5-1. Subject to compliance with Rule 10b5-1, duration could cease earlier than the final date shown above to the extent that the aggregate number of shares to be sold under the trading arrangement have been sold.

Commissioners:

We are aware that our report dated May 1, 2025 on our review of interim financial information of JPMorgan Chase & Co. and its subsidiaries (the "Firm"), which appears in this Quarterly Report on Form 10-Q, is incorporated by reference in the Registration Statements of the Firm referred to above. Pursuant to Rule 436(c) under the Securities Act of 1933, such report should not be considered a part of such Registration Statements, and is not a report within the meaning of Sections 7 and 11 of that Act.

Very truly yours,

/s/ PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, NY 10017

CERTIFICATION

I, James Dimon, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of JPMorgan Chase & Co.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
